## ECCO GOLF LT1

### EXPERIENCE A NEW KIND OF LIGHTNESS

Ultra-light, state-of-the-art foam supplies outstanding, game-changing rebound and softness in the ECCO GOLF LT1. This new hybrid shoe for men and women is created using our new ECCO LYTR, made from an advanced bounce and rebound material that is embedded in the sole via the signature ECCO FLUIDFORM™ Direct Comfort Technology. The foam is seamlessly combined in the midsole with ECCO's soft PHORENE™, which provides contoured comfort, stability and a longlasting integral bond to the leather upper.

For superb comfort and performance, each zone – the forefoot, midfoot and heel – has targeted amounts of the two materials.

The visible shank delivers low-to-the-ground stability and the new E-DTS™ NET outsole is a fresh twist on the ECCO DYNAMIC TRACTION SYSTEM™ and provides multi-directional traction and durability.

While the waterproof membrane, exclusively developed for ECCO, helps to keep the foot dry in wet conditions, the clean, sneaker-style aesthetic and ECCO leather add to the premium look and feel.

SS24

## KEY F&B

- ECCO's own innovative ECCO LYTR technology with new ECCO LYTR, an advanced bounce and rebound foam that is embedded in the sole via signature FLUIDFORM™ technology and is ultra-light, offers excellent rebound and is exceptionally soft
- The foam is seamlessly combined in the midsole with PHORENE™, which is engineered with FLUIDFORM™ for contoured comfort and stability as well as bounce
- New E-DTS™ NET outsole, a fresh take on the E-DTS™ design that offers multi-directional traction and durability

## INNOVATIVE COMFORT

- Ultra-lightweight rebound and softness with ECCO's own innovative ECCO LYTR technology with new ECCO LYTR, a supercritical foam that is embedded in the sole via signature FLUIDFORM™ technology
- Combined in the midsole with PHORENE™ for contoured comfort and stability as well as bounce, with targeted amounts of each material in the forefoot, midfoot and heel
- ECCO FLUIDFORM™ Direct Comfort Technology:
  - Ensures a finely-tuned balance of cushioning and rebound in the lightweight sole*
  - Creates an integral, flexible and durable bond without the compromises common with conventionally stitched and/or glued assemblies*
- The new E-DTS™ NET outsole is a new version of the ECCO DYNAMIC TRACTION SYSTEM™ and offers multi-directional traction and durability, and is transparent to showcase the shank technology

## PREMIUM MATERIALS

- Breathable, premium ECCO Performance Leather, which is developed in the shoemaker's own tanneries, adds style and comfort
- Sneaker-style aesthetic, with a clean, modern look for on and off the course
- Waterproof membrane, exclusively developed for ECCO, keeps the foot dry and comfortable in wet conditions
- X-TENSA INVISIBLE TECHNOLOGY links the sole unit to the lacing system via internal enforcement for enhanced stability
- Removable OrthoLite® insole for long-term cushioning and breathability
- Choice of laces or BOA® Fit System, which delivers a micro-adjustable precision fit engineered to perform in any conditions

# TECHNICAL FEATURES

SS24

## BIOM®

Wearing an ECCO GOLF shoe powered by BIOM® NATURAL MOTION® technology is the closest you will ever get to experiencing a barefoot feel on the first tee. Inspired by barefoot runners, ECCO GOLF developed the pioneering BIOM® technology to allow to move more naturally and efficiently. Thanks to an anatomical BIOM® last that follows the natural curves of your foot, you can enjoy a better push-off and maximum forward movement, as well as enhanced support and a reduced chance of injury. BIOM® is the low-to-the-ground construction, which ensures stability and strengthen leg muscles with every step.

## GORE-TEX® & SURROUND®

Keeping your foot dry in all weather conditions is key to comfort on a golf course, which is why ECCO GOLF uses GORE-TEX waterproof technologies and GORE-TEX SURROUND in its shoes. ECCO GOLF is the only major golf foot-wear manufacturer to do so. Importantly, GORE-TEX is highly breathable as well as 100% waterproof.

Gore Tex Surround is the state-of-the-art technology offers 360-degree climate control. Your foot will stay dry and ventilated in all conditions, thanks to technology that prevents water from entering the shoe while allowing perspiration to easily escape from the inside. A highly advanced air channelling system within the grid-shaped sole structure provides 360-degree breathability without compromising on waterproof protection.

## ZONAL FLUIDFORM™

With its culture of experimentation and innovation, ECCO continues to develop its signature FLUIDFORM™ technology. One recent advance is ZONAL FLUIDFORM™ Technology, producing a midsole molded from PU that has zones with different rigidity. This innovation means that you can create the ideal balance of cushioning and stability exactly where you need it, optimising performance and comfort.

**Zone 1:** the heel of the midsole has medium rigidity for greater cushioning and comfort.

**Zone 2:** the middle part of the midsole has the highest levels of rigidity which supplies excellent lateral stability throughout the swing.

**Zone 3:** the forefront of the midsole has lower rigidity for your walking comfort.

---

## FLUIDFORM™

---

Wearing an ECCO GOLF shoe powered by BIOM® NATURAL MOTION® technology is the closest you will ever get to experiencing a barefoot feel on the first tee. Inspired by barefoot runners, ECCO GOLF developed the pioneering BIOM® technology to allow to move more naturally and efficiently. Thanks to an anatomical BIOM® last that follows the natural curves of your foot, you can enjoy a better push-off and maximum forward movement, as well as enhanced support and a reduced chance of injury. BIOM® is the low-to-the-ground construction, which ensures stability and strengthen leg muscles with every step.

---

## E-DTS™ TWIST

---

A fresh and innovative spin on the E-DTS™ outsole – some traction bars have been enlarged and rotated for additional durability and multi-directional traction.

---

## MTN-GRIP

---

The innovative ECCO MTN GRIP outsole has three different sections: heel area - for enhanced heel traction and ground force stability. Middle part - providing traction and ground penetration and the front for rotational support throughout the swing. TPU elements wrap around the sides for lateral stability, while elevating the modern, premium look.

---

## LYTR TECHNOLOGY

---

Ultra-light, state-of-the-art foam supplies outstanding, game-changing rebound softness and light weight. ECCO's new LYTR Foam, made from an advanced bounce and rebound material is embedded in the sole via the signature ECCO FLUIDFORM™ Direct Comfort Technology. The foam is seamlessly combined in the midsole with ECCO's soft PHORENE™, which provides contoured comfort, stability and a longlasting integral bound to the leather upper. For superior comfort and performance, each zone – the forefoot, midfoot and heel – has targeted amounts of the two materials.

### FACTS & BENEFITS

- ECCO's own innovative ECCO LYTR technology with new ECCO LYTR, an advanced bounce and rebound foam that is embedded in the sole via signature FLUIDFORM™ technology and is ultra-light, offers excellent rebound and is exceptionally soft
- The foam is seamlessly combined in the midsole with PHORENE™, which is engineered with FLUIDFORM™ for contoured comfort and stability as well as bounce
- New E-DTS™ NET outsole, a fresh take on the E-DTS™ design that offers multi-directional traction and durability
- Breathable, premium ECCO Performance Leather with a waterproof membrane
- Waterproof membrane, exclusively developed for ECCO, keeps the foot dry and comfortable in wet conditions
- X-TENSA INVISIBLE Technology enhances stability
- Removable Ortholite® insole for long-lasting cushioning and breathability

### BOA® FIT SYSTEM

- BOA® Fit System delivers micro-adjustable precision fit and is engineered to perform in any conditions
