

At Victim United Inc we are diligent, dedicated and exceptionally committed.

Victims United Inc is a Survivor-Led Organization. Survivor-led services strive to incorporate the voice of survivors, ensuring that development and implementation of programming is driven by their experience and expertise. Our people have lived experience of challenges that, in turn, shape the psychological and trauma-informed support we provide to the individuals we support. This puts us in the best possible position to provide the specialist advice and guidance that the individuals we support urgently need to help them reach their full potential.
