Professional Attire

Thank you for choosing Elite Source Partners as your trusted partner for work attire guide. At Elite Source Partners, we believe that dressing for success is not just a saying; it's a way of life.

Suggestions For Professional Attire:

1. Clean and appropriate clothing.

Your clothing should be clean, well-maintained, and fit appropriately. Stay away from clothing that is revealing or too tight.

2. Professional attire.

A professional dress code isn't typically pairing a suit jacket with jeans; it usually involves a full-professional look, including a coordinated suit or jacket with slacks or a dress or skirt.

3. Dress to impress.

Building a professional wardrobe takes time. Consignment stores and resale shops are a great way to save money on suits, shoes, and other clothing items. Professional attire is typically timeless, making it easier to create your look.

4. Practice good hygiene.

Having a regular routine for personal hygiene is a critical part of your appearance, including clean hair, wearing deodorant, bathing, and brushing your teeth.

Examples for a professional work environment:

- Slacks, business dress, or skirt
- Structured suit jacket or blazer
- A tie, when required
- Button-up shirt, collared shirt, sweater, blouse
- Closed-toe dress shoes, including appropriate socks or hosiery
