

Waste Disposal Guideline

While handling waste it is essential that you follow the following steps to eliminate spreading the infection to others.

1

Place all used disposable gloves, facemasks, and other contaminated items in a separate container

2

Close the first bag of waste and tie the top.

3

Wash your hands using soap and water for at least 20 seconds

4

Wear single use disposable gloves

5

Put the first bag of waste in another bag and close the top with colored adhesive tape

6

Store the waste bags in a place that can not be accessed by children, other people or pets for 72hrs

7

Throw the garbage bags in the waste container
