

((5G)) Winnipeg Awareness!

Global 5G Protest Day – Winnipeg Information Session – Saturday, January 25, 2020

For immediate release - January 22, 2020

WINNIPEG, MANITOBA. Residents of Winnipeg are adding their voices to the **Global 5G Day of Protest** by hosting an information session to support the **International Appeal to Stop 5G**. The Appeal calls on the world's governments to stop the deployment of 5G. The rollout of 5G requires hundreds of thousands of new network antennas that will be closer to homes than ever before.

- The Appeal has been signed by people from over 200 countries and territories, including more than 7,000 scientists and medical doctors, more than 2,000 environmental organizations and 770 beekeepers. The Appeal will be delivered to officials in governments and international organizations, including the European Union, the United Nations and the World Health Organization. <https://stop5ginternational.org/>
- Protests and awareness raising events are being held in at least 8 provinces and 18 cities across Canada and in hundreds of places worldwide. Canadian medical doctors are warning of increased health care costs after 5G rollout. <http://c4st.org/ontario-doctors-warn-of-rising-health-care-costs-after-5g-roll-out/>
- Some regulators are listening to the concerns. Brussels, Belgium, parts of Italy and Switzerland have put a pause on 5G deployment. Sutton, Quebec unanimously passed a resolution to request the federal government, following the precautionary principle, decree a moratorium on the deployment of the 5G cellular network, until the various studies reach a consensus on the absence of risk and impact of 5G cell technology on health and the environment. [original French - *IL EST RÉSOLU : DE DEMANDER au gouvernement fédéral, en suivant le principe de précaution, qu'il décrète un moratoire sur le déploiement du réseau cellulaire 5G, et ce, jusqu'à ce que les diverses études dégagent un consensus quant à l'absence de risque et d'impact de la technologie cellulaire 5G sur la santé et l'environnement.*] <https://www.stopponsla5g.ca/campagne>

Mark Gildenhaar of Kingstonians for Safe Technology, Ontario: *"There has been no long term safety testing on 5G technologies. None. The weight of scientific evidence shows a clear association between radiation emitted by wireless communications systems and adverse health effects such as lowered fertility, oxidative stress, cellular DNA damage, neurological effects, cardiac disorders and cancer. We need a full moratorium on 5G until further independent research proves it is safe. Small cell antennas placed in our residential neighborhoods is a bad idea. A smart city is a wired city... municipally owned fibre to the premises is not only safer and more secure, it's hundreds of times faster than any wireless service."* <https://k4st.ca/>

Frank Clegg, past President of Microsoft Canada and now CEO of Canadians for Safe Technology: *"Health Canada's guidelines, Safety Code 6, are obsolete and not protective of the health of Canadians. We must have a moratorium on 5G and other deployment of microwave radiation infrastructure until Safety Code 6 is properly revised. The last revision was deeply flawed. Canadians should have the safest guidelines based on the best science available. The gold standard for such an approach is to have a systematic review of the literature conducted according to international best practices. This must be done by scientists independent of industry and in a transparent manner with the opportunity to have input from the public."* <http://c4st.org/>

5G Cell "Towers" in Winnipeg Neighbourhoods: Health Risks & Science Overview

**SATURDAY, JANUARY 25th 1:30 to 3pm (doors open at 1pm),
145 Maryland Avenue, Westminster Co-op Multi-Purpose Room**
