

((5G)) Winnipeg Awareness!

Winnipeg, Canada joins the 4th Global 5G Protests with 2 Events

IN THE DARK – SHINE A LIGHT

WE DO NOT CONSENT TO 5G EXPOSURES 24/7

NEWS RELEASE: WINNIPEG, SEPTEMBER 23, 2020: Millions of 4G & 5G network antennas are being installed around the world – with tens of thousands in Canada and thousands planned for Winnipeg. Some have been installed within 20 metres from homes, on lamp posts, hydro poles and sides and tops of buildings. Tens of thousands of space satellites will irradiate the whole Earth. We are experiencing mass involuntary exposure to a technology not tested for long-term health safety. We are raising public awareness of potential health risks, as well as violations of human and environmental rights associated with 5G wireless technology and we call for a moratorium on 5G deployment .

People around the world do not consent and are protesting against 5G deployment. They will gather in their respective countries, cities and communities and call for Safe Technology (aka SafeG™), not 5G.

“SafeG calls for wired connections to every home and business with the goal of reducing exposure to wireless radiation over time. Mobile would then increasingly be reserved for essential services only such as emergency alert, text messages and short cellphone calls, reserving safer wired connections for the bulk of internet and cellphone traffic”, says Kate Kheel of Stop 5G International, the group overseeing the world-wide protests.

5G Winnipeg Awareness will participate in two actions as part of the 4th Global 5G Protests.

EVENT 1 - IN THE DARK: 4G & 5G Small Cell Antenna Pilot Project in Winnipeg

Date: Friday, September 25, 2020 **Time:** Noon to 1:30 pm

Place: Begins at Innovation, Science and Economic Development Canada (400 St. Mary Avenue) with a short rally. Participants will then march, on the sidewalk, to Manitoba Hydro (360 Portage Avenue) and then on to Bell MTS, ROGERS and TELUS outlets or offices. We will be delivering letters with questions and clearly stating our non-consent.

“Winnipeggers are being kept in the dark about the pilot project that Manitoba Hydro is allowing to be conducted in Winnipeg by one of the telecommunications companies.” says spokesperson Marg Friesen. *“5G Winnipeg Awareness has sent a letter to the CEO of each of the major telecommunications companies in Winnipeg, Bell MTS, ROGERS, SHAW and TELUS, asking if they are involved. We also notified them that we object to these installations and do not give our consent to being exposed to untested technology 24/7.”*

We want to know:

- **WHO** is conducting this pilot project in the City of Winnipeg?
- **WHAT** is being installed?
- **WHERE** is this pilot project being conducted?
- **WHEN** were, or will, these antennas be installed?
- **HOW** is this company getting the approval for this project? City of Winnipeg staff said they would not be permitting antennas before the Public Engagement process, trials are conducted and the Winnipeg Antenna Siting Policy revised.

EVENT 2 - SHINE A LIGHT: 5G is a Flawed Global Experiment on Us and the Environment with No Informed Consent

Date: Saturday, September 26, 2020 **Time:** Noon to 1:30 pm

Place: At the Canadian Museum for Human Rights (85 Israel Asper Way)

Speakers: Overview of 5G deployment • Inadequate health and wildlife guidelines/standards

• Role of the media • Warnings from international MDs, scientists and lawyers about the hazards of wireless radiation exposures, including 5G, and of violations of human and environmental rights • Global and local actions
We will follow public health orders, restrictions and guidelines for both events.
