

## **The Backlash-ep48-**

### **Israel Attacks, Iran Retaliates, and MAGA Dies in the Crossfire**

**Rebecca Hargraves**

[ 00:03:16 ] Welcome to The Backlash, a weekly discussion about the past, present, and future of Western civilization. I am your host, Rebecca Hargraves, joined as always by a very tired Mr. Dave Riley.

**David J. Reilly**

[ 00:03:27 ] I am not tired. I'm doing great. How are you?

**Rebecca Hargraves**

[ 00:03:30 ] He said serenity 8 out of 10 right before we went live.

**David J. Reilly**

[ 00:03:32 ] It is at an 8 out of 10. I'm feeling very relaxed. I am very— Are you?

**Rebecca Hargraves**

[ 00:03:38 ] Because I feel like I'm going to puke. I had six shots of espresso and a cold brew today. I overdid it, even for me. That's just too much coffee. That's great. Is it? I think so. How are you doing, Cameron McGregor? What a slow news week. I know. What are we going to talk about? We have nothing to talk about, so we're just going to sit here. La-di-da. Yep.

**David J. Reilly**

[ 00:03:59 ] It feels like it has been a week since Monday.

**Rebecca Hargraves**

[ 00:04:04 ] Oh, yeah.

**David J. Reilly**

[ 00:04:06 ] Unironically, we are back in, like, 2016 when a day felt like a month.

**Rebecca Hargraves**

[ 00:04:12 ] I prepped these clips, I don't know, two hours ago, and I feel like they're out of date already. They're out of date already, yeah. I'm a little bit worried about it, but it's going to be a great show at Real Backlash. Our website is [thebacklash.net](https://thebacklash.net). Support us on [Subscribestar.com/slash/thebacklash](https://Subscribestar.com/slash/thebacklash), [Patreon.com/slash/thebacklash](https://Patreon.com/slash/thebacklash). Send your super chats that will be read live at the end of our show to [TheBacklash.net/super-chat](https://TheBacklash.net/super-chat). Please, please, please subscribe to us on YouTube. We are at Real Backlash. Subscribe to us on Rumble. We are the Backlash podcast on there. Thank you so much for joining us today. bants. Just a little bants. If you guys want to come hang out with us at Heterosexual

Awesomeness Fest, we will be there, Dave and I. It's going to be great. That's why Dave is so tired. He's been prepping.

**David J. Reilly**

[ 00:05:03 ] I've been prepping and getting packed and I had to get a hitch added to my van so I could pull a U-Haul. You can kind of see it right up here-ish outside. We got a little U-Haul. We're going to load that up, put a bunch of Patriot Front people in there and drive on down. How many Patriot Front people can fit in a 5x8? Oh, like 12. 12. Yeah.

**Rebecca Hargraves**

[ 00:05:24 ] Wow. If they're butt to nut, 12.

**David J. Reilly**

[ 00:05:27 ] Wow. Well, that is. Incredible.

**Rebecca Hargraves**

[ 00:05:30 ] It's going to be a great time. Do you want to talk about this KRCC, KCRCC thing real quick?

**David J. Reilly**

[ 00:05:36 ] Yeah, this is so funny. So a couple of days ago, let me pull this up. A couple of days ago, I got a ping on Twitter, which is very fun, of this guy who's calling himself Jeff56CDA. Well, we know who you are, Jeff. But everybody knows that it's really Richard Matt Blatt, Hamilton associate; he did psyops in the army for 30 years. He runs you right, oh yeah, big time. He runs this account called Spokane Zionist. So he posted this tweet because I had been invited on Press TV before. I've been on Iranian state television. And so Israel struck the parent company in Tehran. And the Islamic Republic State TV was in flames the other day. And so this guy, you know, we'll call it Jeff, whatever, says, 'Oops, looks like real Dave Riley won't be able to help support Iran against America anymore.' And then our local city councilor, Dan Gookin, said, 'I wonder if Israel has an extra missiles they can target to specific locations in Kootenai County.' Very obviously insinuating that he wants me to be blown up comes amidst a climate of political strife here in North Idaho yeah the other day we heard in a clip some sort of sirens or something like that Dave quite literally shit his pants it was it was a problem the whole the whole place stank had a little PTSD moment Like there's fucking sirens going Like I'm expecting a drone to come down on my house at any moment I can't believe KCRCC addressed this They should have said nothing They immediately well not immediately but the KCRCC did post about this which is very funny They said Thank you. Reject violence and divisive language, the KCRCC remains committed to advancing conservative principles through respectful dialogue and ensuring a safe, United Kootenai County. Everybody in the chat, please go to KCRCC. Come tell them the backlash sent you and give them some money, okay please really we need some clout here, uh, you know, staunch ridiculous, you know, uh, Israel-worshipping Zionist. So the fact that this was addressed is crazy, but I don't think it was addressed because of me; let's be honest, I am on the outs with all of the local politicians-they don't love you, they don't love me, no, no, they don't. Contrary

to what they're all talking to Mother Jones saying that I took over the Republican Party, that uh, that is not in fact true. Uh, but there have been there has been a lot, I mean somebody uh, Last 4th of July, we're coming up on the one-year anniversary. You might remember our state representative, Cornell Razor. His Army-Navy surplus store was burned to the ground on 4th of July. And then just a couple of months ago, a crazy person filled up his car with gas cans and was driving to Representative Jordan Redmond's business office to burn it down. Good Lord. So there have been a lot of people up here. Guy that was caught at a gun range, uh, that was saying he was there to learn how to shoot Trumpers, uh, which of course you can't go to a gun range uh and and and shoot and say that you're training to shoot other human beings, that's crazy. So anyway, that seems like a really bad place to do a shooting the last real American Republican Party, I don't know, not really, but you know.

### **Rebecca Hargraves**

[ 00:10:11 ] Your ass kissing is not going to No, as a matter of fact, it's probably going to cause a backlash.

### **David J. Reilly**

[ 00:10:18 ] Ah, you did the thing.

### **Rebecca Hargraves**

[ 00:10:20 ] Are you guys afraid for your financial future?

### **David J. Reilly**

[ 00:10:23 ] Well, if so, you can buy oil stocks, buy pounds. No, no. Okay, sorry. Do the thing. Oh, yes, that's right. We have sponsors. Lear Capital. I'm just joking. If you are looking at all of the global instability, you need to visit our friends at [atlasbullion. com/ slash backlash](https://atlasbullion.com/backlash). They are the finest gold and silver bullion dealer that I have ever dealt with in my life. They have gold and silver subscriptions. That are available on a weekly, bi-weekly, monthly, bi-monthly basis. Plans starting as low as \$55 a month for their silver subscriptions. You can see they have excellent service. Lots of people talking about how awesome this company is. You can buy little bits of gold. Actually, you can buy very tiny pieces. And eventually, over time, it'll become one big piece. Sorry. What is wrong with you? You can also roll over your IRA and 401(k) with our friends at Atlas Bullion. So please, if you're looking at the world falling apart before your very eyes, you're looking at the DXY, the dollar index, maybe you're looking at the bond market and you're thinking to yourself, 'I think our economy's fucked.' Then it might be a good time to start investing in precious metals, gold and silver.

### **Rebecca Hargraves**

[ 00:11:50 ] It's always a good time.

### **David J. Reilly**

[ 00:11:51 ] At [atlasbullion. com slash backlash](https://atlasbullion.com/backlash). I mean, the thing is, when I was a kid, I remember my parents made me savings accounts, right? If I had kept all of my money in a savings account over the last 30 years, it would be worth half as much as the day that we had

put it in because of inflation. Yes, inflation at like 5% over 30 years devalues your money by like 50%. I can't even think about it. It is a hidden tax on your work, and that's why we recommend precious metal.

### **Rebecca Hargraves**

[ 00:12:25 ] Normally, we would not tell people to engage in fear-based investing, but you definitely should engage in fear-based investing. Man, what we have seen this week, in Israel and Iran, it has been terrifying, albeit totally predictable. Everyone's acting like Nick Fuentes as some kind of oracle, but everybody that has been paying attention has been able to see that this was always the plan. So let's just jump right in. I trust the audience. I trust that you guys are up to date on everything that's going on.

### **David J. Reilly**

[ 00:12:54 ] I would not. What? I would not trust that they're up to date. So, I was at a thing. He was at a thing, guys. Did we get like a really big super chat? Or is our thing broken? I was at a barbecue last night. Actually, it was like a legislative barbecue thing. Oh, yeah, the goal value went to zero. Jeepers, creepers. Yeah, no, we need help. There we go. There we go. Geez. No, I was at this legislative barbecue and it was really funny. You know, one guy came up to me and he's like, oh, hey, Dave. And, you know, he was all like, you know, this is, you've been kind of controversial since you started your backlash. Oh, whatever. And I'm just like, it's fine. Be cool, man. It's no big deal. Just don't watch it if you don't like it. And then somebody else came up to me with their like five kids. And they were like, oh, my God, I love your show. Excellent. I, like, don't have to watch anything else. I can get all the news from you guys, and then I can spend the rest of my week just doing whatever. That's amazing. And I'm like, thank you. That's wonderful. But so I'm saying, don't assume that everybody knows exactly what's been going on.

### **Rebecca Hargraves**

[ 00:13:58 ] Okay, I mean, we're going to break it down, but I didn't want to go through, like, a play-by-play of everything that had happened this week because I'm like, we're going to waste all of our time talking about what's already happened. I assume that you guys are somewhat up to date. So I just want to jump right in. Of course, Israel's preemptive strike on Iran was sanctioned by Trump, and he deserves harsh criticism for this. All right. But what we need to understand is that he is one man amongst many. He is fighting this system. Well, he's not fighting it. I mean, he's totally the system is subsuming him. Yes. He's surrounded. I want to talk about that. This has been a plan many, many years in the works. Many years. Decades in the works. So that's what we're going to focus on today. So let's start with this H. R. McMaster clip. He's a retired Army lieutenant general and former national security advisor. And in this clip, he explains that this was an operation several years in the making for Israel. And the way he speaks about it just glowing terms. We're going to see a few of these. These are the kinds of people that are advising Trump. None of these people are Jewish, but they're staunch Zionists. And these are the people that are getting in Trump's head. If there is any dissent at all, which I'm not convinced that there really is. I mean, we're going to talk about Tulsi Gabbard in a minute and some of the other intelligence agencies.

But I think that this is what he is hearing in the war room.

**Cameron MacGregor7**

[ 00:15:21 ] McMaster, you see on the touchscreen, he joins us from Stanford University's Hoover Institution. HR, thank you so much for joining us. I'm glad you're with us, particularly on this day. Two questions. First, evaluate what Israel has done, evaluate the Iranian response such as we know it.

**SPEAKER\_5**

[ 00:15:41 ] Hey, Major. It's great to be with you. And, well, I think what Israel has done is actually phenomenal in terms of the performance of Israeli intelligence and the IDF. And Sam nailed it. I mean, this is an operation, I'm sure, that was at least two years in the making to put into place the kind of infrastructure that allowed Israel to just track some of these key leaders in real time, nuclear program and Israel's efforts to set back the nuclear program, as well as leaders who were relevant to what Iran might do in response and to cripple that capability.

**Rebecca Hargraves**

[ 00:16:25 ] Good Lord. It's not just him. I mean, there are a multitude of people that are in this camp. This is retired American general who served as Vice Chief of Staff from 1999 in the Army, 1999 to 2003. And he's massively overblowing Iran's nuclear capabilities and supporting Israeli strikes as a measure to prevent nuclear apocalypse. Let's go to two.

**SPEAKER\_3**

[ 00:16:49 ] Then the Ayatollah will be able to achieve what he's always wanted here. The reason why he never voluntarily dismantled the program through negotiations is because he was willing to accept the airstrike, believing that he could still recover some aspect of his nuclear enterprise after the airstrikes are completed, and he would be able to rebuild that nuclear program. That is where his head is, and we've got to stop that from happening. In my judgment, assist the Israelis in their air campaign by conducting a limited but focused air campaign using penetration bombing to eliminate the end of that nuclear end state, and that will be a major strategic achievement that takes off the table—think of what it does, take off the table. The thought of a nuclear arms race in the Middle East reduces Iran's status as a major power broker in the region. And for the congressman to say that we've never been at war with Iran formally, yeah, but they so let's uh entertain this option that there is dissent in the intelligence community.

**Rebecca Hargraves**

[ 00:18:01 ] Is Donald Listen, I'm sure everybody has seen this clip, but I'm surprised by very little. And I saw this and I found this admission shocking.

**Cameron MacGregor5**

[ 00:18:09 ] Hold on. See, I'm messing it up now.

**Rebecca Hargraves**

[ 00:18:12 ] No, no, it's okay.

**Cameron MacGregor5**

[ 00:18:13 ] Okay, we're going to click it again. Boom.

**SPEAKER\_3**

[ 00:18:21 ] Do you personally think that they were too getting one? Because Tulsi Gabbard. It marks the intelligence. Iran wasn't building a nuclear care what she said. I think they were very close to having Oh, man.

**Rebecca Hargraves**

[ 00:18:34 ] All the intelligence says that Iran is not close to developing a nuclear weapon. I've heard three years out.

**David J. Reilly**

[ 00:18:41 ] Do we have the Tulsi Gabbard clip? Like, do we have a back and forth?

**Rebecca Hargraves**

[ 00:18:45 ] No, but apparently the word on the street is that she's going to resign. But I don't know. I mean, I don't know how she could continue working for him after that. It was such an affront to her position. And for him to say that he's not listening to the intelligence community is shocking. Go ahead.

**Cameron MacGregor5**

[ 00:19:00 ] Here we go. The IC continues to assess that Iran is not building a nuclear weapon, and Supreme Leader Khamenei has not authorized the nuclear weapons program that he suspended in 2003. The IC continues to monitor close.

**David J. Reilly**

[ 00:19:14 ] That's it. Yep. Yeah. Yeah. They continue to monitor and they are not. This comes to us from our friends at DD Geopolitics. Thank you very much. They are, by the way, I got to give them a big shout out. They have all of the most up-to-date stuff. Follow them on Twitter, @DD\_geopolitics. Very good commentary.

**Rebecca Hargraves**

[ 00:19:35 ] So there was an opportunity for de-escalation.

**David J. Reilly**

[ 00:19:39 ] Yeah, it's called negotiations that the Israelis tanked by unilaterally conducting a Pearl Harbor moment on Iran.

**Rebecca Hargraves**

[ 00:19:51 ] Yes.

**David J. Reilly**

[ 00:19:51 ] We were in the middle of diplomatic talks, and they sabotaged it.

**Rebecca Hargraves**

[ 00:19:56 ] Wall Street Journal published this on June 16th at 1 p. m. Eastern time. Because it's behind a paywall, but we can just read the headline. A battered Iran signals it wants to de-escalate hostilities with Israel and negotiate; messages passed by Tehran through intermediaries, seek a return to talks if the U. S. stays out of the fight. So that was the intelligence that we were getting, what, two days ago? And yet, and yet, and other nations are warning. Our warning of Israel's escalation, like the most sane perspective I got, because Western Europe, of course, can't be trusted, came out of Russia.

**Cameron MacGregor5**

[ 00:20:36 ] Right.

**Rebecca Hargraves**

[ 00:20:37 ] We're not getting any Russian funding. I mean, we'll take it. I wanted to read a little bit from this RT article, if you can pull it up. Thanks, Dave. The ongoing intensive attacks by the Israeli side on peaceful nuclear facilities in Iran are illegal from the point of view of international law. They create unacceptable threats to international security and push the world towards nuclear catastrophe, the Russian foreign ministry said in a statement. attack on Iran from most of the international community illustrates the Jewish state is only supported by countries acting as its accomplices. Israel's backers, pressured by International Atomic Energy Agency board to push through last week's biased anti-Iranian resolution, gave West Jerusalem a free hand and led to this tragedy. I almost said, you know what I was trying to say, travesty, tragedy.

**Cameron MacGregor5**

[ 00:21:43 ] I don't care what she said.

**Rebecca Hargraves**

[ 00:21:48 ] Tulsi Gabbard's claims, the Western camp's attempts to manipulate the global nuclear non-proliferation regime and use it to settle political scores are costing the international community dearly and are completely unacceptable. Did anybody else say something like this that was just? So cut and dry, exactly what needed to be said, no more, no less.

**David J. Reilly**

[ 00:22:07 ] Now, here is something that is kind of like breaking or whatever, and I think we're already at the point where I can shoehorn this in. So this comes to us from our friends at DD Geopolitics. Breaking, IAEA and Palantir colluded with Israel to manufacture the war with Iran. Now, if you've been paying attention, we've been talking a lot about Palantir. This is the company co-founded by Peter Thiel. Seed money put in by Jeffrey Epstein. I believe

they just recently, the New York Times ran an article announcing that the Palantir had paid out the Jeffrey Epstein estate, something like 147. Million dollars uh because I guess a return on the investment um Palantir which is uh CEO Alex Carp who is on record bragging about single-handedly stopping the rise of the far right in Europe uh bragging about their AI, lavender which has been used extensively in Gaza to create terrorist, based on whether or not you may have a family member that supports Hamas. And so this is the group that we're talking about. So Palantir. Since 2015, the IAEA has used Palantir's Mosaic platform designed for U. S. military ops to monitor Iran's nuclear program under the JCPOA. Mosaic processed over 400 million data objects, including satellite and social media, enabling 60-plus surprise inspections. But during an AMA, Palantir's Peter Thiel was asked, is Palantir a front for the CIA? Front for Palantir, most likely referencing to their CIA funding and founding. They did get a lot of seed funding from In-Q-Tel, by the way. Even more recently, as recent as last week, Thiel fielded a question about Palantir's use in Gaza, which he said, IAEA Chief Rafael Grossi coordinating directly with Israel. Iran says the IAEA became a conduit for Israeli intelligence, echoing earlier claims from 2018 when Mossad raids uncovered internal IAEA files. The June 2025 IAEA resolution, the first in 20 years, citing 400 kilograms of 60% enriched uranium. Days later, Israel bombed Natanz, Fordow, and Efsahan. Iran accused the IAEA of providing cover for the strikes. Meanwhile, Palantir's CEO held a 2024 board meeting in Tel Aviv in solidarity with Israel. And Thiel's Circle, which pushed for Trump's 2018 JCPOA withdrawal, of a surveillance network blurring the line between arms control and regime change. Iran has now limited IAEA monitoring. Critics, including Russia's Yermakov and analyst Ali Veyaz, warn that Palantir's data could produce false positives from dirty inputs like Israel's 2018 file dump triggering inspections or war based on politicized intelligence. International law is dead. And now we've got these links. Files that were recently published by Iran, Iran, whatever so this is all properly sourced and vetted, it does look like Palantir is firmly in the driver's seat and one of the things that I pointed out a couple weeks ago, Palantir took out a massive ad in the New York Times on October what day was this 18th, 2023, so just a few days after the October 7th issue and uh you know here is Alex Carp in 2024 saying that the U. S. will likely fight a three-front war against Russia, China, and Iran now how is he saying this? Is he saying this perhaps because he is going to instigate the war between the United States, Russia, China, and Iran? Yes. Because that's exactly what it seems like is going on.

**Rebecca Hargraves**

[ 00:26:40 ] Exactly. Yeah.

**David J. Reilly**

[ 00:26:41 ] Sorry. So that was the one story that I didn't put in the outline that I wanted to. That's okay. Hopefully we can pick up. From there. I was like, where is he going with this? Continue the show. Yeah, big stuff.

**Rebecca Hargraves**

[ 00:26:57 ] You know, I've been listening to Judge Knapp all week. Like every time I get a notification, I'm like, well, I can't watch it fast enough. But the theme of his shows this week have largely been that Israel and the West are vastly overestimating the military and our

military capacity and readiness. Can you go to this number four, this Israel rubble? Yes. System failed to intercept Iranian missiles, shattering their sense of security. Look at that.

**Cameron MacGregor7**

[ 00:27:31 ] Wow.

**David J. Reilly**

[ 00:27:38 ] This is Tel Aviv.

**SPEAKER\_3**

[ 00:27:41 ] I don't know.

**Cameron MacGregor5**

[ 00:27:59 ] Good lord.

**David J. Reilly**

[ 00:28:05 ] There will be a price and it underscores why we acted now. Before it became too late, Israel's air defenses are strong enough to intercept the vast majority of missiles. But any sense of total safety has been shattered for the Israelis.

**Rebecca Hargraves**

[ 00:28:19 ] Man, it's not so easy when it's not just women and children. Now is it?

**David J. Reilly**

[ 00:28:24 ] Right. Very scary for children, for boys.

**Rebecca Hargraves**

[ 00:28:29 ] Alright, we're good on that.

**David J. Reilly**

[ 00:28:30 ] Alright.

**Rebecca Hargraves**

[ 00:28:32 ] I know a lot of people are saying, especially Khan Inc., that this is about nuclear weapons. This is not about nuclear weapons. We all know that Iran, although we're going to have a little discussion about this, but I think that it's nearly impossible that Iran has nukes. There's no evidence that they have nukes. And we've been hearing about this. For so long, how many times have we heard over our lifetimes that Iran is on the precipice of readiness with their nuclear arsenal? I've heard it my entire life. Do we have the clip?

**David J. Reilly**

[ 00:29:01 ] I mean, there were several sheets that were produced over the past week, citing every single moment. The very first time.

**Rebecca Hargraves**

[ 00:29:09 ] We do have a clip.

**David J. Reilly**

[ 00:29:10 ] Oh, do we? Five. Should I go to it? Yeah, sure. Oh, well, I guess there we go. Never mind. Let's take a look.

**Cameron MacGregor2**

[ 00:29:19 ] Intelligence today put out a report to one of the American networks saying there was no evidence at all to suggest that Iran was on the verge of creating a nuclear bomb. Now, if that is the case, then this is an unavoidable and unnecessary war, isn't it?

**SPEAKER\_2**

[ 00:29:39 ] Quite the contrary. We're not going to wait for a bomb to fall and then begin pontificating what we should have done. Here are the facts. The facts are that Iran has already accumulated enough highly enriched uranium for 10 nuclear warheads at 60 percent grade. You don't do that for anything but military uses. We also know that they've made considerable strides on the weaponization of this. We also know that they've attacked Israel twice over the past year with hundreds of ballistic missiles. And we know that their leader, just a couple of weeks ago, said that his goal is to remove the tumor called the State of Israel. So what more evidence does one need to understand that these guys are way ahead in creating these nuclear weapons?

**Cameron MacGregor2**

[ 00:30:36 ] Some Western governments and many Western publics are very uneasy about what Israel is doing right now with Iran; that they see the level of brutality and destruction after the Hamas massacre on October the 7th in Gaza. And only today, 59 Palestinians at least killed by the IDF while trying to get hold of food. This is the kind of behavior by the Israeli army that makes people very uneasy about what you're doing right now in Iran.

**SPEAKER\_2**

[ 00:31:09 ] The cases and we investigate it, we're a democracy; this is bad. No one wants to die. I was a fighter; I hate fighting. No one wants our soldiers to die. No one wants civilians to die. Listen, if we wanted to kill civilians, if we wanted genocide, we wouldn't have dying soldiers every day in Gaza. We'd have two million Palestinians dead. The fact is that we're working in a pinpointed way. But here's the fundamental fact that you're not willing to hear, and it's that the of the Hamas strategy is to wrap itself with civilians around it. All right.

**Rebecca Hargraves**

[ 00:31:45 ] That is actually not the clip that I intended to play. The Iran nuclear fear monger is number six. Well, I apologize.

**David J. Reilly**

[ 00:31:52 ] I have to react to this. Have we all seen? Well, so first of all, OK, I got to get

straight here. They act in a targeted way. Have we not all seen the photos of Gaza turned into rubble with not a stone on a stone? It's dust; it's heaps of dust.

**Rebecca Hargraves**

[ 00:32:13 ] Yesterday they killed 56 people just trying to get a sack of flour.

**David J. Reilly**

[ 00:32:17 ] And then have you seen the targeted strike Tehran? Right? I'm sure it'll come up. Please show it to me. Please give me what I'm looking for. X. Give it to me. No. Okay, maybe not. But there were these, ah, here it is, here it is. This is in Tehran. This is one of the strikes. Okay, that is a targeted strike. They took out one floor of a building. One floor, one side of the building. What we're seeing in Gaza is not targeted. It is everything indiscriminately. Videos circulating for 20 or more years showing IDF soldiers shooting little kids in the back, shooting and vaporizing mothers holding their grandmothers. Yeah. Waving white flags. Oh, yeah. There was a video of a guy who had surrendered. I think they were under a bridge and they started mocking him. They asked him to leave. And as he turned around to leave, they shot him in the back. Yeah. So what a lie. What a lie. Tali Bennett is a liar. sack of shit, let's play Six and get back on track, sorry about that, guys. Then, let's we'll we'll get back on track. Let's get back on but as we were saying, yeah, my serenity levels are down to a three or four. Okay, let's pull this up.

**Rebecca Hargraves**

[ 00:33:45 ] We can watch this.

**Cameron MacGregor6**

[ 00:33:47 ] Boom. The Israelis arrive on the scene, and the whole place is burning. But this is nothing new. I think, Aghi, they've been saying that this is all about Iran acquiring a nuclear weapon, right?

**SPEAKER\_8**

[ 00:33:58 ] Almost every year, the Western media comes out with headlines saying that Iran is about to have a nuclear bomb in 1992, in 2003, in 2009, in 2010, 2011, 2021, 2024, 2025. Iran is about to have a nuclear weapon made like tomorrow. So, yeah.

**Rebecca Hargraves**

[ 00:34:19 ] This is just so ridiculous. It's almost as if they cry out when they strike you. Look at these documents.

**David J. Reilly**

[ 00:34:25 ] Here's the list. But the very first time was actually from Netanyahu and his little gang of thugs in the Likud party. The very first time they ever made the claim that Iran was going to nuclearize was actually 1984. Good Lord. About this particular issue.

**Rebecca Hargraves**

[ 00:34:52 ] So for those of us who think that Israel is our ally, look at these documents from Iran after they hacked Israel. USA on the list. This is the Samson option list. USA on the list to be nuked.

**David J. Reilly**

[ 00:35:05 ] Oh, dear God. I think I saw this. Yeah, here it is. Look at this.

**Rebecca Hargraves**

[ 00:35:11 ] And I think it's the third screenshot. That's the original.

**David J. Reilly**

[ 00:35:14 ] This is translated.

**Rebecca Hargraves**

[ 00:35:16 ] Global deference attacks. Let's see.

**David J. Reilly**

[ 00:35:19 ] Attacks. Washington, New York, Los Angeles, NORAD. With Jericho three missiles, that is unbelievable.

**Rebecca Hargraves**

[ 00:35:30 ] Okay, so that was a lot to chew on. Cameron, what do you think about Iran, the realistic chance that Iran actually does have nuclear readiness to the extent that neocons are saying they do?

**Cameron MacGregor**

[ 00:35:46 ] Well, I mean, they've all but said that Iran has a nuke or is a few weeks away. It's hard to tell. What I think is important for everybody to understand, so there was a paper that was written, I think in 2009, it's called Which Path to Persia? Options for a New American Strategy Toward Iran. Maybe you can bring it up on the screen, Dave. Which Path to Persia? And this was a paper that came out of the Brookings Institute. Tanks, nonprofits that basically are part of the war machine inside Washington, D.C. And this policy paper laid out the case for how a war with Iran could be brought on and how we could essentially leverage some kind of a manufactured event between the state of Israel and Iran to actually pull it off. However, even though that paper was hawkish towards Iran and was sort of fueling the fire today. Listen to this statement that comes from that document, which is advocating more or less for a war between the United States and Iran. Nuclear weapons lack the delivery systems to threaten the United States directly. Further, its economy is anemic and even if substantially reformed will probably never provide the base for Iran to make itself a challenger to the United States on par with Nazi Germany, Imperial Japan, the Soviet Union or Communist China. That is a pretty declarative statement from a hawkish policy paper, more or less laying the case out for war with Iran. So the first thing that everybody needs to understand is that Iran in no way, shape or form poses a threat to the United States. There is absolutely no reason in our national interest as Americans that we should be engaged in this conflict

whatsoever, passively, actively, directly, indirectly or otherwise. You must understand, because if you're driving your truck in the middle of Idaho or you're working in some kind of a grocery store stocking food or what have you, what Iran does has virtually nothing to do with the United States. So why is the president of the United States demanding in all caps on Twitter and sending carrier strike groups to the Middle East as we speak in preparation for what looks to be a major war between the United States, Iran, and God knows who else. The reason is because we don't have a deep state. We have a Jewish state. And this has been the case for a long, long time. The Netanyahu Likudites finally, after decades and decades, as Dave talked about a moment ago, have entrenched themselves in the entire political economic apparatus of the United States government, the whole thing. And just to be very clear with you, because we started this discussion today talking not about people that are in AIPAC, not these sort of neocon advocates that are at some think tank like the Institute for the Study of War, nothing of the sort. These are servicemen that are supposed to represent the United States and its interests. Our National Security Advisor or CENTCOM commanders, what have you, all of whom are basically in collusion with a foreign power. Now, that's basically three. There are three components here. There's the elected government. The elected government, I think, is almost uniform in support of some kind of a war against Iran. It doesn't matter whether you're talking about Ted Cruz or Lindsey Graham or any number of the Democrats. The entire Democratic Party, the entire Republican Party is committed to this war. They say publicly, what they say on Twitter, what they do when Netanyahu comes to the United States, with what Americans think: over 90 percent of the public thinks this is a bad idea. It's probably higher than that. That tells you that your elected government no longer represents you and there's nothing you can do about it. That's the first piece. The second piece is that you have a military industrial complex and you have a sort of national security intelligence apparatus that's completely rotten to the core. It doesn't matter whether you're talking about the CIA, the NSA, you're talking about DOD, which has its own intelligence. As Rebecca said at the outset, only one person in Trump's administration with any real force opposes this. And that's Tulsi Gabbard as the director of national intelligence. And we saw what the president had to say about that. The third and connective tissue here is AIPAC, the American Israeli Political Action Committee. It ensures that they get the generals that they want in DOD. It ensures that they get the bureaucrats running the government apparatus. It ensures that the politicians on the Hill who were elected, conform to whatever they want. That is why now, after decades and decades of this slow insinuation, Netanyahu finally got his war, because there was simply nobody left outside of Thomas Massie and a handful of others to say no, even though the American people, even though all of you listening to this, absolutely stridently oppose any escalation in the Middle East from the forever wars. So the first component here is that this has nothing to do with the United States, and it demonstrates the complete subversion of the U. S. government. Now, to your question about nuclear weapons and so forth. This is not a war about nuclear weapons at all. This is a war that is reminiscent, I think it's in lockstep, with exactly what happened in Iraq. And if you go back to 2003, in the lead up to that war, the very same arguments were made by the very same people, that Saddam Hussein had weapons of mass destruction, that he posed a threat to Israel, which he never did, and that the United States desperately needed to interdict and regime change. Well, we did. And what was the result of that? We destroyed the country of

Iraq, which is much smaller, by the way, than the country of Iran. It's like about 30 million people in a largely flat territory in which we had, at least at that stage, a lot more support in the region than we did, population against us. We turned over half of that country to Iranian militias, and then we spread that instability across the region in Libya, Syria. Basically, what we did is we terrorized an entire region. Now, fast forward to today, if the goal is regime change in a country the size of Western Europe, with a population that's almost 100 million people that has been preparing for this for decades, because as Dave said a moment ago, they've been threatened for decades. Now we have a war, a war in which a major power backed by great powers is prepared to do us serious harm. And that's exactly what's going to happen. Will there be a nuclear exchange? What exactly do the Iranians have? I'm sad to say I don't think it matters at this stage. Pakistan already said, I think over the weekend, that they would provide the Iranians with the nuclear support that they needed. Iran's cause, because the rest of the world believes now that the United States is a warmongering power, and there's only one way to deal with that, and that is escalation. Now, one other thing I want to say just briefly is that it appears, and I'm not 100% sure on this, but it appears as though in order to make this operation happen, an operation that was almost certainly planned 12 months in advance by all the intelligence agencies in the was complicit in this deception, that he lulled Iran into a trap, that he maintained the pretense that he wanted peace talks, that he effectively meandered or walked Iran into lowering its defenses so that Israel could attack it. I say that all to say this. We now have a war, and I don't see how this de-escalates.

**David J. Reilly**

[ 00:45:03 ] I do have a short clip.

**Rebecca Hargraves**

[ 00:45:05 ] Do I have to see Jonathan Pollack's gross cue?

**David J. Reilly**

[ 00:45:10 ] Burn everyone's retinas with Jonathan Pollard's greasy face. His face would not be nearly as greasy if he used soap from Idaho Towel Company. Look at you. He could take a shower with some of this nice lavender soap. And he would not only look nice, but smell nice. But in fact, he is a greasy Jew and does not go to IdahoTowel.com to get clean. But there are a lot of people out there. And we saw this in the Ted Cruz interview. We'll talk about that later. This isn't about regime change. This isn't about regime change. This is about preventing Iran from getting nukes. Bullshit. And we can go straight to the source, the most notorious spy on the American intelligence infrastructure in the past 30 years, Jonathan Pollard, released a podcast yesterday stating exactly that. Let's take a quick listen. Ah, here we go.

**Cameron MacGregor5**

[ 00:46:14 ] Two major objectives. That we absolutely must succeed in realizing. Before the guns fall silent. Number one: most eliminate, one way or the other, the current regime in Tehran. And we can do this either kinetically, or we can stimulate, induce, if you will, a popular uprising.

### David J. Reilly

[ 00:46:51 ] So anyway, right there, boom, out the gate. We need to regime change Iran one way or another, kinetically or through a popular uprising that they orchestrate. The goal is regime change. It has nothing to do with news.

### Cameron MacGregor

[ 00:47:21 ] Israel. Who's the dangerous nuclear power in this conflict? Is it Iran? No, it's Israel. Israel's nuclear program goes back to 1952. 1952, when they founded the Israel Atomic Energy Commission. That is five years before the IAEA, the International Atomic Energy Agency, was founded in 1957. Five years. Four years after Israel becomes a state, it sprints to becoming a nuclear power. But there's more. In 1967, Israel refused to sign the Non-Proliferation Treaty. The Non-Proliferation Treaty, for those of you who do not know, was a treaty created by powers that already had nuclear weapons. In this case, members of the UN Security Council, China, Russia, the United States, Great Britain, and France, to prevent the spread of nuclear weapons beyond that. Guess what? Iran has signed the NPT. Israel never has. Don't exactly know how many nuclear weapons that the Israelis have. Why? Because they've never let inspectors from the IAEA in. What we do gather, based on our own intelligence, is that Israel has a nuclear triad. That means it can launch nukes from ships, it can launch nukes from land, and it can launch nukes from the air. How many do they have? Well, it's estimated that they've got 90, but that they can produce hundreds if they need to. Plutonium. They have also threatened to use nuclear weapons before. They threatened during the Yom Kippur War and the Six-Day War. So the delineation here is extremely important. Now, a couple other things that are very important to note. Is Israel underneath the United States' nuclear umbrella? No, they're not. NATO members are under the nuclear umbrella and Japan and South Korea. Why? Because those powers don't have nuclear weapons. Israel has nuclear weapons. We're not obligated to defend them. In addition to that, there is no formal alliance that obligates the United States to do anything on behalf of the state of Israel. Do you see where I'm going with this? I'm speaking to an audience that cannot speak back. We have been had. We have been subverted. There is nothing in our governmental structure, our constitution, the international community, our international treaties in general, that involves us in anything that Israel does. We have been subverted by a Jewish elite that has gotten control of the entire Congress, the government, and as I said, the military industrial complex and the national security apparatus. This is how dangerous the situation is. That's why electing a president would never make a damn bit of a difference. Because even if he stood strong and stood firmly, which I truly believe he tried to do in his first term, it's over. He's surrounded by an echo chamber across the Potomac River, saturated with people who all are on the payroll for AIPAC one way or another. That's why we're going to war.

### David J. Reilly

[ 00:50:34 ] Ah, but Cameron, our audience can talk back. The super chat at [backlash.net/slash/super-chat](#).

### Rebecca Hargraves

[ 00:50:44 ] And we will read each and every one of your super chats.

### David J. Reilly

[ 00:50:48 ] One of the things that I also wanted to add Cam is not only do the Israelis have a vast nuclear weapons program, not only do they have the Samson option, which is basically taking out every country around them. If they deem that they are going to fall and no longer, you know, be a country, around the mountain, including the United States, Russia, Europe, the whole nine yards. Where did they get the nuclear material? Where did the nukes come from? Well, they came from the United States of America, from Pennsylvania, actually, in something called the Apollo Affair, which occurred in 1965 when a U.S. company called NUMEC helped smuggle these materials to Israel. And who was it that was smuggling these materials and the nuclear triggers? It was none other than Hollywood producer Arnon Milchan. What? The guy behind the popular movie JFK and Fight Club. Is this true, Cameron? This is true. This is from France. This is true. How did I not know this? You didn't know this? No. of the most propagandized people in the whole world, next to maybe even like North Korea. We might be worse than North Korea, actually, when it comes to being propagandized. But we've got Hollywood producers that are making movies about how bad all of these Nazis are and how bad the Islamofascists are. But we don't have movies about the Apollo affair. We don't have movies about how Israel got their nukes. Because they don't want us to know. Because if the American people did know, they would be fucking pissed.

### Cameron MacGregor

[ 00:52:46 ] So I think that's a good point, Dave. And I look, I think they're about to find out. Listen, there are a number of people that forecast some very ominous things with this second Trump administration. Among those people are the folks on this program as we speak. In fact, when Rebecca and Vince reached out to me about doing a show very early on, the consensus among all of us and Dave included was that this second Trump administration would be a total disaster, that effectively Donald Trump had become assimilated by the system. Now, why is it that we felt that way? Well, as we've discussed before, this re-election was different in kind. It was fundamentally different from his election in 2016. We didn't have the Antifa riots. Did he secure the votes as decisively as he did? How was he able to raise the capital that he got to win as decisively as he did? Well, we know the answer to that. The lobby, led by people like Mary Maddison, sunk their claws into a president that purportedly represented the rest of the American population. So we knew that this was going to happen. However, another reason we came together is because as bad as this is, we all concluded This would sufficiently wake up the population. And that's what's beginning to happen. There is a kind of conflict now, a bifurcation between the diehard Trumpers and MAGA and America First. That sort of friction before. And I think that tension existed as soon as he started doing stupid things. That's now breaking fundamentally. And the base of support behind him, I think, is extremely fragile. So if this goes off the rails, I think the blowback is going to be severe. But it won't just be blowback on Donald Trump. Because as I said earlier, this isn't about Donald Trump. It really isn't. As inept and incompetent as I think the man is, this is about a government that has been captured, has been subverted. These problems. And I think that process is underway.

**Rebecca Hargraves**

[ 00:55:20 ] I think the final nail in the coffin with the party totally splitting apart, as trivial as it sounds, was Trump saying outright that Tucker Carlson is a kook. He's kind of kooky. Which, you know, I think he's something of a CIA operative. I don't particularly trust Tucker Carlson, but, you know, he has done a lot. He has done a lot for Trump. Trump doesn't really seem to have any loyalty. But like you said, this isn't about Trump. And I want to talk a little bit about the history of this while I do trust the audience, I thought that some people would not know this. All right. So you dug up this excellent clip. This has been, I don't want to say written in the stars because this is a man-made phenomenon, what we're seeing right now. But 50 years ago, the Shah of Iran said this and he was just spot on. We can watch this whole thing. Take a listen.

**David J. Reilly**

[ 00:56:07 ] Oh, wait, hold on. We don't have any big sugar daddy backers here. We do this on our own. Let's go.

**Cameron MacGregor8**

[ 00:56:16 ] Not entirely, but I think even a little too much, even for Israel interests.

**SPEAKER\_22**

[ 00:56:22 ] You think the Jewish lobby in the United States is too powerful for the interests of Israel?

**Cameron MacGregor8**

[ 00:56:27 ] I think so. Sometimes they are deserving the interests of Israel. Explain. They're pushing around too many people. How do you mean pushing around? Well, pressuring, they have many means at their disposal. They are putting up pressure on many, many people. And at the end, I don't think that it will even help Israel.

**SPEAKER\_22**

[ 00:56:50 ] Why, if this is true, why would the President of the United States pay attention to that lobby?

**Cameron MacGregor8**

[ 00:56:56 ] They are strong. Strong in what sense? We are controlling many things.

**SPEAKER\_22**

[ 00:57:02 ] Controlling what?

**Cameron MacGregor8**

[ 00:57:05 ] Newspapers? Medias. Say banks. Your Majesty. Banks. Finances. And I'm going to stop there.

## **SPEAKER\_22**

[ 00:57:20 ] Well, now, wait just a second. You really do believe that the Jewish community in the United States is that powerful.

## **Rebecca Hargraves**

[ 00:57:28 ] Wow, what a crazy, what a kooky thing for him to say.

## **Cameron MacGregor**

[ 00:57:33 ] It's only like people have been saying this for-Let's just talk for a moment about the most important thing that he said, because not only was he incisive, but he was also prescient. And that is to say that the Shah predicted that this would boomerang, that ultimately the lobby would push too far. Bounce back in a negative way, if not a self-destructive way, in Israel. Ladies and gentlemen, that is exactly what's about to happen. I made a video about this on my channel. You can watch it there for more detail. But look, the bottom line is: the cliff notes is that Israel is a tiny puny power. It is extremely divided internally. Yes, I think a majority of Israelis supported these strikes. As crazy as they are, I think a majority did support that. Massive dissension among the ranks in Israel. They've had to police the border of the Israeli state to prevent people from leaving, from fleeing the country, because I think there's a growing sense of doom. Now, in addition to being a small, hopelessly divided country, they have absolutely no chance militarily of prevailing against Iran. Now, they thought, and this sort of attack, this surprise attack that they launched with our assistance was, I think, of the Light Brigade during the Crimean war. It is a military blunder of blunders. Now, why do I say that? It's not as if Israel is monolithically focused on what's happening with Iran. They are engaged in multiple fronts. They're fighting a war against Hamas in Gaza. Hamas has not been defeated; it's still there. They're also expanding settlements in the West Bank, where the second or the largest population, I think, of Palestinians in Israel lives. They are engaged in a war against Hezbollah. Hezbollah has not been defeated, and the Israeli forces were forced out of Lebanon. Why? Well, I've heard because they took a lot of casualties. At the same time, they're fighting with the Houthis. Now, in addition to that, there's 150,000 Egyptian troops that are in Sinai, which is a violation of the Camp David Accords, meaning they're in the neutral zone, and they shouldn't be, with 150,000 troops that the Israelis are in no position to stop. They succumbed to their paranoia. Their demons finally got the best of them. As we've established on this program, Iran does not have a nuclear weapon. They had no intention of acquiring a nuclear weapon. And even if they did, what were they going to do against Israel, a country of 90 nuclear warheads that could be targeted on them at any moment? This entire fiasco is paranoid delusion. And they finally succumbed to it. And we have too. Will mean the destruction, I think, of Israel now I don't think that's going to happen right away, I think this is going to happen over months or years but that state is finished; it cannot prevail in this war.

## **David J. Reilly**

[ 01:00:38 ] Yeah, you know, there was also some interesting strikes that hit Israel the other day that we were kind of talking about offline a little bit. But one of the missiles that Iran got through was to the port of Haifa, which is responsible for 60 percent of its fuel refinery and

distribution. So if they I know that they hit the power plant in Haifa, we are still in fog of war; we're unsure of the extent of the damage. That's right. That's right, Dave.

### **Cameron MacGregor**

[ 01:01:34 ] That's right. I never saw combat; I was never in a war, but I have been in the operational Navy and I have sailed through the Straits of Hormuz. I've been all over the Gulf, whether that was the North Arabian Gulf, the Central Arabian Gulf or the South Arabian Gulf. I've also been in the Red Sea. Warfare is not surgical. It's not precise. It's not about assassinations and sabotage. Of Superman portrayal of the IDF and Massad as these unbeatable entities, this is a real war they're not fighting against Hamas in Gaza and bombing them from the air unopposed, they're fighting a major power in the world that as I said is backed by great powers. It has thousands upon thousands of missiles and almost certainly their Iron Dome will fail. Now, in warfare, the first thing that happens is that your initial lines of defense fail. Your communication systems, they fail. Your weapon systems, they fail. The test comes when you can rebuild them, when you can retrench, when you have the industry to sort of surge new munitions. Israel doesn't have that. They're reliant solely upon us, and our industrial capacity is extremely limited, never mind the dilapidated state, the overextended nature of our own forces too. In other words, what I'm trying to communicate to all of you is that you're going to hear a lot of things on Twitter. That are going to unnerve you, that claims made by the president himself about controlling airspace and all the rest of it. Look, if any of that were even remotely true, we would not be sending another carrier strike group to the Middle East. We would not be involved because we wouldn't be needed. We are needed because Israel cannot prevail in this. And I've got news for everybody out there. If Trump does this, if he jumps on this grenade full throttle, we're going to lose sailors across that region and be helpless under a hellfire of cruise missiles and hypersonic missiles that Iran has deep underground that they could fire for days on days on days on end. They have exercised for strength so far, but they can only be pushed but so far before this becomes about survival and nothing else. Trump does not appear to understand that. I foresee disaster.

### **David J. Reilly**

[ 01:04:08 ] Our outline, which I didn't read, of course. But we are seeing some pretty incredible videos coming out of Tehran. Because are we going to get into the Mossad operations in Iran? Well, I don't want to spoil it. But so there was the first initial strike from Israel against Iran that hit the nuclear enrichment facility, I believe in Natanz, right? This was the Pearl Harbor moment. A lot of bombs going off, car bombs, explosions happening all over the country. A lot of this stuff is not coming from like Israeli rockets, but they are actually coming from Mossad operations within the country from cells and units that have been deeply embedded in Iran for years planning this. And what's happening is the Iranians are getting very wise to this very quickly. Like arresting Mossad agents on the highway. Check this out. This was just released seven hours ago. You can see they've got like an AK-47 out the window. We have audio. That is a Mossad agent fleeing. Good lord.

### **Rebecca Hargraves**

[ 01:05:30 ] And they got him. You say Mossad and people act like you are so deep in conspiracy theories that you don't know what's going on. But Mossad agents are deeply embedded in basically every foreign government. Look at what they were able to do with the pagers in Hamas. Oh, yeah. Look what they were able to do with 9/11. Yes.

**David J. Reilly**

[ 01:05:49 ] Hello. What do you think Urban Moving Systems was up to?

**Rebecca Hargraves**

[ 01:05:52 ] They're highly competent and they're good at what they do, and they infiltrate these groups. And we have to wonder, I mean, we have to wonder why. I think a lot of Americans are looking at this as though we're conspiratorial, and they're saying, 'Like, why would they do this? Why would individual Jews do this? Why would it happen?' So I asked you guys if you think that our audience is familiar with the Clean Break memo. And I think that you guys probably are. But I did want to read from this a little bit because it does give a broader picture of the great incentive that they have to behave in the way that they do. think tank, drafted a policy paper entitled A Clean Break, a new strategy for securing the realm, commonly known as the policy of clean break. It was prepared for Benjamin Netanyahu, an advocated aggressive approach to solve Israel's security problems in the Middle East. The policy recommendation was to pursue violent strategy and change regimes unfriendly to Israel. The document, in the light of Israeli security architecture, emphasized three fundamental objectives. One, working jointly with Jordan and Turkey to contain, destabilize, and roll back entities to all three, i. e., Israel, Turkey, and Jordan. B, changing the nature of relations with the Palestinians, particularly reserving the right of hot pursuit anywhere within the Palestinian territory for self-defense, as well as attempting to promote alternatives. Yasser Arafat died in 2004. There is conjectural assessment that he was poisoned to death. And C, stressing self-reliance in a new strategic cooperation with the United States. The policy of clean break under the policy objectives mentioned 34 actionable goals to achieve these objectives. Among these objectives. And this is important. The most important was to contain, destabilize, and roll back regional challengers. You may have heard Nick Fuentes say earlier this week that the only way that Israel sees that they can be safe is to destroy everybody around them, and I think that that's totally true. They had five actionable goals, challenging Arab countries as police states lacking in legitimacy, fortifying regional alliances, working with Turkey and Jordan to insert hostile Arab tribes into Syria; yes, military action in Iraq, Syria, Iran, Lebanon for containment, striking selected military targets in Syria without the U. S. support and physical involvement. Actionable goals were not achievable. So Israel brought in the United States in the implementation of the policy of the clean break. And they did that in a subversive way and above board, which is why we're seeing so much outright support; The U.S. Administration in Washington does not survive in the office without the support of American-Israeli Public Affairs Committee, the most powerful Zionist lobby in the United States. A clean break towards 2000. The United States made the plan for seven wars to destabilize and roll back countries, having the potential to challenge Israel. It was the brainchild of Netanyahu. The United States had the good military force to do the job. Going by the Israelis' playbook to remake the Middle East aligned with

the clean break strategy, the United States made the plan to take out regimes in seven countries, one after the other. It started with Iraq, then Syria, Lebanon, Libya, Somalia, Sudan, finishing off with Iran. Netanyahu has so far been successful to engage in six wars. The seventh war with Iran is looming large.

**David J. Reilly**

[ 01:09:12 ] Obviously. I mean, it's here. This article was written on the 12th of January, 2025, comes to us from newagebd. net.

**Rebecca Hargraves**

[ 01:09:22 ] And people might wonder, why would they not just do a ground invasion?

**David J. Reilly**

[ 01:09:27 ] Oh, wow.

**Rebecca Hargraves**

[ 01:09:28 ] And the reason for this, one of the reasons for regime change, there are a multitude of reasons, is that it is not so straightforward. Virtually impossible to invade on land.

**SPEAKER\_6**

[ 01:09:40 ] Invading Iran by land? Almost impossible. And here's why. To the west, the Zagros Mountains. A rocky wall with narrow passes. Easy to defend. Hard to attack. To the north, the Elburz Mountains. Rising like a shield beside the Caspian Sea. To the east, more rugged mountains near Afghanistan and Pakistan. Still no easy entry. And in the middle, two deadly deserts. Dasht-i Kavir and Dasht-i Lut. Scorching heat. Salt flats. Sand that swallows tanks. Mountains. Deserts. Bottlenecks.

**David J. Reilly**

[ 01:10:15 ] Oh, man. And not only that, but I was. Speaking with somebody in the Taliban yesterday. Okay. Actually, on a Twitter space. Big shout out to Zaganel and DDG Sarah for hosting. The Taliban.

**Rebecca Hargraves**

[ 01:10:31 ] Big shout out to love Taliban.

**David J. Reilly**

[ 01:10:33 ] Big shout out to the Taliban. But they have the official posture of Afghanistan is pro-Iran. And from what I understand, Cam, you might be able to correct me if I'm wrong, so pro-Iran. So it's not only defended by the mountains in the east, but you've also got two friendly neighbors next to them. So that would and Pakistan has the bomb. They have nukes. So not exactly as straightforward as, you know, barreling through Iraq or something like that, as if that was straightforward.

### **Cameron MacGregor**

[ 01:11:10 ] But OK, you're right, Dave. And, you know, it's worse than that. I mean, this this whole thing is just Kafkaesque. It is just a total disaster because everything that Rebecca just read happened. We destabilized and regime changed in Syria. We did the same thing in Iraq. We destroyed Libya. That has not won us friends and allies in the region. OK, it's also radicalized populations against us. In addition to that, we're supporting genocide in Gaza. Alright. What that's doing is that's creating a war between Israel. The House of Islam, and the House of Islam is what two billion Muslims on this planet, a billion of whom I think live in the Middle East. You have to understand that this is a region that's already very fragile, in which there are bombshells everywhere that could go off at any time. And what I mean specifically by that is if you take Egypt, for example, Egypt is run by a general military regime. They're under tremendous pressure to do something about what's happening in Gaza. And if they don't, that regime could fall. The same thing is happening in Jordan. There's also pressure on the Saudi regime to do the same thing. And the Gulf Coast countries are in the same position. In other words, the whole region is on the cusp of coming down hard on Israel and the confederated governments that have been bribed or extorted to support it. In other words, guys, is a paradigm shift in the Middle East. Now, in addition to that, you've got a war in Eastern Europe, a war between Russia and the United States by proxy in Ukraine. That war hasn't come to an end. And that hasn't exactly endeared us to the Russians either, who just signed some kind of an agreement with Iran on that side of the world, right, on the sort of Eurasian side. Then we can consider the Chinese. To the Middle East is a guy named Eldridge Colby. Eldridge Colby, who I think is the Undersecretary for Policy in the Defense Department, he doesn't oppose sending more forces to the Middle East because he wants to de-escalate against Iran. No, no, no. He wants to keep our military forces in East Asia to fight the real enemy, China. So, China hasn't exactly been endeared to our side either. In other words, if we do this, if we commit forces to Iran, it's not just that we're going to get bogged down strategically. Because of landscape, because of the strategic overview of the region itself, but because of the entire world, the global south, the global majority, who, by the way, has all the industry, the rare earths, the supply chains, the trade relationships and alternative payment gateways such that they could obviate, if not completely isolate the United States and the Zionist-dominated countries in Western Europe. A serious, serious situation that nobody in Washington D.C. appears to understand because of this subversion it's very scary, oh true by the way I need to point out I do need to point this out that we are currently beating Elijah Schaefer and Stefan Molyneux and Myron in the live stream game.

### **David J. Reilly**

[ 01:14:36 ] Don't.

### **Rebecca Hargraves**

[ 01:14:36 ] I will puke. We do have 13,000 live viewers.

### **David J. Reilly**

[ 01:14:40 ] 13,000 live viewers. Let's go. So please, if you are new to The Backlash, please follow us on X, on Rumble, on YouTube. We are a new growing podcast. And we are all

homegrown, homefunded right here in North Idaho. We're not homefunded. We are not funded at all. We don't have anybody telling us what to say.

### **Rebecca Hargraves**

[ 01:15:04 ] I'm not even monetized on YouTube if you're watching me on YouTube. So please go to thebacklash. net/superchat. All of those come through our website. We will read all of them. And we will read every single one.

### **David J. Reilly**

[ 01:15:14 ] And please follow our YouTube channel at Real Backlash on YouTube, Backlash Podcast on Rumble, and be sure to check out our website, thebacklash. net. Sorry, that is just a brief aside, a little humble brag. That this ragtag little show from North Idaho, I think is actually having some level of impact in global affairs, or at least in American discourse.

### **Rebecca Hargraves**

[ 01:15:43 ] No, that's delusional. I'm totally delusional. We are making people feel like they're less alone. And I think that that counts for something. So let's go back to this. I think that the purpose really is regime change. For those of you that watch Judge Knapp, Alistair Crook is a British diplomat. He's just the best. I love him so much. So he went on Judge Nap a few days ago, I think two days ago, to explain why regime change was Trump and his team's goal. Let's watch 9 to 537, please.

### **Cameron MacGregor4**

[ 01:16:12 ] It was actually going to collapse the regime. And so they thought, and clearly Trump was in this and his team was in it because we know that this was a year in preparation. So, obviously being talked about, we know it's a year in preparation because the Israelis say it was a year in preparation, and the security force they say it was a year in preparation, therefore it was fully coordinated. And the other part of it, of course, which shows what's going on, um, was that the other part of it was a, um, they brought in to Iran, um, various drones, um, broken up in trucks, wooden trucks, and we're going to play the same if you like playbook that they did with Russia against the strategic bombers in Russia, the acts of vans or from roofs that opened controlled remotely, and these would attack the self-defense system, the air defenses of Iran.

### **Rebecca Hargraves**

[ 01:17:25 ] I think that he also goes on to explain that Donald Trump thinks Iran is weak and why they believed that Iran was ripe for regime change. This one is to 14-01.

### **Cameron MacGregor4**

[ 01:17:41 ] And I think that this whole exercise was based on the conviction of Trump and Netanyahu together, thinking that Iran is weak. That it is ripe for a regime change, that a big sudden shock of the decapitation of losing its air defenses was going to bring about a big popular uprising and antagonism against Iran. Well, that hasn't happened. In fact, if anything, it's the opposite. There's extreme anger in Iran. There are demonstrations in Iran, but they're

all demonstrations against the United States and Israel. And the country has coalesced around the leadership, and the leadership.

### **Rebecca Hargraves**

[ 01:18:35 ] And I think that seems fairly obvious even to laymen like us that that was going to be the response from Iran.

### **David J. Reilly**

[ 01:18:42 ] I actually have a video of those demonstrations saved in my bookmarks that I think can access fairly easily. Here it is. That's not exactly what is violence? Yeah, not exactly having the intended effect on the Iranians. These strikes are bringing the country together, together, of course. And there is something to be said, too, because there is a large Iranian diaspora throughout the world, and we're seeing them actively, like, memeing, what is his name, Reza Pahlavi, right? Yeah. Ugh. And I'm sorry, Jonathan Pollard. I'm sorry, Netanyahu. But taking out their water and their gas and bombing them is not going to make them turn against the Ayatollahs. It's going to bring them together against their existential enemy, Israel. What do you think? Like, I don't understand the thought process. It's the hubris of the Jewish mind.

### **Cameron MacGregor**

[ 01:20:29 ] Chutzpah, I believe it's called. Well, look. No, this is the most important point that I think we're going to talk about tonight, because this is a motif that we've elucidated the last, I think, eight months of the show. And that is that nations, that peoples, that ethnos are not social constructs. They're not artificial. They're not manufactured, which is the Jewish lie. That's what you hear at Harvard University. kinds of things that you hear. Iran is not just a country. It's a civilization. It's a metaphysical reality. When you meet people, I know many Persians that live all over the world, whether they're in LA, there's a large Persian population that lives in Los Angeles or in DC. Persia is not just this weird territory with a distinct flag. No, this is a part of their identity, and identity is a transcendent phenomenon. It cannot be propagandized. By the way, this is exactly what you're seeing unfold in the streets of L. A., which is what we talked about last week. The United States is not a pluralistic society, a nation of amorphous immigrants. People who speak English and celebrate Christian values. And when those things are challenged, when those building blocks start to crumble, the society doesn't crumble. The society actually recombines. It spontaneously reorganizes itself. And I say all of that in part because this war overseas that you're seeing unfold and this maniac of a president, Donald Trump, who's executing this, Donald Trump is not going to last. Under his tutelage, under his leadership, will collapse, to be sure. But MAGA, which is nothing to do with Donald Trump, is part of this organic, ethnos, metaphysical thing that I'm talking about, that will get stronger. It will consolidate. And that's exactly what's going to happen in Iran. People, in other words, are spiritual entities. We're not empty containers that can be remade at the will of some architect, some engineer manufacturing it from above, which is what the Jewish propagandists believe.

### **David J. Reilly**

[ 01:22:58 ] Absolutely. And they've been working to degrade the ethos of America and to break up whatever unity we may have. And people forget about this, but I pulled it up on the screen. One of the first acts of the first Congress of the United States passed in 1790. Who is an American? Well, somebody. That is a free white person who has resided within the limits and under the jurisdiction of the United States for a term of two years may be admitted to become a citizen thereof. So. We are definitely not just a white country, but a Christian country.

**Rebecca Hargraves**

[ 01:23:39 ] You mean we weren't diverse from the start?

**David J. Reilly**

[ 01:23:41 ] No, we were not diverse from the start. And there was, I forget what it is, was it Trinity versus, but there was this old court case where the judge ruled that America is a Christian nation. And so when you look at what the Frankfurt School did once they got kicked out of Germany and they moved over to Columbia University with all of these people – Max Horkheimer, Theodore Adorno, Walter Benjamin, Herbert Marcuse. Gramsci was in Italy, but his works were translated and republished at Notre Dame University by [ Pete Buttigieg's father], among others. And the whole point of this, and their authoritarian personality, which was released in the 1950s and 1960s, was designed to break up. and brainwash white Americans from forgetting their heritage, forgetting their place in the world, forgetting their customs, their traditions, and their cultures, and turning us into a kind of economic zone where they could be tossed aside by corporations; open the floodgates of the third world with the Hart-Celler Act, drive down wages, and, you know, we've seen this story before. People like Vince James have been talking about this forever. Bowling Alone. There was an article in the New York Times in like 1997. Robert Putnam; that talks about this, you know, and so you've got on the one hand this like these. Zionist-backed paramilitaries all over the Middle East causing destabilization, sending immigrants to Europe. And you've also got Zionist-backed cartels in South America, which are destabilizing and sending people across our southern border, which inherently brings about a state of destabilization in the United States because heterogeneous societies are not strong. Diversity is not a strength.

**Rebecca Hargraves**

[ 01:25:46 ] This but we do we do we have to mention this so what is what does Cameron always say he says I hate to belabor the point it's like no I like my mom always tells me stories over and over again about children that she knows that have gotten hurt it's like the same you know like to keep me vigilant as a mom I'm like why do you keep telling me the same stories over and over again she's like listen if it's in your brain if it's in your lizard brain it will change your behavior your behavior will become reflexive so Cameron always says I hate to belabor the point I'm like no Many times, as you need to say it, before it's just in everybody, before it's part of our very being. Let's talk a little bit about why this is going to fail, why this is not going to be successful in Iran. Can you pull up this Iran response tweet? I won't read the whole thing. But it seems like they are responding appropriately, wisely. No disruption to Iran or global energy markets. Maximum internal economic pressure on Israel.

Israel's being economically vassalized into Gulf cooperation. Operation Council, a ceasefire for Palestine will follow when this ends with reconstruction to follow. The region has already aligned with the outcome. This is not World War III. It's a transfer of power and a new regional vision based upon reconstruction, not war. Now, I'm inclined to disagree. I think this is downplaying the impact. But I do like to hear this perspective that it might just end up being some sort of reconstruction.

**David J. Reilly**

[ 01:27:12 ] Yeah, we do have to give a shout out to the author of the tweet, Simon Dixon.

**Rebecca Hargraves**

[ 01:27:16 ] Thank you, Simon.

**David J. Reilly**

[ 01:27:17 ] CEO of Bank to the Future, a Bitcoin bank.

**Rebecca Hargraves**

[ 01:27:21 ] Oh, I hate you.

**David J. Reilly**

[ 01:27:22 ] I had to bring it up.

**Rebecca Hargraves**

[ 01:27:25 ] Let's pull up this next one. Like we mentioned earlier, people in the West, they pathologically underestimate the military arsenal and missile power of Iran. This is the first use by Iran in Tel Aviv, Israel. The IRGC announced the use of the first-generation Fatah missile—the first time to strike Tel Aviv. It can maneuver both inside and outside the atmosphere with a range of 1,400 kilometers, a speed of Mach 13 to 15. It takes just five minutes to reach Tel Aviv.

**David J. Reilly**

[ 01:27:58 ] Yep.

**Rebecca Hargraves**

[ 01:27:59 ] I don't think anybody anticipated, people that were paying attention. The destruction in Israel. I mean, they surely did not anticipate this.

**David J. Reilly**

[ 01:28:07 ] It's not to say that Israel is being decimated. In the same way that Gaza is. They're not being decimated, but there are strikes that are going through, that are hitting, and it is important. Now, I do have, in addition to that, just a few hours ago, Iran premiered another new ballistic, that I think we might be able to learn a little bit about right now, try to be a little educational here. It's called the Khoram Sahar-4 ballistic missile. Let's take a quick look at this.

### **Cameron MacGregor**<sup>3</sup>

[ 01:28:42 ] Maneuverable reentry vehicle, capable of changing its course in the vacuum of space. For this purpose the re-entry vehicle is equipped with a liquid propellant thruster system for attitude control enabling it to perform continuous and pseudo-random trajectory changes. This forces the ballistic missile defense interceptor and its kill vehicle to deplete their fuel reserves, which were designed for targets that cannot significantly alter their trajectory outside of the atmosphere. Once the exo-atmospheric MARV completes its evasive maneuvers, it is put on a precise ballistic trajectory to hit its intended target unguided. The thruster attitude control system puts the re-entry vehicle into a steep dive angle and it's put into a spin traveling the atmospheric re-entry phase unguided but at a very high velocity; Its impact velocity of over Mach 8 means that most endo-atmospheric ballistic missile interceptors with hit-to-kill warheads lack the necessary reaction time to compensate for motion fluctuations encountered during re-entry.

### **David J. Reilly**

[ 01:29:43 ] Whoa, so we can just... Yeah, no, they've got some serious stuff that they have.

### **Cameron MacGregor**

[ 01:30:13 ] Capital ships, one of which was an aircraft carrier. And I think there were something like 15,000 to 20,000 sailors that were killed. Now, why was that? Why did that happen? Well, it happened largely because we were operating with 20th century platforms, which is what capital ships are, in very shallow water, what they call littoral water, against 21st century technology, no defense if you're floating on the surface in the littoral, which is exactly what Donald Trump is doing with our naval forces. Now, in addition to that, you have to remember that Iran has integrated air defense. In fact, their air defense system is one of the best in the world. And that's why I said earlier, all systems are going to fail. But that means they have sensors, they have command centers, they have missiles, they can quickly re-engineer and rebuild it. And I think that's effectively what you're going to see happen. In addition to that, They have officially the estimates are that they've got between five and ten thousand ballistic missiles, hypersonic missiles, things of that nature, which I think have a two-thousand-kilometer range. All right. Can basically strike across the Middle East. I've heard anecdotally that they have a lot more than that, that they don't have five to ten thousand. They may have tens of thousands. I don't know. We're going to find out. But the point of all of this is as follows. Number one, warfare has changed. We're not fighting Leyte Gulf, all right? We're fighting in an environment in which lethality from the air, in which precision strike missiles can devastate forces in ways we've never experienced before. Part of this is what's happening in Ukraine, all right? The Russians are using devastating aerial power and bombardment against the Ukrainian force in ways that we've never seen before. So number one is that warfare has changed. Has been preparing for this for a long, long time. And then number three, and this speaks to your question, Rebecca, which is, well, what are the consequences going to be? Look, Iran has the capacity to shut down key choke points like the Straits of Hormuz, through which about 20% of global oil passes at any given time. Now, that oil and natural gas doesn't come to the United States, but it goes to China and it goes to

other major powers in the world who will, I think by necessity, be involved in this conflict if we take on Iran. So you can see how crucial, not just from a geostrategic standpoint, that this war potentially could be, but from an economic standpoint, it could be substantial as well. And remember that if we go to war with Iran, if other powers are involved, what does that mean for a very fragile U. S. economy that I think is already in a recession, for a government that's desperate to finance its debt through U. S. Treasuries? A lot of which are bought by foreign investors. Well, you're going to see a fire sale out of U. S. Treasury bonds. And that means that our deficit, which is only going to compound because we go into a recession, it's going to explode the fiscal situation even worse. That is where we're headed. And I'm not even being creative with what more could be done. There could also be, and this is something we have not talked about on the show tonight, there could also be terrorist attacks in the United States. Filtered who's coming into the country over the last 20 to 30 years. We've got millions of people here and almost certainly terrorist cells or capable militant groups that could do us harm to our bridges, our tunnels, our nuclear sites, et cetera, et cetera. So this is extremely dangerous. And if we engage, I think it's going to go off the rails.

#### **Rebecca Hargraves**

[ 01:34:05 ] Cameron, I've read reports that Israel will only be able to maintain shooting down Iranian ballistic missiles for 10 or 12 more days from any other sources. I only read it on one or two sources. I think I heard Blumenthal say it on Judge Knapp today.

#### **Cameron MacGregor**

[ 01:34:20 ] It could be. What I do know is this. Based on our experience using Patriot battery missiles, for every missile you shoot down, it's like two or three that you have to launch, which means that you're depleting your stocks at a lot faster rate. Secondly, it appears as though Iran is using a lot of their older munitions, a lot of their older missiles, to absorb those Patriot missiles and basically eat away at that stock. So, yeah, I think, I don't know about 10 days. A lot of that will depend on the volume that's launched from Iran. But the Iron Dome, as you can see on the screen, right, as we showed earlier this evening, cannot hold up. And remember, Israel's the size of New Jersey, folks. And Iran has thousands upon thousands upon thousands of missiles. In the hopes that they could regime change very, very quickly. Every day that passes that there is no regime change in Iran means that Iran gets stronger and Israel gets weaker. That's a fact.

#### **David J. Reilly**

[ 01:35:25 ] Yeah. And we've got, I just wanted to point out from Sputnik, these are the photos we were kind of showing it as Cameron was talking about these new missiles that Iran is launching. They look like, it looks like a SpaceX launch, to be quite honest. It doesn't look, like your regular old ballistic missiles. And so we are only just beginning to see these newer missiles being deployed. God knows how accurate they are. And imagine if they did at this point with the bully tactics and the bullshit that has been going on from Israel and the United States. What if they decided to actually get their hands on a nuke and put it on one of these hypersonic missiles? Tel Aviv would be a parking lot in 15 minutes. So, you know, I

really think that they fucked up by doing this.

**Rebecca Hargraves**

[ 01:36:18 ] They clearly underestimated how the Iranian population was going to mobilize and coalesce around something emotional like this. And I think that this woman has become something of a symbol for Iran. This is a non-military target, by the way.

**David J. Reilly**

[ 01:36:35 ] Oh, yeah. As are most of the places that they're hitting, water facilities, fuel facilities. Iran University, which is a civilian target. Isn't that a war crime?

**Rebecca Hargraves**

[ 01:36:48 ] Yeah, seriously.

**David J. Reilly**

[ 01:36:49 ] For the world's most moral army, but also killing journalists, which is one of Israel's favorite pastimes. And that's what we're seeing here.

**Cameron MacGregor<sup>9</sup>**

[ 01:37:01 ] Brace yourself. As you have seen, the sound you heard, the stormy atmosphere of the studio.

**Rebecca Hargraves**

[ 01:37:17 ] She, uh, first thing they say, 'God is great.' 'God is great.' Continued her broadcast from the other side of the building within a number of minutes after that. And she's becoming the face of this. She's become a symbol for the Iranian people. And something else that nobody's talking about: these research facilities have been wiped out. What about that? What about the toll from these non-military targets? So an Iranian missile strike on Israel's Weizmann Institute. Oh, wait, no.

**David J. Reilly**

[ 01:37:51 ] Yeah. What are you talking about?

**Rebecca Hargraves**

[ 01:37:53 ] When I was reading this, I thought that this happened in Iran.

**David J. Reilly**

[ 01:37:57 ] Oh, no, no, no. This was Iran hitting Israel. This is a bioweapons lab based in Tel Aviv.

**Rebecca Hargraves**

[ 01:38:04 ] I read this entire headline incorrectly.

**David J. Reilly**

[ 01:38:07 ] Oh, well, that's great. But, I mean, it gives us a good moment, again, to demonstrate the level of damage that the Iranians are dealing to the Israelis.

**Rebecca Hargraves**

[ 01:38:22 ] Research is storing labs and irreplaceable samples in minutes. You're telling me this is a bio?

**David J. Reilly**

[ 01:38:25 ] This is a bioweapon facility in Israel.

**Rebecca Hargraves**

[ 01:38:28 ] So this was a targeted strike? Correct. Ah.

**David J. Reilly**

[ 01:38:31 ] The Iranians blew it up with one of their missiles. Interesting. Yeah. Yeah. And I was showing the clip earlier from the Times of Israel that the Iranians did hit the Bazan oil refinery in Haifa. And so, you know, when you're on Twitter, when you're watching Mark Levin, you know, these guys aren't really doing anything, blah, blah, blah. And you get all this Hasbara bullshit about how, you know, they're not really, you know, hitting their targets or they start talking about the Iron Dome or the, was it called David's Sling, which are these missile defense systems. Getting significant hits on the Israelis. Yeah. And they are downplaying that in the media. They are trying to demoralize people.

**Rebecca Hargraves**

[ 01:39:42 ] Of our frantic preparation from the show in Boise, managed to watch this entire two-hour interview. That was two hours? It was two hours. I could not believe. Cameron, I don't suppose you caught any of it. Did you see some of the clips from Tucker?

**Cameron MacGregor**

[ 01:39:54 ] I saw some of the highlights and it was fun to watch Ted Cruz squirm. Oh, it was so bad.

**Rebecca Hargraves**

[ 01:40:00 ] Watching Ted Cruz explain that AIPAC is not at the behest of a foreign government was truly like the cherry on top of my week. I was watching this like, oh my God, I can't even believe that this is happening. Knowing what I know about these people, astonishing. We can't talk about too much of it because it was two hours long, but this is the clip that's gone most viral. I wrote, Cruz knows f\*\*\*k all about Iran. Uh, where's my audio? It's muted on Twitter.

**David J. Reilly**

[ 01:40:30 ] Oh, it's muted on Twitter. How did that happen?

**Rebecca Hargraves**

[ 01:40:33 ] I think it's always every time you reload, it gets muted. It might.

**David J. Reilly**

[ 01:40:36 ] It might.

**Rebecca Hargraves**

[ 01:40:37 ] It's not your fault, Dave.

**David J. Reilly**

[ 01:40:38 ] Sometimes it is my fault.

**SPEAKER\_7**

[ 01:40:40 ] How many people live in Iran, by the way? I don't know the population at all. No, I don't know the population. You don't know the population of the country you seek to topple? How many people living around? 92 million. Okay. Yeah. How could you not know that?

**Cameron MacGregor0**

[ 01:40:57 ] I don't sit around memorizing population tables.

**SPEAKER\_7**

[ 01:40:59 ] Well, it's kind of relevant because you're calling for the overthrow of the government.

**Cameron MacGregor0**

[ 01:41:03 ] Why is it relevant whether it's 90 million or 80 million or 100 million? Why is that relevant?

**SPEAKER\_7**

[ 01:41:08 ] Well, because if you don't know anything about the country. I didn't say I don't know anything about the country. Okay, what's the ethnic mix of Iran?

**Cameron MacGregor0**

[ 01:41:13 ] They are Persians and predominantly Shia. OK, this is not you don't know anything about Iran. So, OK, I am not the Tucker Carlson expert on Iran. You're a senator who's calling for the overthrow of the government. You're the one who claims you don't know anything about the country. No, you don't know anything about the country. You're the one who claims they're not trying to murder Donald Trump. You're the one who can't figure out if it was a good idea to kill General Soleimani and you said it was bad.

**SPEAKER\_7**

[ 01:41:37 ] You don't believe they're trying to murder Trump. Yes, I do. Because you're not calling for military strikes against them in retaliation.

**Cameron MacGregor0**

[ 01:41:43 ] We're carrying out military strikes today. You said Israel was. Right. With our help. I said we. Israel is leading them, but we're supporting them.

**SPEAKER\_7**

[ 01:41:51 ] Well, you're breaking news here because the U. S. government last night denied, the National Security Council spokesman Alex Pfeiffer denied on behalf of Trump that we were acting on Israel's behalf in any offensive capacity.

**Cameron MacGregor0**

[ 01:42:02 ] We're not bombing them. Israel's bombing them.

**SPEAKER\_7**

[ 01:42:04 ] You just said we were. We are supporting Israel. It's just high stakes. You're a senator. If you're saying the United States government is at work to run right now, people are listening.

**Rebecca Hargraves**

[ 01:42:13 ] Oh, man. Oh, good Lord. Anyway, the entire two-hour thing was like that. It was highly combative. There were so many good moments in it.

**David J. Reilly**

[ 01:42:23 ] Can I pull up the—I've got to pull up that clip we were talking about earlier.

**Rebecca Hargraves**

[ 01:42:27 ] It's 41 minutes, 30 seconds.

**David J. Reilly**

[ 01:42:28 ] Oh, okay. You know exactly what it is?

**Rebecca Hargraves**

[ 01:42:31 ] I do because— Well, I texted it to you, too. Because we're getting Astro. Turfed by Tucker. And he had this really revealing moment where he does what people in Conning do all the time, which is like, it's not the Jews, it's Israel. Yes.

**David J. Reilly**

[ 01:42:43 ] So let's look at this a little bit. I'm sure that we will be hearing, are you sure it's 41:30? I think it might be a little bit before. No, go ahead. Let's just feel it out here. But I'm sure we're going to hear about this on Nick tonight. Yeah. Let's see.

**Cameron MacGregor0**

[ 01:43:06 ] Is Israel directing them? You want to talk about FARA, the law on lobbying on behalf of someone. It is: 'I hire you and you lobby on behalf of me.' I direct you. Does Israel direct AIPAC? No, they're not lobbying on behalf of them. Do they care about them? Yes.'

**SPEAKER\_7**

[ 01:43:21 ] But do you think that it's just interesting because what you're now describing in a very defensive way, I will say, is foreign influence over our politics. No. And you began and it's so transparently obvious to everybody. I don't know why you would be embarrassed of it. Said that you are sincerely for Israel. I believe you. I don't think you have some weird agenda. You seem to be sincere. By the way, Tucker, it's a very weird thing.

**David J. Reilly**

[ 01:43:44 ] Here it is.

**Cameron MacGregor0**

[ 01:43:46 ] The obsession with Israel. We're talking about foreign countries.

**SPEAKER\_7**

[ 01:43:49 ] It's hardly an obsession.

**Cameron MacGregor0**

[ 01:43:49 ] You're not talking about Chinese. You're not talking about Japanese. You're not talking about the Brits. You're not talking about the French. The question, what about the Jews? What about the Jews?

**SPEAKER\_7**

[ 01:43:56 ] Oh, I'm an anti-Semite now. Senator, you're asking the questions, Tucker.

**Cameron MacGregor0**

[ 01:43:59 ] You just told me. You're asking, why are the Jews controlling our foreign policy? That's what you just asked.

**SPEAKER\_7**

[ 01:44:05 ] Senator, I am hardly saying that. That is exactly what you just said. Well, actually, I can speak for myself and tell you what I am saying. Good. On behalf, not simply of myself, but of my many Jewish friends who would have the same questions. Which is to what extent, and it's interesting you're trying to derail my questions by calling me an anti-Semite, which you are. I did not. Of course you are. And rather than be honorable enough to say it right to my face, you are in a sleazy feline way implying it or just asking questions about the Jews. I'm not asking questions about the Jews. There's nothing to do with Jews or Judaism. It has to do with a foreign government.

**David J. Reilly**

[ 01:44:39 ] Therein lies the subversive element of this. How does it have nothing to do about the Jews when you are talking about the Jewish state? Yeah, of course. The only Jewish state, the first Jewish state to exist since Titus destroyed Israel in 70 AD.

**Rebecca Hargraves**

[ 01:45:02 ] Well, that wasn't Zionism.

**David J. Reilly**

[ 01:45:03 ] Oh, that wasn't Zionism. You know what? You know what? I wonder. What about Isabella and Ferdinand? Yeah, really. Oh, those weren't Zionists. No, no, indeed. No. What about England? 730? Zionists, right? No, that was Jews again. So to imply that there isn't a deep-seated relationship between Israel and Jews and AIPAC and Jews. And no, I'm sorry. Like, they are not two completely distinct things. Yes, there are, you know, there is a discussion about foreign interference, about that they won't. This is where it does go deeper because you can look back to what was going on at the time of Christ with the Sicari zealots. Sorry, I'll wrap it up soon. With the Sicari zealots, what did they want? They wanted total domination over the Romans. They wanted a Messiah that would be a military leader and help them crush their enemies and get slaves, right? They wanted to enslave the goyim, right? Which is the non-Jews of the world. This was the ideology of the Sicari zealots, of the Pharisees, of the people, oh, what was the name of the last stand of the Jews? The Masada, right? When the Jews that had been kicked out of Jerusalem, they fell back to Masada and they were all like hyper radicals. And you can see this happen again and again and again in history where Jews create radical ideas that birth things like modern terrorism with the group Narodnaya Volia in the late 1800s in Russia, where they weaponized dynamite for the very first time to kill Tsar Alexander II, if my memory is serving me well. And there is a reason and a relationship between Jewish extremism and what we're seeing today with the AIPAC stuff, with the founding of the state of Israel.

**Rebecca Hargraves**

[ 01:47:14 ] I wouldn't even call it Jewish extremism. extremism, though, because the nature of Judaism is extreme.

**David J. Reilly**

[ 01:47:19 ] And why is it extreme? It's extreme because they killed Jesus Christ. Yes. God, the truth incarnate, the logos of the universe. They killed him and they would kill him again today if they were given the opportunity. And when you look at all of these isms, Marxism, feminism, communism, postmodernism, Prager University said the Jews are behind every ism in the world except Nazism.

**Rebecca Hargraves**

[ 01:47:52 ] Yeah, really. Right. And this is why I can't take the win. I can't take the win with your Charlie Kirk's, your Matt Walsh's, even with your Tucker Carlson's, because at the end of the day, they're talking about foreign intervention. They're talking about a foreign state. They're talking about bad actors. And we over at the backlash, we're talking about the Jews.

**David J. Reilly**

[ 01:48:10 ] Very true. But, you know, they're not unrelated. They're not unrelated. But you have to understand how this works, how there is a fifth column in this country, that there is a

fifth column in all of the Western countries that are all subservient to an ideology. Right now, it is manifesting itself as Zionism. But in the 19-teens, right, in the early turn of the century, that ideology wasn't Zionism. It was Bolshevism. And before that in Spain and before that in England, I mean, it happens over and over again.

**Rebecca Hargraves**

[ 01:48:52 ] That's because these things are all one in the same.

**David J. Reilly**

[ 01:48:54 ] They want their Messiah. They don't want the Messiah that God sent them. They want their Messiah that will appeal to them in their sick, twisted way where they believe that they are going to get supremacy and dominion over the world. Right. Right. That is what they want. And a lot of this, you know, I was talking on a Twitter space last night. They are awaiting a Messiah, right? This guy, what was his name? Menachem Mendel Schneerson, the Rebbe of Chabad Lubavitch. And then, you know, what are they doing? They are working to bring about the return of the Messiah. They are working to create the conditions of redemption through this ideology of, it's called Tikkun Olam. The idea that the Jews are going to fix everything that God made wrong in the world. They believe that there is something wrong with God and with God's creation and that only the Jews can fix it. That is the heart of the issue that nobody is dealing with.

**Rebecca Hargraves**

[ 01:50:07 ] Well, I mean, we are. And I think that that's the difference between Khan Inc. and people like Nick, people that are actually telling the truth. A spiritual battle. Yes. That this is not about carnal desires or this world or justice in this world. That this is about spirituality, our hearts and minds, our souls, then are you really even talking about what matters? True. And you know who understands this? Iranians.

**David J. Reilly**

[ 01:50:35 ] They do.

**Rebecca Hargraves**

[ 01:50:36 ] They do understand this. There was one more clip before. Please get your super chats into the backlash . net slash super chat. We're going to wind down here. This is not going to go unnoticed by the average citizen. Did you see this clip of the Spanish concert? Oh, yeah. It's 16. I saw this and I was like skipping a little.

**David J. Reilly**

[ 01:50:54 ] No, we actually. We went through all of that. I want to watch the Mark Levin clip. Oh, that's right. We can do that. I hate him so much. Like, oh my God. So this is a punk rock concert in Spain. Let's Go Bomb Tel Aviv. And the lyrics are Let's Go Bomb Tel Aviv, which is also LGBT, and it is still LGBT Pride Month. So just saying.

**Rebecca Hargraves**

[ 01:51:27 ] I've been seeing some videos online, people talking about Israel, Zionism, Jews, and I cannot tell if these people are on the left or on the right. And I think that my friend Robin Riley tweeted this yesterday with this excellent video.

**David J. Reilly**

[ 01:51:40 ] Oh, we've got to watch.

**Rebecca Hargraves**

[ 01:51:41 ] That's so good. I couldn't tell if this chick was on the left or the right, and I think that they are seriously concerned about the convergence.

**David J. Reilly**

[ 01:51:51 ] This was like a normal, oh, it is unavailable. Oh, it's unavailable.

**Rebecca Hargraves**

[ 01:51:55 ] Get out of here. Oh, no, there it is.

**David J. Reilly**

[ 01:51:58 ] Here it is.

**Rebecca Hargraves**

[ 01:51:58 ] Okay. We don't have to watch all of it, but.

**David J. Reilly**

[ 01:52:00 ] This is incredible. This is like normal people waking up. Who is Carrie Burgess?

**Rebecca Hargraves**

[ 01:52:06 ] I don't know.

**David J. Reilly**

[ 01:52:07 ] I don't have any earthly idea who this woman is, but she is. So mad.

**Cameron MacGregor1**

[ 01:52:12 ] Listen to this: Is the fucking audacity! You've infiltrated every aspect of American society. You've infiltrated our government. You've bought our politicians. You control our legislation. You funnel billions and billions of dollars, possibly trillions, from the American people on a yearly basis so that you can get free health care and go fucking brutalize, terrorize, and genocide people in Palestine. New York, New Jersey, wherever the fuck you're actually fucking from. Go live your lives. Go live your lives like you didn't just fucking murder children. Now you pieces of fucking scum are on every single major news channel because you own the media too because you fucking infiltrated that too. Now you're on every single fucking news station playing victim. They want to kill all the Jews. Nobody fucking cares that you're Jewish. Nobody cares. They want to kill Israelis because you're fucking murderous, genocidal pieces of shit. All right? And you have no business.

### Rebecca Hargraves

[ 01:53:21 ] The thing about this video that went mega viral is that nobody, this chick wasn't on anybody's radar. I'm pretty sure she's just an average citizen. If you guys know anything about Carrie Burgess, please let me know. And I don't know if she's on the left or the right. I don't know. I have no idea.

### David J. Reilly

[ 01:53:35 ] I think she might be on the left because I had her blocked. Because I ran some that's fun, your timeline is just somebody in the backlash Telegram actually made that meme, the total recall meme, and I was laughing so hard, Quaid the reactor, Quaid, but yeah, here's here's the tweet: we're reaching convergence; you can't tell if this person is a lefty or a righty; the oligarchs should be worried about this and they are; they are, and the thing is it's like I've I'm seeing things involved in any of these like Discord groups or you know goofy weird group I'm in like a couple of Signal group chats with people from around the county, and it's like I'm getting incoming missiles from activated boomers that watched Tucker Carlson and for the first time are like holy shit, I'm pissed about this; these people are satanic; Christian Zionism is satanic; and I'm like yeah, you think you're just coming to this realization now. So we've got incoming. The boomer often might be activating just a little bit. But I mean, it's not obviously going to be enough for the Republican Party to wake up based one day. That's not going to happen. I don't know.

### Rebecca Hargraves

[ 01:54:55 ] My mom might unilaterally. But there is a civil war.

### Cameron MacGregor

[ 01:55:00 ] I just want to say, you know, all of these all of these things are important. effort here is to give you guys in the audience a macro sense, a big picture of what all this means and where we're headed. Because you can get lost in the details of a lot of these things. You can get lost in the conspiracy theories. You can get lost in the financial system, the euro dollar system or the geopolitics. But the fact of the matter is that Trump won his first administration, his first term. As disastrous as it was, it achieved a very specific objective. It awakened the population. It exposed the normies. It exposed mainstream, if you will, to the corruption of the media, to the corruption in the government and the key participants in that, the JQ and AIPAC and all the rest of it. It exploded after his presidency, after his candidacy. What will be the legacy of Trump, too? Well, it's burning all of that to the ground, right? The media industrial complex, the political structure, as we know it, left, right, Republican, Democrat, all of that is going to go up in smithereens and you're going to see and I think we've already seen this year shocking things that we forecast on this on this channel we talked six months ago about banking crises about war with Iran about trade wars with China about war with Mexico about racial eruption in Los Angeles and now in major cities across this country this is just the beginning but the good news is this: The Jewish influence and subversion of our country, pluralism, which is really from, I would say, the 1960s to today, this governing order in which being an American is some kind of made-up thing that

nobody can really explain or pinpoint. That's over. It's done. It's blowing itself up. And it was always going to go this way. Things are going to get hard. They are. I think we're headed for serious economic consequences. I find it hard to believe that this war will not go regional, or potentially worse. And we're going to lose people. We're going to lose service members. We're going to die pointlessly in some stupid conflict we should never have been engaged in. And God knows, maybe there will be some nuclear confrontation too. I don't know. Let's hope not. But the American people, the real America, white America, is waking up. And it's not just us. People are waking up in Canada. They're waking up across the Western world and Western Europe and Germany and France and Great Britain. This is a critical moment in which everything's going to change. You're going to see, as I keep saying, a mass mobilization event. That's what all of this carnage is going to produce. And that will be a very good thing because I think it's going to reset the balance and transform this country in a very positive way and hopefully save Western civilization. You're right.

### **Rebecca Hargraves**

[ 01:58:00 ] See, that would be a perfect note to end on, but we still have to watch this Mark Levin clip because it's so good.

### **David J. Reilly**

[ 01:58:04 ] We do. We have that. And there was another story that we forgot about. Pentagon Colonel Nathan McCormick was removed from his position at the Joint Chiefs of Staff for posts calling Israel a 'death cult' and referring to Netanyahu and his ilk as Judeo-Supremacist cronies, and asking whether the U. S. is functioning as Israel's proxy. This is a story that we should be keeping an eye on. Absolutely. You know, this is just another layer demonstrating this grip that the Israelis, AIPAC, the Jews, whatever, have on our defense establishment. I mean, the Pentagon is occupied territory. You know, white people in America are Palestinians in our own country. So anyway, yeah, let's get this Mark Levin clip. We've got to watch this. He just loses his shit.

### **Rebecca Hargraves**

[ 01:59:01 ] And on a high note here.

### **SPEAKER\_4**

[ 01:59:31 ] American who's going to get behind the President of the United States, the Commander in Chief, or you're not. One other thing, these little weasels in Congress like Tom Massey, the War Powers Act, and I'm a constitutionalist, he says, and I know the president's not, he can't do this on his own. Hey, Tommy, let me educate you about the Constitution. Is the War Powers Act in the Constitution? It was passed in 1973. Was the Constitution adopted in 1973, Tommy? I don't think so. Lieb, who supports the enemy. Omar, who supports the enemy. Folks, this is black and white. You're either on the side of the red, white, and blue, or you're on the other side. It's that simple. What is the War Powers Act? It is an unconstitutional law that tries to steal power from the Commander in Chief. If Congress wants to step in, and they don't believe that the President of the United States should help Israel help us take out a nuclear site so these primitives don't have a missile that can hit

Detroit and Los Angeles and Philadelphia or wherever they want to. If that's their belief, they have what's called the spending clause of the Constitution. They can withhold money. Congress did that in the Vietnam War to Ford. He vetoed it. They overrode his veto. You know why they won't do that? They don't have enough votes to do it, to override his veto. We need to stand behind our commander-in-chief. We need to stand behind the Israelis. We need to put this evil to rest once and for all. 50 years is a forever war. It's time to get rid of them.

### **Rebecca Hargraves**

[ 02:01:03 ] Oh my gosh. You know, he is right about one thing. This is black and white, but he is the enemy. Yeah.

### **David J. Reilly**

[ 02:01:08 ] And I think that like, it is irresponsible of Fox to let this man have a show because I think every time he gets on the air, another 2,000 anti-Semites are born. You know what I mean?

### **Cameron MacGregor**

[ 02:01:23 ] I don't know what you guys are talking about. I thought he made some really great points.

### **David J. Reilly**

[ 02:01:27 ] I mean, compare the level. I mean, go watch the Tucker interview. We know, we know he's not perfect, but watch the Tucker interview and then watch this. You got to watch the Tucker interview. Which side is going to win? The one that's screaming at you and browbeating you and who are you going to stand with? Us or the terrorists? I'm sorry, that is not a very convincing argument. That does not change anyone's mind.

### **Cameron MacGregor**

[ 02:01:58 ] Yeah, and just one other thing to just note from a political standpoint here, part of the reason the strike happened now, as opposed to five years ago or 10 years ago, is because Jewish control of the West has achieved its apotheosis. It's only going to go down from here. Bibi Netanyahu knows that, and that's why he took advantage of it. But that means, as I said earlier, that now that it's out of the bag, now that everybody knows what's going on, we're at the end. We're in the end stages of this. We're finally turning the corner. And for a lot of boomers out there who have been privy to this for a long time, and I've met them, who have been talking about this for decades. They've been waiting, waiting for the population to finally wake up. And I think this is the moment. Unfortunately, there's going to be a lot of collateral damage, but we're going to cross that Rubicon and finally rid ourselves of this parasitic influence.

### **Rebecca Hargraves**

[ 02:02:58 ] Parasitic influences. Yes. Oh, no, I heard the whole thing.

### **David J. Reilly**

[ 02:03:00 ] I do think, I mean, you have your last question in the outline is, is this the end of Israel?

**Rebecca Hargraves**

[ 02:03:06 ] I think it might be.

**David J. Reilly**

[ 02:03:07 ] I think it's the beginning. The beginning of the end. I think it's the beginning of it.

**Rebecca Hargraves**

[ 02:03:11 ] These boomers are going to, you know, they're going to die. Who's going to be supporting this cause anymore? The left and right are coalescing, as we just discussed.

**David J. Reilly**

[ 02:03:18 ] And they're all like; they have no clue what's going to hit them. I mean, it could be that, you know, they might win, right? Actually take out the Ayatollah; they might have the United States join in right uh and you know that could usher in like an age of Israeli Jewish supremacy which is absolutely terrifying, isn't that not what we're in right now but that's already where we are and B uh the odds that if if something like that were to happen that Yemen is one pin from the Jenga tower to knock the whole house of cards over. And when that happens, I think Cameron is right. I think that this is a turning point.

**Rebecca Hargraves**

[ 02:04:09 ] If you are a boomer, we still want your money.

**David J. Reilly**

[ 02:04:13 ] We'll forgive you, too.

**Rebecca Hargraves**

[ 02:04:15 ] We'll bring you on board. It's okay. Just give us gibby, gibby, gibby. Gibby all of your boomer dollars.

**Cameron MacGregor**

[ 02:04:21 ] Gen X always escapes culpability.

**David J. Reilly**

[ 02:04:28 ] That's true. They don't have to just give us their money. If you talk, okay, fine, do it. They don't have to just give us their money. They can support based good businesses.

**Rebecca Hargraves**

[ 02:04:40 ] I don't think they know anything about like Idaho Tallow Company. Oh, I thought you were going to talk about crypto. Proceed. Ah, I gotcha. I'm like boomers don't know anything about crypto.

### David J. Reilly

[ 02:04:50 ] No, we will talk about crypto though, probably in the super chats. Please somebody send, send a super chat about how I talk about Bitcoin too much so I can talk more about Bitcoin, please. But in the meantime, I want to tell you about North Idaho Tallow Company. If you're tired of skincare owned by BlackRock and packed with chemicals that you can't pronounce. North Idaho Tallow Company keeps it simple with grass-fed tallow, time-tested ingredients, zero junk. Our soaps, balms, and lip balm are packed with bioavailable nutrients that your skin actually needs. No fillers, no endocrine disruptors, just rugged, reliable skincare that works. Ditch the synthetic garbage and switch to North Idaho Tallow Company. Get yours at [idahotallow.com](http://idahotallow.com). And they have got some amazing stuff. I was talking with a friend of mine, actually, who has had some seriously dry skin and reached out and got some North Idaho Tallow stuff. And he's doing a lot better. Yeah.

### Cameron MacGregor

[ 02:05:50 ] Would that friend be named Vince James? Just curious.

### David J. Reilly

[ 02:05:53 ] Vince James is one of these people. No, I was actually talking about our good friend Casey Whalen. Oh, really? He's an independent journalist here in North Idaho. He will be joining us in Boise at Hetero Awesome Festival. Oh, is he really? Yeah. He's going to be running one of the cameras. Nice. And we've got to plug this too because we're going. It'll be great. I'm going to be tearing the studio down and packing it into a U-Haul when we log off tonight. Hetero Awesome Fest is going to be happening this Friday and Saturday in front of the Boise Capitol from 2 p. m. until 10 p. m. tomorrow. No, no, no. Sorry. 2 p. m. to 10 p. m. Friday and then 10 a. m. to 10 p. m. on Saturday. Ian Carroll will be there. Brian Matta will be there, the Native Patriot, Heather McIsaac. I think that there's a few other influencers that are going to be in town. And just to do some housekeeping on this, I will be at, fingers crossed, I will be at the Old State Saloon tomorrow evening at 8 o'clock. So if you want to come by and find me at the bar, grab a beer, that'll just be me. Live broadcast starting at 4 p. m. from the front of the Idaho Capitol building. What are we going to talk about? We're going to talk about the origins of the LGBT movement, the Frankfurt School, and the Institute for Sexual Wissenschaft, which was run by Magnus Hirschfeld. And we are going to red pill you on who created the first transgender surgery because they weren't AIPAC. It wasn't a Zionist. No, indeed. But it was a Jew named Magnus Hirschfeld. So we'll be talking about that. We're going to be doing interviews. Casey Whalen will join us. Hopefully we'll be able to get Ian Carroll to come on. There's a bunch of other really great influencers from around Idaho. Maybe some elected representatives. Who knows? It could be a very fun time. But please join us down there and definitely check out Idaho Tallow Company because they are going to have a very beautiful booth there. They will be accepting Bitcoin payments and they are, I think, bringing down like 500 bars of soap.

### Rebecca Hargraves

[ 02:08:15 ] Nice.

### **David J. Reilly**

[ 02:08:16 ] And other assorted products. be an absolutely tremendous time. And while we are reading ads and waiting to launch our Super Chat segment, TheBacklash.net slash Super Chat, we also have to thank our good friends at Antelope Hill Publishing, who is fighting to keep history alive against the regime of anti-white censorship and to publish a new generation of dissident, radical, and right-wing researchers, philosophers, polemicists, and writers. They have an eclectic catalog. That includes veteran right-wing authors and academics like Kerry Bolton, Dr. Ricardo DeShane, and Paul Kersey, as well as other figures like Lord Miles Routledge of Afghanistan, Josh Neal, Christian Secor, in addition to the long list of original translations and modern reprints of otherwise inaccessible historic works from areas such as fascist Italy, National Socialist Germany, and even medieval Europe. Their original works include groundbreaking investigations; Transcription by CastingWords. Thank you, Dave.

### **Rebecca Hargraves**

[ 02:10:01 ] I've got to tell you that there are 16,000 people watching right now.

### **David J. Reilly**

[ 02:10:06 ] We, yeah, look at this. We are, it goes Alex Jones, Tim Pool. And then us. What the fuck is going on? This is getting out of control. Keep it together, blonde.

### **Cameron MacGregor**

[ 02:10:23 ] I think game ball goes to Dave tonight. Dave's been on fire, man.

### **David J. Reilly**

[ 02:10:28 ] Yeah, totally. Well done, Dave. This is the moment. This is now or never. This is really big. I've been talking with some people. I think we're going to be getting a little get-together here in North Idaho next Friday, potentially, for people that want to learn about this and start to finally network in real life with other like-minded people. Have all been so atomized from one another and the name calling and the urine anti-Semitic and blah blah blah and all of these you know goofy Christian churches that run around slandering people for like I don't know not wanting to kill kids. It is time that we all reach out, meet each other, and start to form some kind of political alliance so that this shit stops, so that our tax dollars stop getting sent overseas, and that we can actually have a government of the people, by the people, and for the people. Thank you very much. I'll be here all night. Believe me, it'll be tremendous.

### **Cameron MacGregor**

[ 02:11:38 ] You know, Dave, you're doing so well, and then you had to imitate that. I know.

### **David J. Reilly**

[ 02:11:43 ] Oh, my goodness. Let's see. What is today's date? Is today the 18th?

### **Rebecca Hargraves**

[ 02:11:48 ] Somebody just said, what is happening? I love Dave now.

**David J. Reilly**

[ 02:11:53 ] I grow on you, like cancer.

**Rebecca Hargraves**

[ 02:11:54 ] I told you guys that he would wear you down, like cancer.

**David J. Reilly**

[ 02:11:58 ] All right, starting off the night with Bill Biz, who sent \$25. It's great to hear Candace and Tucker amp up the criticism of Israel. I wonder if anyone close to Trump echoes these sentiments. Not enough.

**Cameron MacGregor**

[ 02:12:13 ] Yeah, I don't think so. And that's the issue, right, is that the whole system has been purged. And I, again, you know, as much as I dislike Donald Trump, and I think I established that at this stage, this is just not about him. This is a systemic failure. And there's chatter from all sides. And I know a lot of people in our spaces are somewhat skeptical of Tucker Carlson. Meeting over the last decade, I mean, he used to live in D. C. He had to move because his wife, his family was being harassed.

**Rebecca Hargraves**

[ 02:12:48 ] This is no joke into their house. Yeah, that's right.

**Cameron MacGregor**

[ 02:12:51 ] Yeah, no.

**Rebecca Hargraves**

[ 02:12:52 ] She had to hide in the pantry, his apolitical wife. High school sweethearts, those two.

**David J. Reilly**

[ 02:12:57 ] Yeah. I mean, I think, you know, with Tucker, the jury is still out. I think there's a couple of explanations on what could be going on with him. On the one hand, like, you know, for example, he did that episode on the USS Liberty. And he acts all surprised and, what? This is the first I'm hearing of this. He always does that. No, it's not. You know exactly what this is. audience to feel outraged, to feel offended, which is something that has been under lock and key by the Zionist lobby for decades and decades.

**Rebecca Hargraves**

[ 02:13:32 ] Yeah, okay, but cool. Talk about the Jews.

**David J. Reilly**

[ 02:13:34 ] Well, I think it's a process. It's a process. Sure, it's taken a long time.

### **Cameron MacGregor**

[ 02:13:39 ] Yeah, when you're at that level, I mean, the amount of damage that can be done to him. But the other thing that, folks, you just got to understand is that if you're in the military industrial complex, if you're a K Street lobbyist, If you work on Capitol Hill, if you want any kind of future, period, a future of influence, a future of income, you want a fellowship, you want to sit on a board, you want to get your McMansion on the Potomac, you have a choice. You can either capitulate to the Zionists or you can resist. If you resist, you're bankrupted. You're excluded from the system. You're called an anti-Semite. You're called a fringe lunatic. You lose your career. You lose your respect in the community. And I know personally, I know a few people that have made that choice, which I think we all agree is the moral choice to make, to be sure. But after decades and decades of this, is it any real surprise that in the Fortune 500 companies and the media companies, in DOD, the contractors, the nonprofits, that they've been completely hollowed out? No, of course. Of course they're hollowed out. And now we're going to go into a war in which there's no alternative point of view. If things go wrong, they're all going to go down. And that's what we need to happen. I'm sad to say, but that's what's going to happen.

### **David J. Reilly**

[ 02:14:59 ] I heard somebody mention recently a term called black fatigue. Yes, that is the one. heard that uh, that is happening in America today. Emma sent five dollars as if Cameron couldn't get any cooler; is he actually related to Aaron Burr? How do you guys feel about the musical Hamilton? Apparently Burr's last words were a reluctance to discuss his atheist beliefs. Okay.

### **Cameron MacGregor**

[ 02:15:41 ] I am related to Aaron Burr and Hamilton. My God. You know, I was in I was in a cafe back. This is 2017, right after Trump was elected, I think it was 2016 or 2017. And some lady came up to me and somehow I think she was reading a book about Aaron Burr or something. Anyway, came up and I mentioned that. And then I said, you know, he killed, he shot Alexander Hamilton. And then she said, oh, well, have you seen Hamilton? Thing had a heart attack right there; it was great that is so funny, oh my gosh!

### **Rebecca Hargraves**

[ 02:16:18 ] So this is actually not counting the backlash that's correct, we this is so we, we nicked 20, 000 live viewers, that is absolutely astounding.

### **David J. Reilly**

[ 02:16:27 ] I hate to be like looking at that, I just cannot believe this, I think we got to give a special shout out to DdG Sarah, this would not be happening without this would not be happening without the DDGO poll people, thank you very much, big shout out! We've got big things coming; I think I think I might even go into, like, Iraq with them. That would be so cool. Which would be really cool. A real Ubermensch sent \$25. Juice will not replace us. Very true. I will not be replaced by orange juice, apple juice, cranberry juice. Not happening. You

have a UTI, buddy? Expat, maybe. Sent \$5. Cameron, should I spend six grand to travel to Uruguay and attend Doug Casey and Matt Smith's October conference to learn how to become an expat there?

**Cameron MacGregor**

[ 02:17:09 ] Hmm. I may or may not know those guys. And I have been to Uruguay.

**David J. Reilly**

[ 02:17:18 ] No, boy.

**Cameron MacGregor**

[ 02:17:19 ] I'm not going to give you financial advice. You do what you think is best. But I would say I would invest my time somewhere else.

**Rebecca Hargraves**

[ 02:17:26 ] I've heard that from other people.

**David J. Reilly**

[ 02:17:28 ] I don't even know who these people are.

**Rebecca Hargraves**

[ 02:17:30 ] That may or may not have done an in-studio interview.

**Cameron MacGregor**

[ 02:17:32 ] Doug Casey is a big gold bug who made his fortune by going. He basically invented nomad capitalism. So he went to countries like Argentina and Thailand and became an entrepreneur and an investor and built a life outside of the United States. I don't have anything against Doug Casey or Matt Smith. But where I stand on this is: This is our country. This is our homeland. You can't recreate that wherever you go. And you can take that from me. I've lived all over the world. And you have a lot of people that pretend, oh, I can just I can just uproot myself and drop myself. in Tulum, Mexico, and ignore what's happening in the world. There's no future for that. The future for all of us is in our own community. It's in our own country. All we have to do is fight for it. And I think we will. If we fight, we will win and we'll take everything back. I don't care what the numbers say. We're smarter, we're better, we're more capable. We just got to get engaged. And I think that's happening. So no, I would focus on how you can this mess of a country by joining other people, by joining what we're doing here on The Backlash.

**David J. Reilly**

[ 02:19:10 ] farmland it's pretty there it's the the last frontier that was just settled like a hundred years ago and it's like nah this is where it's at man this you know the the rolling fields the farmhouses the cows the the you know um come on the hay bales whatever but i mean there's something special about it that you're not going to get in south america that you're not even going to get in russia right uh it's not our country it's not our home this is

our home this is our home and we have to fight for it anonymous sent five dollars if you were offered the head of the Iranian Revolutionary Guard 10 million dollars a year would you take the job if so why or why not is the reason you wouldn't have enough time to spend the money.

**Rebecca Hargraves**

[ 02:20:00 ] That couldn't possibly be a question for me. Is that for Cameron?

**David J. Reilly**

[ 02:20:03 ] I don't know. I think it's a question for me. If I were offered the head of the Iranian Revolutionary Guard \$10 million a year, would you take the job? Well, considering that the head of the Iranian National Guard, two of them have been assassinated in the last week. No. Probably not. Also, Iran ain't my country. America is my country. So, I would probably want to stay here with my family and do something here. Book Track Groove sent \$10 on Rumble. I have not seen these videos of Gaza you are talking about. Could you please send me more information on that, please? I heard the exile king of Iran is coming back. Do you think it's possible? David, lemon coffee. What's that? What's lemon coffee?

**Rebecca Hargraves**

[ 02:20:45 ] I don't know.

**David J. Reilly**

[ 02:20:46 ] Book track groups. If you're on Twitter, shoot me a follow, tag me. We can DM each other over there.

**Rebecca Hargraves**

[ 02:20:52 ] Sounds good.

**David J. Reilly**

[ 02:20:53 ] I'll send you some of these videos. The videos of the missiles striking Tel Aviv. But the king, yes, sorry, ADD brain, I just had an ADD brain episode. Yeah, they are trying to prop up Reza Pahlavi to be the new successor for the Ayatollahs over in Iran. This is becoming more and more clear. Pahlavi, let's see if I can spell correctly. Uh-huh.

**Cameron MacGregor6**

[ 02:21:28 ] Uh-huh.

**David J. Reilly**

[ 02:21:29 ] Yeah, there he is. Reza Pahlavi. Whoa. Whoo! Sorry, that was a little loud.

**Rebecca Hargraves**

[ 02:21:37 ] Oh, gosh.

**David J. Reilly**

[ 02:21:39 ] Reza Pahlavi getting ready to take over the kingship of Iran by kissing the Wailing Wall in Israel. It's very clear. Very clear who the Jews want to, uh, replace the Ayatollah.

### **Cameron MacGregor**

[ 02:22:01 ] Yeah, that's not going to work. Yeah. One thing that's important to note, when you get into these end-of-cycle kind of moments, which is what we're in right now, you get wars overseas, you get financial panics and so forth. Traditional relationships break down. So an example of this we saw with the tariffs and the sort of tumult that it created in the stock market. A lot of the MAGA people, I call them Trump-tards at this point, but a lot of the Trump-tards said that this was planned and that the result would be that the stock market would fall and the bond market would actually rise, meaning that the baby boomers would shift their portfolio away from stocks and they would buy bonds which would reduce interest payments for the U. S. government, right? It would essentially alleviate the fiscal strain and that the dollar would actually get stronger because people in a panic would fly into dollars. Well, guess what? None of that happened. Not only did yields rise because nobody was buying bonds, and for God's sake's, who would? But the dollar also fell. Why? Because a lot of foreign investors are leaving the dollar. Well, why are they doing that? Because this is not 1990. Right. We're at the end of this fiat bubble. It's beginning to collapse. And that's exactly what you're going to see in Iran as well. The assumption is, well, this is Iraq all over again. The regime will fall, will devastate the country, will install whoever we want, paper over it, and then Israel will reestablish its hegemony over the region. That's not the way this is going to go. We're in a storm of emotion. This is a spiritual war, as Rebecca said earlier. It means that they're not going to respond to incentives and disincentives. It means that things like identity, which are transcendent, are going to be all powerful. That's also going to happen in the United States.

### **Rebecca Hargraves**

[ 02:23:56 ] Absolutely.

### **Cameron MacGregor**

[ 02:23:57 ] That's how we win.

### **Rebecca Hargraves**

[ 02:23:58 ] It's funny that you brought that up because that Mother Jones journalist, who, against my better judgment, I'm developing a friendship with on Twitter. He was asking me about Van Nuys today. That's the name. Van Noy. Van Noy. Whatever. And he was asking me about his motivation and things like that. And I was thinking like people like Donald Trump and other people that they're attached to these carnal incentives. You can take away those incentives, but somebody like Zionist Christians, they're arguably they're worse because you can't take away those incentives. They're spiritual. They're powerful. Yeah.

### **David J. Reilly**

[ 02:24:36 ] And they're preying on old people as they're dying to convince them that the

rapture is around the corner. That they will leave you everything in their will.

**Rebecca Hargraves**

[ 02:24:47 ] But that's a carnival. I understand that incentive. Right. I get that. Right.

**David J. Reilly**

[ 02:24:51 ] No, no. A lot of these Zionist preacher people and followers are, I just think, possessed by the devil. Probably. But these boomer Christians. Deeply spiritually sick.

**Rebecca Hargraves**

[ 02:25:01 ] These evangelical Christians, they believe that shit. They believe it. We'll see.

**Cameron MacGregor**

[ 02:25:07 ] Their faith will be tested when they start seeing American sailors and servicemen die in another bullshit, war. Yeah, their faith is going to be tested when their 401ks and their pension programs blow up because of a massive fire sale of treasury bonds; their faith is going to be tested. We'll see what they do.

**David J. Reilly**

[ 02:25:25 ] True. And yeah, here's the bonds right now-still very elevated. They are not dropping; they are continuing to be high. And yeah, I don't know. I mean, go listen to the Jack Mallers podcast-very good stuff. Anyway, Robert sent \$25. So if Trump drops multiple penetrator bombs into a nuclear facility causing massive fallout in order to help a fraud country that just got caught firing tank shells on a refugee soup line, who's next on the regime change list? My money says, Pakistan.

**Cameron MacGregor**

[ 02:25:57 ] Yeah, this is a good question because this is exactly the sort of fear that this action is spreading across the world. So, I read an article that I think I sent to Rebecca in one of the Russian news outlets. They basically said that they believe that this regime attack, this illegal war in Iran is a dress rehearsal for an attack on Moscow. Now, I don't believe that that's the case. I really don't, for all kinds of reasons. But it doesn't matter anymore. The United States is perceived as a belligerent power. Donald Trump is now perceived as an unreliable, deceptive, bad actor. And so is the country. deviated so far, so extremely for power, that's a rogue state.

**David J. Reilly**

[ 02:27:00 ] Yeah. We've got a super chat that I'm very much like. This is from Galting, who sent \$5 on Rumble. Anyone taking Bitcoin before the stream ends or talking Bitcoin before the stream ends?

**Rebecca Hargraves**

[ 02:27:15 ] Dude, I will give you your \$5 back. I don't give a shit.

**David J. Reilly**

[ 02:27:19 ] Yes, we are going to talk just a little bit because we're coming up on three hours, guys. We have our super chat uh platform at the Backlash. Net slash super chat the green one at the bottom don't do that to me the green one at the bottom brings you to an app that we actually made this thing is proprietary we uh you say we a lot we we made this the backlash made this app you can donate to us i did it with no intermediaries it is on chain there's nothing stopping it there's nobody taking any percentage out of it and we got one on Monday that I'm too read now. Unconventional but sensible. Two weekly and twice weekly.

**Rebecca Hargraves**

[ 02:27:58 ] Amazing.

**David J. Reilly**

[ 02:27:59 ] And they paid for that with Bitcoin on our crypto super chat app.

**Rebecca Hargraves**

[ 02:28:04 ] Because of my bi-weekly struggle. Yes.

**David J. Reilly**

[ 02:28:06 ] So if you want to donate crypto to the show, you can do that here. You could also do it on our Bitcoin fundraiser on our website. It's under support the show. We have had a couple of people donate, but we are always, of course, looking for more. And we have some affiliates that we would like to plug. Blockstream, we have an affiliate link if you need to secure your Bitcoin, if you want your private keys. Because I don't know if you saw this or not, Blonde, but this is kind of a big deal. They erased all databases of SEPA Bank in Iran. No ATM transactions. Everything totally gone. So this is the equivalent of the fiat currency of Iran just disappearing overnight. This is one of the things that this just happened yesterday. It's one of the things that the Israelis are using as an attack on Iran. And guess what? If they were on Bitcoin, they would still have their shit. So please check out Blockstream. You can buy a hardware wallet there and also on our website under affiliate links. If you are looking to buy Bitcoin, You can do that with our friends at River Bitcoin. They are hands down the best Bitcoin exchange. And when you sign up with our affiliate link, we do get a small little kickback. And I think you might actually even earn extra Bitcoin up to \$100.

**Cameron MacGregor**

[ 02:29:41 ] Yeah, just one thing on this cyber attack too. Look, if this could happen inside Iran, that can happen in the United States as well.

**David J. Reilly**

[ 02:29:49 ] Yes.

**Cameron MacGregor**

[ 02:29:50 ] And if this war rages on, which is what we're all expecting, then you're going to see interest rates rise. And if interest rates continue to rise, you're going to see a banking

crisis, which is something else we've talked about happening on this show. How do you deal with that? Gold and Bitcoin. OK, so now is the time to pay attention. There's been a lot of reporting over the last six months about Bank of America in particular. I think Bank of America is the second largest bank in the United States behind JPMorgan Chase. Bank of America splurged on U. S. Treasury bonds in 2020, thinking that it was a great buy because treasury bonds are pristine collateral. They're backed by the U. S. government, and that interest rates would stay low. Well, needless to say, that hasn't happened. So they're carrying, I think, close to a trillion dollars in unrealized losses. At some point, the baby boomers who bank with them are going to figure that out and there's going to be a banking crisis. Again, how do you deal with that? Bitcoin and gold. So be prepared. Now is the time to engage.

#### **David J. Reilly**

[ 02:30:54 ] I'm telling you that Bitcoin's going to a million dollars tomorrow. If there is serious escalation in the Middle East, everything is going to take a hit. Bitcoin will take a hit. Gold may not. Gold might go up. Maybe some oil stocks will go up. But you're definitely going to see a sell-off in equities. But now is the time to start figuring this out. Figure out ways to be self-sovereign. people whose first exposure was j-proof oh their first exposure was like a rug pull on some shit coin all i don't know if you get rug pulled on a shit coin it's your own fault buyer beware i feel bad for these people and i am just here to tell you that bitcoin is different and please educate yourself uh and use the links in our website thebacklash . net We can help you secure your financial future, whether it's gold, whether it's Bitcoin, whether it's knowing tomorrow's news today. We got you covered at thebacklash . net. I fucked it up again. I went into the Donald Trump voice. Why do you do that? I don't know. Anonymous sent \$5. As white advocates advocating for anyone else but Trump is madness. Your fates are intertwined. Every other candidate would let in 20 million people from Africa to flood the ballot box. Can't you just let Iran go? Who cares? Is this a joke? I know. Wrong. Wrong.

#### **Rebecca Hargraves**

[ 02:32:23 ] You sound like John McLaughlin.

#### **David J. Reilly**

[ 02:32:26 ] Anonymous sent another \$5. Continuing on from my last post, Jews don't care about you. If they did, you wouldn't be here. Jews have bigger fish to fry than some losers in Idaho, and you should be thankful that their interest in the alt-right has completely abated. This is Spokane Zionist guy. That's where you're wrong, Matt. That's where you're wrong, Matt. And you see, you can tell very quickly. It is. Yeah, it's him. That it's him. Because only- Please send us your money. I know, right? Thank you for the \$10.

#### **Rebecca Hargraves**

[ 02:32:54 ] Only a hubristic Jew would think that.

#### **David J. Reilly**

[ 02:32:57 ] I think we've got like several more. Oh, good.

**Rebecca Hargraves**

[ 02:32:59 ] Keep reading.

**David J. Reilly**

[ 02:32:59 ] Let's go. Anonymous sent \$5. How much do I have to pay for Cam to give Israel the win? The Iranian military command is dead. Why should the Iranian population rise in support of the dead losers who have been stealing from them for 40 years? Advocating for some evil folk is evil. Oh, God. Oh, Matt, please. The navy that you know, the readiness levels in the U. S. Navy is a joke. Planes fall off decks, SM3s are shooting down our own planes. The only air force that can get the F-35 to work is the IDF. This guy is nuts. Do you know how many F-35s Iran shot down this week? Like four. Matt, keep sending us money, buddy.

**Cameron MacGregor**

[ 02:33:46 ] For those of you who want to learn more about the readiness state in the U. S. Navy in particular, there's a GAO report that was released in 2023. And to say that it's damning is an understatement. So and I put out a lot of content on this because I was in the military. It's look, it gives me no pleasure to say it, but we got to tell the truth and we got to prepare you for what is to come. And remember that this is not just about deindustrialization. And this is not just about old equipment or doctrine. The Navy is a diversity factory. And DEI, you know, it's been said before, war battles don't care about diversity principles. And we're about to see that.

**David J. Reilly**

[ 02:34:27 ] Yeah, no, 100 percent. And Washington Joyer sent five dollars. I was rather dejected when the Israel chaos erupted, frustrated with the. Inertial feeling of it all, yeah, or is that initial feeling? I don't know; inertial, initial...

**Cameron MacGregor**

[ 02:34:42 ] I could see both ways, no; I think he means inertial because you can't... It's like gravity, you're just being pulled, yeah, yeah.

**David J. Reilly**

[ 02:34:48 ] But I've taken solace in that Cam has been predicting this and more importantly, that it's necessary for a real right wing to emerge absolutely, yeah, and that's why that's why our live stream is growing because more and more people are saying And once you know the truth, once you see the truth, once you see through the matrix, you can't go back. You're done. You know, when the mind latches on to truth, that's it.

**Rebecca Hargraves**

[ 02:35:20 ] Anyway, I'm not going to go back; no, no, it's like finding out about Santa Claus. There's no going back.

**Cameron MacGregor**

[ 02:35:23 ] I'm sorry, Rebecca, go ahead.

**Rebecca Hargraves**

[ 02:35:26 ] Oh, no, it's like finding out about Santa Claus. You can't just go back to the life and the lie that you had before. There's no way to do it.

**Cameron MacGregor**

[ 02:35:34 ] Yeah, look, you can go to Blonde in the Belly of the Beast YouTube channel and you can go back 10 years and watch her content. Dave has content that goes way back to these guys have been at the front at the vanguard of these conversations for a long time. And it hasn't been easy on their family, on their friends, on their bank accounts, on their careers. You guys, just as much as Trump and Trump likes to take credit for everything, sort of mainstreaming these ideas that were viewed as kooky for a long, long time. Well, it doesn't sound so kooky anymore now, does it?

**David J. Reilly**

[ 02:36:13 ] No, no. And it's so funny. Oh, that's getting me a little emotional. Have you seen all those, the nothing ever happens memes? Like, oh, look what time it is. And it's nothing o'clock or whatever. And I've been seeing them go around with, look what time it is. It's Nick was right o'clock. Oh, yeah. So God bless Nick Fuentes too. He has been targeted for assassination. He had someone show up at his house. He has also sacrificed a lot. And man, he has helped to move the ball down the field so far. Can't say enough good things about America.

**Cameron MacGregor**

[ 02:36:46 ] One other one other thing, too, is that, you know, part of the problem with war is that it's the friction, right? It's all these things that you can't anticipate that then catalyze one another. It sort of feeds on itself. This is why anybody that's been around real veterans and I have, I've met people that served; they will universally tell you the same thing. If you can avoid it, you avoid it at all costs, because once it starts, it gets out of control. And we've made a lot of predictions on this show. All right. We've talked about war with Iran. We talked about war with Iran six months ago. You can go back and look at our look at our videos. It's there. That will catalyze a war with Mexico, which is unfolding in the streets of L. A. as well. So all of these things are sort of feeding on one another. And then, of course, we talked about the trade war. Of course, I think a lot of people expected that. But these things can get out of control very, very quickly. And I think that's what's happening. Yeah. Yeah.

**David J. Reilly**

[ 02:37:45 ] You know what I need to do if my dad is still watching? He might have gone to bed. It is a little late on the East Coast. But I remember my dad talking about war with Iran in 2007, 2008, when he had he owned a bunch of radio stations. He did the morning show. Yeah, that definitely is why. Is Edom, meaning Europeans. So true. You know what's up. You know about Edom and Esau and Jacob and Mount Zion versus Rome. This is ultimately what it's all about. Anonymous sent \$5. I, for one, really underestimated Iran's missile strength at the beginning of the war. I expected them to run out of missiles by Friday, but it turns out

they will run out by Saturday. Truly a first-rate power. Hope Israel. Yeah, really. Notice you guys exist, uh, I guess that was Matt again, uh, thank you very much, I agree with Cam on Iran having the best air defense in the world, shooting a propeller-powered drone out of the sky is next level stuff, plus that 50-year-old F-14 exploded while waiting for parts on the runway shook me to my core, holy shit! How much money is this Zionist giving us tonight? Anonymous sent five dollars. Watching that Iranian woman waddled away in her hijab made my day; that's what those terrorists get for keeping their population as hostages and spending all of their Thank you.

**Cameron MacGregor3**

[ 02:39:43 ] Thank you. We appreciate it.

**David J. Reilly**

[ 02:39:45 ] We do. We will definitely spend that on some good stuff, maybe some equipment. \$50 club. Reinhardt's and 50 bucks. Love you guys to death. I'm going to catch this episode on the way to our super secret Nazi meetup. We're flying down the road at 1,488 miles an hour. I know where they're going.

**Rebecca Hargraves**

[ 02:40:22 ] Reinhardt was not super happy with us on Monday. What do we do? Oh, the interview. Oh, relax. My friend Robin, I shouldn't say this. She texted me and she goes, 'I got to say, I love this brown faggot.'

**David J. Reilly**

[ 02:40:35 ] Yeah. Listen, take it or leave it. I think we should listen to people of all backgrounds.

**Rebecca Hargraves**

[ 02:40:41 ] No, I found him just so undeniably charismatic. I just had the most fun interviewing him. It was just so fun.

**David J. Reilly**

[ 02:40:49 ] Anonymous sent \$5. This is another one. Do you not realize that you formed an unwitting coalition with people who would ban you from every platform when they take control? That TikTok liberal woman would see you all banned and debanked. When you have no money, would you argue it's worth it? Buddy, this is why you Bitcoin, retard. Anonymous sent \$5. End of Israel? Why not the end of France? Why does Israel always have an asterisk on its existence? We existed from 1948 to 1972 without American aid. Bullshit.

**Rebecca Hargraves**

[ 02:41:21 ] Bullshit, yeah.

**David J. Reilly**

[ 02:41:22 ] True white advocacy would be ambivalence about Jews and forming strong

communities. You see how subversive these people are?

**Rebecca Hargraves**

[ 02:41:29 ] Why don't you stay out of our country? Stay out of our movement. Move to Israel. I'm not just talking about Israel, which only exists because of the United States. But you, as an individual, you only exist because of us, because of our content. What does that feel like to you?

**David J. Reilly**

[ 02:41:47 ] Home. He runs this account. It's at Spokane Zionist.

**Rebecca Hargraves**

[ 02:41:50 ] And all he does is read what we do.

**David J. Reilly**

[ 02:41:52 ] All he does is clip our show and promote it. I have had so many people reach out to me because they like stumbled on Spokane Zionist.

**Rebecca Hargraves**

[ 02:42:02 ] Wait, are you Spokane Zionist? No, I'm not.

**David J. Reilly**

[ 02:42:04 ] This is all a ruse. We were talking about needing to get a clipper. Maybe this guy, I mean, maybe he'll pay us to clip our show. This is great, you know. Anyway, please, Anonymous, keep sending in that Jew money. We love it. And I start rubbing my hands. Anonymous sent \$25. Thank you for your time and work. Great show.

**Rebecca Hargraves**

[ 02:42:24 ] Thank you so much. We really appreciate it.

**David J. Reilly**

[ 02:42:25 ] You're a real one. Anonymous sent \$10. Matt Christensen only has 290 views. Oof, that isn't good.

**Cameron MacGregor**

[ 02:42:34 ] Rebecca, is that because he's just still like conning?

**Rebecca Hargraves**

[ 02:42:39 ] Oh, yeah.

**Cameron MacGregor**

[ 02:42:40 ] Big time.

**Rebecca Hargraves**

[ 02:42:41 ] Big time. And then he replaced me with a homosexual black guy. Yeah. So I don't know.

**Cameron MacGregor**

[ 02:42:47 ] It's interesting. I think Dave told me this, but didn't Charlie Kirk have a poll on his channel about war with Iran? Yes. 90% said no. Yes.

**David J. Reilly**

[ 02:43:00 ] Yeah. I don't have it; I don't have it up. And Charlie tweets way too much. So I'm not going to be able to find it. But they put out a poll yesterday or two days ago. Would you support war with Iran? And it came back like 500,000 votes. 95% no. And then he immediately scrambled to do damage control and be like, oh, I'm not for regime change and I'm not for war, blah, blah, blah. But everybody knows.

**Rebecca Hargraves**

[ 02:43:26 ] Everyone knows. Who butters your bread, Charlie? Well, you have to think Devonstack, of course, does the best analysis about this, but you have to be skeptical about people that really want to be recognized by mainstream media, even alternative media. So like Matt did the tenant thing because he thought he was going to go mainstream. He deleted all of the videos that we've done together because he thought it was a liability. But what's really happening is that his audience is collapsing because he's not confronting the number one issue of our time. Right. Yeah.

**David J. Reilly**

[ 02:43:57 ] We got an almost \$50 donation. Thank you. \$49. 65 cents from Mr. James Rhodes. I, for one, enjoyed Basil's appearance on Monday's show. You guys are doing great. Thanks for having on interesting guests; I had not heard of before.

**Rebecca Hargraves**

[ 02:44:14 ] We really appreciate it, yeah.

**David J. Reilly**

[ 02:44:15 ] We appreciate you taking the time to watch. It's wonderful. Scythian Rabbit sent \$3, Cam. If only I need to pick a pronunciation; Iran. It's Iran. Iran. Iran.

**Cameron MacGregor**

[ 02:44:27 ] Do you know what Iran means? Just real quick. Do you know what Iran means, Dave? Aryan. Aryan. That's right. Very good.

**David J. Reilly**

[ 02:44:34 ] Cam, if Iran were to enact a policy that no ship conducting trade dominated in the USD could enter or exit the Hormuz, would the USD and by extension the U. S. economy crater? By the way, tell Blonde she looks hot.

**Rebecca Hargraves**

[ 02:44:48 ] Oh, get out of here, simp.

**David J. Reilly**

[ 02:44:50 ] Cam.

**Rebecca Hargraves**

[ 02:44:50 ] I'm just joking.

**Cameron MacGregor**

[ 02:44:50 ] No, I don't think it would crater. We're relatively insulated in the sense that we domestically provide our own energy, right? Our oil, our natural gas, so forth and so on. accelerate global recession or intensify global recession. And as I said, the majority recipient of that oil and natural gas is China and other countries in Asia. So it would cause real problems internationally. And then that could cause downstream effects to us. That could affect our trade negotiations with China. So I don't think it would be detrimental, at least not to us in the immediate sense, but it would just catalyze a worsening of the global economy. Inflation would probably get worse. My guess is that while we have the energy supply, it might take some time to make up for the 20% that's offline temporarily or disrupted. So it would be at a minimum inflationary and it would intensify a global recession. But I think we could weather the storm. Now, if things get worse, if there's escalation of violence, if our ships are sunk, that's when things get really dicey. And as I said, I think that's where we're headed.

**David J. Reilly**

[ 02:46:03 ] Only that, but to add on to that, you know the Straits of Iran has threatened to close the straits before, and when they first started doing that, I think something like 35 to 40 percent of global, like oil and liquid natural gas, was flowing through the straits. Now, that is down a bit to maybe 25 percent, so the more they threaten uh to close the straits, the more they kind of decentralize from that. And I believe Saudi Arabia also recently opened a pipeline that kind of bypasses the whole thing from Oman to the other side.

**Cameron MacGregor**

[ 02:46:43 ] But Iran is, you know, you got to understand what's happening here is that Israel is the provocateur and they have been more or less. I mean, certainly the last several decades, we know about that. But especially since October 2023, Israel has tried to escalate into a major conflict with Iran. OK, now, as we said at the outset, that they've fixated on the nuclear component, but really they want regime change. And the genesis of this anxiety, this insecurity, goes back to the Shah falling and the rise of Ayatollah Khamenei in 1979. That was the turning point, because Iran and Israel were not necessarily on bad relations for a lot of their history, okay? It was after that 1979 revolution. Things have completely changed in the sense that Israel is desperately trying to provoke Iran. But Iran sort of takes one step forward, then another step, and then another step. So it seems to me that they've actually handled this pretty well. And part of the reason I think so, or I think they have, is because

they're also trying to court international opinion in their favor. Whereas Israel said, 'fuck international thinking or fuck international consensus.' We don't care. They basically said, 'if you don't agree with us, you're an anti-Semite, right?' Iran has taken a very different track, and I think it's served them well. So they are slowly escalating. If this gets into a full-fledged war, they'll target our forces. They'll target oil pipelines across the Middle East if they have to, because then it will be about survival and nothing else. Let's hope it doesn't get to that point.

**David J. Reilly**

[ 02:48:26 ] Yeah, no, you're right. Uh, MGD sent \$50. Our country is being raped by gay Satanists and I can't take it anymore. Amen. Amen, buddy. You are on point. No, the power? No, no, no, no. No, it doesn't. There's no integration there. We got to get an API for that or something.

**Rebecca Hargraves**

[ 02:48:49 ] It lacks integration?

**David J. Reilly**

[ 02:48:50 ] It lacks. It is disintegrating. Blunderbuss sent \$25. Shiloh was close to \$800,000, but I'm not sure she'll get there. That's okay. She did great. I think she got. A lot. Damn. Over \$700,000.

**Rebecca Hargraves**

[ 02:49:08 ] All I have to say is the N-word. Wow.

**David J. Reilly**

[ 02:49:11 ] Unbelievable. GVS sent \$100. Thank you for the big super chat. Keep up the great work from Montana. Well, thank you very much. Let me check to see if there are other entropy chats that we are perhaps missing. And it doesn't say that there are. Let me go back to power chat. I think there may be one or two new ones. I bet Tim Pool has accidentally gone into the shower with his hat on.

**Rebecca Hargraves**

[ 02:49:46 ] Probably, I guarantee it.

**David J. Reilly**

[ 02:49:47 ] Bruh. I bet he swims with it on.

**Cameron MacGregor**

[ 02:49:49 ] Has he always worn the beanie? Is that like part of his look? Well, he's bald.

**Rebecca Hargraves**

[ 02:49:54 ] He has like horrible male pattern baldness, but like. Not in a sexy way, like Picard.

**David J. Reilly**

[ 02:50:00 ] Tim Pool beanie removed.

**Rebecca Hargraves**

[ 02:50:03 ] I like a bald man, too. It's just really unfortunate.

**David J. Reilly**

[ 02:50:07 ] I must say, if I can find the video.

**Rebecca Hargraves**

[ 02:50:08 ] He also does not have a head shape for baldness.

**David J. Reilly**

[ 02:50:12 ] I must say.

**Rebecca Hargraves**

[ 02:50:13 ] Oh, this is a famous video.

**David J. Reilly**

[ 02:50:14 ] This video. Oh, boy.

**Rebecca Hargraves**

[ 02:50:23 ] Good old millennial Matt.

**David J. Reilly**

[ 02:50:24 ] Yep. My godson. God bless you, Matt. Good job. Good work. And then Mechanized Doom sent \$20 on Rumble. Just a humble UPS driver in Silicon Valley watching the demographic change happen in real time. Thank you for keeping me sane on my route. Thank you for listening. I've had so many trucker types and commuter types that have reached out because they love listening to the long-form content.

**Cameron MacGregor**

[ 02:50:54 ] These guys, the truckers, the construction workers, the handymen, the plumbers, without them there is no country exactly you're not just some regular guy out there if you're listening to this what you do is everything it's essential um remember the socio-sexual hierarchy that we talk about right alphas betas deltas gammas and omegas the alphas are the sort of the sellouts that run the fortune 500 companies they're the chief executives and the betas are their lieutenants the deltas which is what you are they're the guys that get shit done without the whole system falls apart and they're the ones that have been screwed over the most by this system yeah True.

**David J. Reilly**

[ 02:51:37 ] Well, that does it. I think there was somebody that went on the crypto super chat

option and tried to send us a message that said, God bless, but they never paid. So we're not reading it out.

**Rebecca Hargraves**

[ 02:51:48 ] Oh, you son of a bitch. Thank you guys so much.

**David J. Reilly**

[ 02:51:51 ] Thank you for the massive show this evening.

**Rebecca Hargraves**

[ 02:51:54 ] I know this was a really, really fun time. Check us out. If you're going to be in Boise, come to our booth. We're going to be excited to see you at heterosexual awareness. Awesomeness. Why can I not get this right?

**David J. Reilly**

[ 02:52:08 ] Music. There's going to be beer. There's going to be soap. There's going to be.

**Cameron MacGregor**

[ 02:52:13 ] Is there going to be some late night streaking?

**David J. Reilly**

[ 02:52:15 ] I don't know about any late night. That sounds a little gay, Kim. I certainly hope not. That sounds a little gay.

**Cameron MacGregor**

[ 02:52:21 ] That was an old school reference. I guess I'm showing my age here.

**Rebecca Hargraves**

[ 02:52:24 ] No, no. You're only four years older than me than I am.

**Cameron MacGregor**

[ 02:52:28 ] Yeah, that four years, man. We're getting there.

**David J. Reilly**

[ 02:52:30 ] Oh, geez.

**Rebecca Hargraves**

[ 02:52:31 ] That's true. My husband's 44 and he just feels ancient.

**Cameron MacGregor**

[ 02:52:35 ] But you do get the reference, right? Yeah. You've seen old school.

**Rebecca Hargraves**

[ 02:52:39 ] Yeah, yeah, yeah.

**Cameron MacGregor**

[ 02:52:40 ] Okay, all right. I think I have homework.

**Rebecca Hargraves**

[ 02:52:42 ] You're like, I got a lot of shit to do. We got to watch old school. Thank you guys so much for joining us.

**Cameron MacGregor**

[ 02:52:48 ] I keep forgetting, Dave's like what? You're like 35? 36. 36. Man, baby. What a precocious young man you are.

**Rebecca Hargraves**

[ 02:52:54 ] I like how Dave's a precocious young man, but I'm empty egg carton, like granny blonde. I don't care.

**David J. Reilly**

[ 02:53:01 ] We don't make the rules, blonde. I know. Speaking of empty egg carton, Stefan Molyneux back on Twitter.

**Rebecca Hargraves**

[ 02:53:07 ] I saw, I did see.

**David J. Reilly**

[ 02:53:08 ] We'll have to reach out to him and see if we can get him on. You interviewed him ages ago, right?

**Rebecca Hargraves**

[ 02:53:13 ] Yeah, and he interviewed me. But then he famously dumped on me on Twitter. And then I tried to reach out to him and he ignored me.

**David J. Reilly**

[ 02:53:20 ] Oh, it's a new world. It's a new world. You think he's forgotten?

**Rebecca Hargraves**

[ 02:53:23 ] No, I don't think he has. You saw how big his head is. All of his secrets.

**David J. Reilly**

[ 02:53:27 ] Hey, be nice. Be nice.

**Rebecca Hargraves**

[ 02:53:30 ] We love you, Backlash audience. Thank you so much for getting us to 20,000 live viewers. I can't believe it. I'm so excited. We'll see you on Monday with Ryan Matta will be on.

**David J. Reilly**

[ 02:53:41 ] Ryan Matta. And follow us on Real Backlash on Twitter, Real Backlash on YouTube, Backlash Podcast on Rumble, and of course, all of our platforms are linked on the website.

**Rebecca Hargraves**

[ 02:53:55 ] Thebacklash.net.

**David J. Reilly**

[ 02:53:56 ] Thank you.

**Rebecca Hargraves**

[ 02:53:56 ] Thank you so much. See you later.
