

A Remarkable Dinning Experinece!

Design Concept

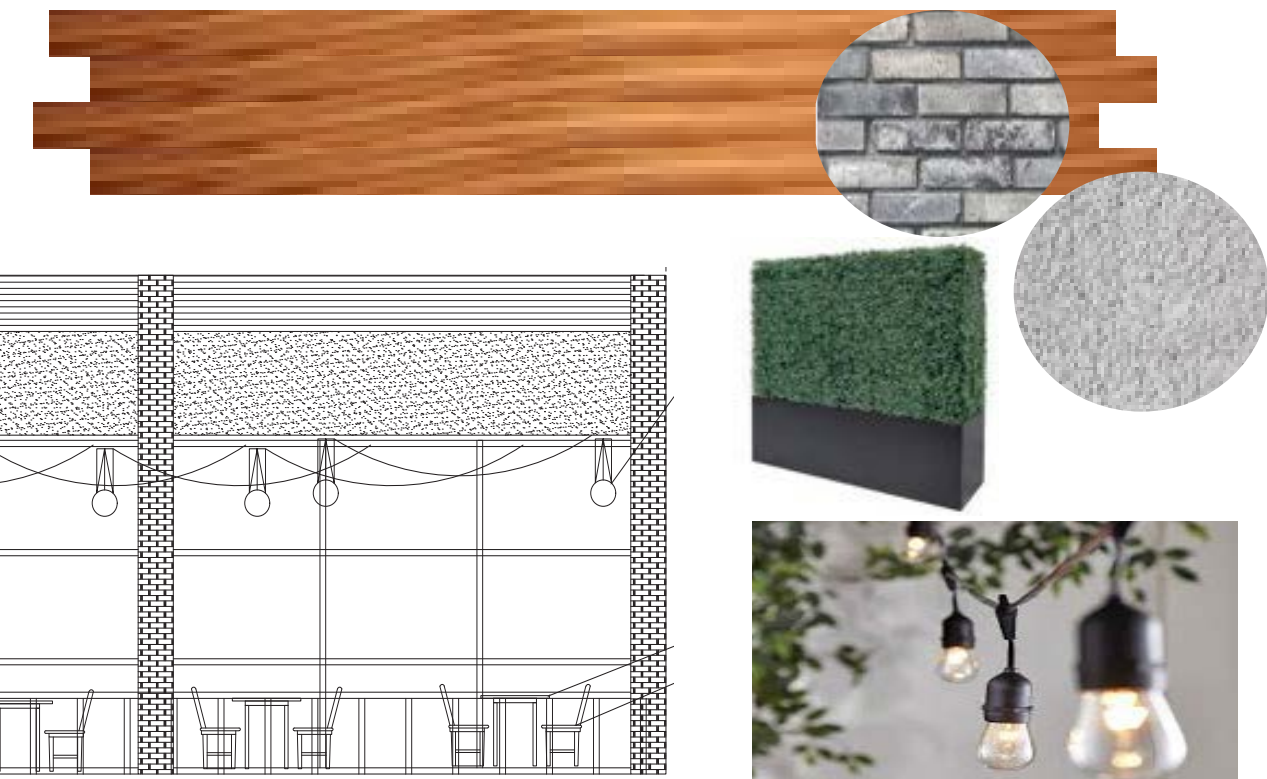

Objective is to create the restaurant space with luxury ambience and exquisite experience for customers.

Concept derived from the art deco style, where the gold is very dominant aspect of design in the space. However, the "Feathers" will have a twist of modern touch with the implementation of latest trends and textures.

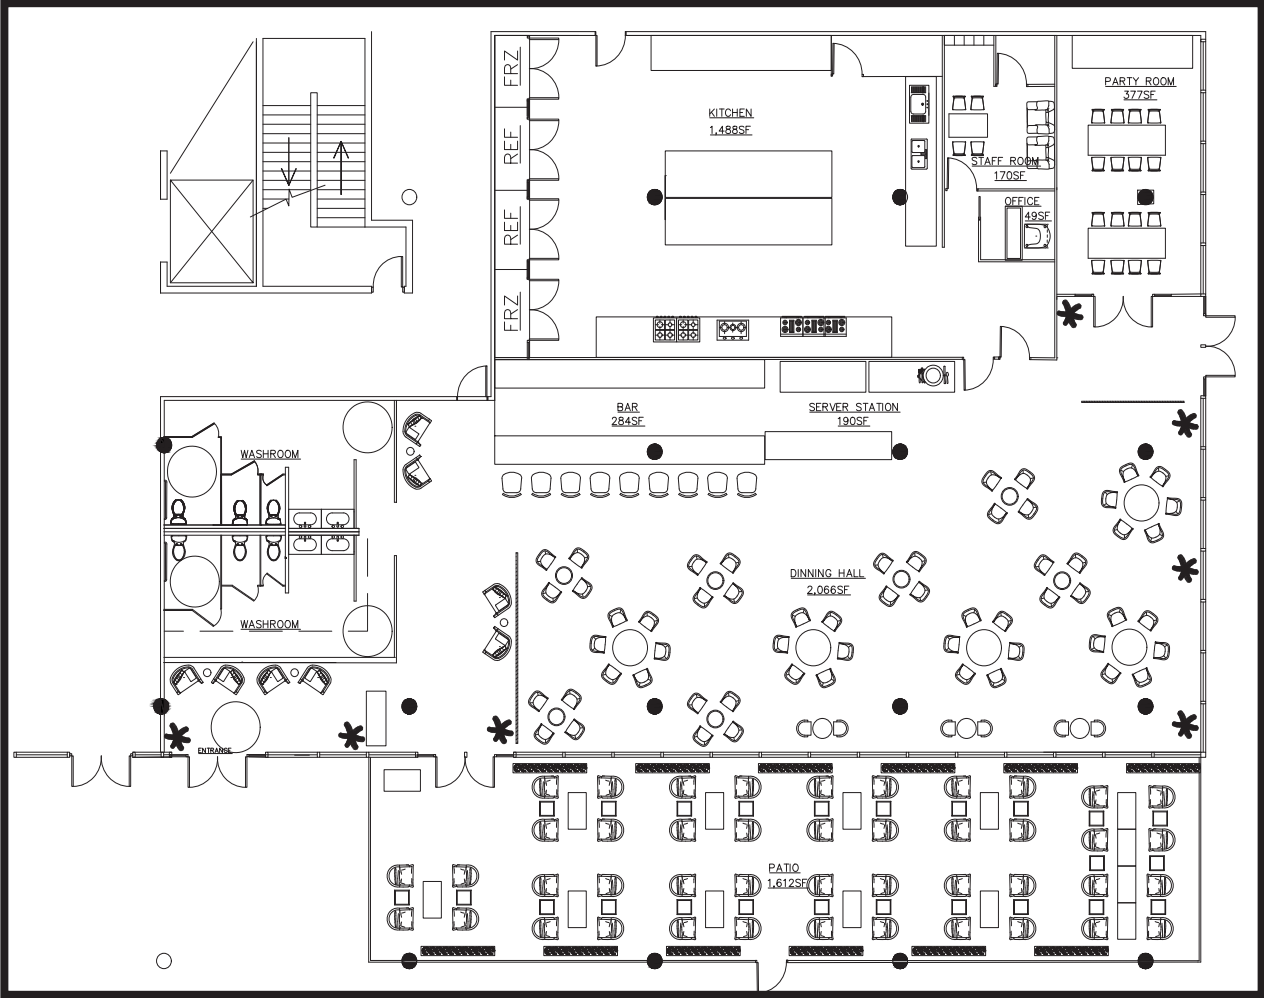

Warmth in the space will be induced with the dark tones of fabric and contrast of black and white. The presence of some accent and vibrant hues will create dramatic effects in the space. Gorgeous blend of black and gold lights will take the ambience of space into next level of luxury with accent lights throughout the space to complement different textures of accent walls and finishing. Combination of wood and tiled floors not only defines the spaces but also create the balance and harmony.

Modern Farm House

Design Concept

Modern Farm House is located at outskirts of Calgary city, offers the great views of mountains and acreage lot with ample space for young family to enjoy and grow. The concept to design this farm house is, to provide the space which is warm and cozy but have latest finishings. Wooden floors throughout the house brings harmony and provide the functionality at the same time. Furniture used is very minimalistic and warm tones of fabric entice the space together. Accent tables and chairs adds more depth and define the space throughout the house. variety of textures in different areas of the house with warm tones create a perfect family place to enjoy, gather and entertain.
