

REMEDIAL READING

The ability to read effectively and to truly understand what has been read is key to the future success of every individual. As such, it has been a central focus of the Akron Education Campus from its founding. Individual instruction allows us to adapt each program directly to the needs of the learner. The primary goals of this program are to develop in the learner an increased level of comprehension of what is read, enhanced vocabulary and spelling skills, and to enhance the individual's confidence and feeling of self-worth.

To enroll in an individual program in reading, contact or stop by the Akron Education Campus to schedule an initial interview/assessment session. Upon completion of this initial meeting, individual learning sessions will be scheduled. These sessions are typically 1/2 hour in length (although they can be scheduled for longer) and are usually scheduled for twice per week. As these are individual sessions; there is a great deal of flexibility in scheduling.
