

## HOMWORK HELP

The Akron Education Campus strives to ensure that all of our Tutoring/Homework Help sessions are worthwhile and beneficial for each of our individual learners.

The benefits of individual instruction includes:

1. An understanding adult can change a child's attitude toward homework;
2. Students' skills improve, their confidence increases, their interest in doing quality work improves, and their enthusiasm toward learning is heightened.
3. It helps students discover their strengths and encourages them to develop in areas that need improvement; and
4. There are plentiful opportunities for success, without a class full of students that make the process embarrassing.

It is not the function of the homework help sessions to simply complete the work for the student but rather to engage the student in the learning process, solidify the concepts presented and to provide a mechanism for the concepts to be truly learned instead of used then forgotten.

To enroll in an individual program of homework help, contact or stop by the Akron Education Campus to schedule an initial interview/assessment session. Upon completion of this initial meeting, individual learning sessions will be scheduled. These sessions are typically 1/2 hour in length (although they can be scheduled for longer) and are usually scheduled for twice per week. As these are individual sessions; there is a great deal of flexibility in scheduling.
