LEADERSHIP EXPERIENCE

About Us

Founded in 2019, Unidek Technologies Private Limited has grown into a trusted name in IT and office imaging solutions across Eastern India. While the company itself is seven years young, it is backed by a leadership team with over 25 years of combined industry experience, giving customers the confidence of deep technical expertise paired with responsive, relationship-first service.

We are proud to be an **Authorized Dealer** for several of the world's leading printer and imaging brands, allowing customers to purchase genuine equipment directly through us, backed by manufacturer-grade support and local, on-ground servicing.

Our Mission

At Unidek Technologies, our mission is built around one core value — **loyalty**. We believe long-term relationships are earned through consistent, honest, and dependable service. Every customer we serve becomes a long-term partner, not a one-time transaction — and we measure our success by how many of our clients choose to come back to us, year after year.
