THE VILLAGE OF ISLAMORADA

“THE FILLS” VISION MASTER PLAN

In order to protect public health and safety, conserve our natural and historical resources, facilitate appropriate resource-based public outdoor recreational uses and enhance our quality of life, the Village of Islamorada is carrying out a community-driven master planning process for the Fills. The master planning process is outlined on the next page and is

expected to result in the adoption of a master plan which can then be implemented to the benefit of Islamorada, its people, the State of Florida and all concerned. Please be part of this initiative and part of making Islamorada an even better place to call home.
