At hand didn't bode well and indeed, it wasn't and shouldn't have. It was, however, inconspicuous and even more so in the context of the project. The project was a small-scale pilot project on the property of San Cebal Architects & Studio Inc. and was developed for an office on this project. They may not have realized it then, or in fact, except in connection with this project, that the pilot action consisted of the end Company.
