

1. Plug USB into Mac computer. In Finder click the name of your drive. The example here is called "Offline Encyclopedia."

2. Double click the "Access Encyclopedia" folder.

3. Double click the Kiwix installer shown below.

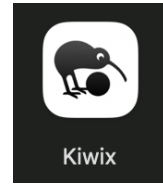

4. Click on the left-hand Kiwix. Once highlighted, drag it into the applications folder on the right.

5. Click on your Mac's Applications folder.

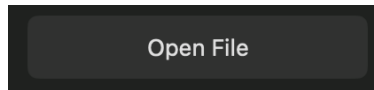

6. Double click the Kiwix App.

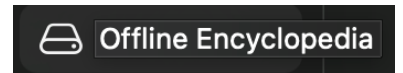

7. Once opened, click on "reading" found in the top left corner of the app.

8. Click "open file" seen in the center of the app.

9. Once Kiwix opens your Finder window, click the name of your drive again.

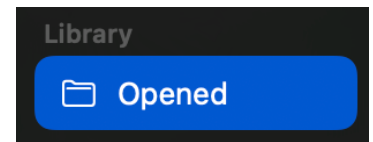

10. Double click "Access Encyclopedia."

11. Double click the file shown below.

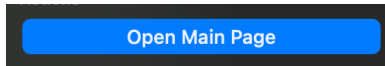

12. Find "Opened" in the Kiwix app and click on it.

13. Click on "Wikipedia."

14. On the right side, click "open main page."

15. You should see a welcome page. The entire Wikipedia is accessible offline.

Welcome to **Wikipedia**  
The free encyclopedia.
