

MEDVICE TOTAL SOLUTION

OUR TOTAL SOLUTION IS COMPREHENSIVE, CUSTOMIZABLE, AND COST-EFFECTIVE.

Comprehensive: We can oversee all of your clinical engineering needs from capital planning to managing medical equipment throughout its life cycle.

Customizable: Our leaders will work with you to develop a custom clinical engineering solution that fits your organization's needs and budget.

Cost-effective: Our proprietary technology, talent, and supplier networks allow us to create low-cost, high-quality solutions that minimize reliance on Original Equipment Manufacturer (OEM) contracts.

PLANNING

We provide guidance on how to maximize your current equipment inventory, identify gaps in your inventory, and help extend the life of equipment.

MANAGEMENT

We manage all aspects of clinical engineering, including equipment maintenance, parts, contracts, warranties, and regulatory compliance.

SERVICE

We provide 24/7 client support through multiple channels, and continually measure client satisfaction for performance and improvement.

PEOPLE

We create staffing solutions designed for your clinical engineering needs that include selection, deployment, training, and performance evaluation.

TECHNOLOGY

Our proprietary software helps you manage and track clinical engineering activity through closed-loop process documentation and versatile data reports.
