

Ask any preliminary questions not answered here or on the ready form at the bottom of this page. If you feel ready to get a kitten, fill out the questionnaire and send it to us.

We will email you back shortly and we can discuss further details and see if we all feel it's a good match and want to move forward. Then you place a deposit, which holds your place firmly on our list. We require in person allergy tests for anyone with an allergic household member, whether it's you or someone you live with.

Once you place your deposit you will wait for the next available kittens to be born and when they have grown for a few weeks you will be able to see them and come meet them. Kittens go home at about 12 weeks of age, finally.
