**ADDITIONAL QUESTIONS:**

**Did the commodity distribution vary from your original plan (in terms of the number/location of beneficiaries, distribution partners, monitoring, etc.)? If so, how?**

- NO

**Were the commodities of the quality and type that you anticipated? If not, please explain.**

- The further distribution of 4% Chlorhexidine that we have received cannot be continued because of the expiry date of the product (February 2017).

## UKRAINE MISSIONS

- The diapers in the boxes that are collected in bulk (without individual package) are problematic to distribute. The hospital refuses to take them because those diapers are non-sterile.
- Some medical equipment doesn't have necessary details which makes it more difficult to distribute it.
- Some of the wheelchairs have broken wheels. Having them repaired takes time and that is why hampers the distribution.
