## ADDITIONAL QUESTIONS

**1. Did the commodity distribution vary from your original plan** *(in terms of the number/location of beneficiaries, distribution partners, monitoring, etc.)? If so, how?*

*No, because we intended to donate it to other needy people outside the distribution area, we really want our field of work will be big to help the people in need.*

**2. Were the commodities of the quality and type that you anticipated? If not, please explain.**

*We thank you very much for the products we received, it was of good quality, we were able to get out customs without difficulty.*

**3. Other comments:**

*We would like to thank you, just we want to point out that for the shoes we had received it was good only soon we ask to take into consideration the big measures, and the clothes were too big because guinea people are thin, other than that, the distribution was well done thanks to our partners on the spot (the other NGOs)*
