Managing Director

COMPANY PROFILE & INTRODUCTION

QATAR uPVC WINDOWS + DOORS, a subsidiary of Jassem Al Thani & Partner Group (JA&P Group), was established in the State of Qatar in 1998 with the sole aim of providing high quality uPVC products and services to our customers in Qatar and abroad.

Qatar uPVC Windows + Doors is the leading manufacturer of uPVC windows and doors in Qatar offering quality facade, windows and doors solutions to the construction industry in Qatar and abroad (viz. Oman, Yemen, UAE) since the past 15 years. We have executed many high profile projects for both government and private clients. Qatar uPVC Windows + Doors has changed and adapted over the years to meet the needs of its customers. With our dedication to quality and experience gained over the years, along with our skilled personnel, we can provide a complete specialist solution for your facade, windows and doors requirements. It is because of this dedication, hard work and commitment to quality that we have grown in strength over a short period of time and have gained the goodwill and trust of our clients.

Our continuous research on the requirements of the market landed up in introducing a number of quality products which are well known in the market by its name and the services rendered. Qatar uPVC Windows + Doors is aware of the local climatic conditions like high humidity, wide fluctuating temperatures, severe corrosive atmosphere etc. Bearing these in mind our products are manufactured to suite the exact requirements of the Middle East climate.

Our company has a strong sales force backed with design and costing engineers for prompt response to enquiries and customer service. The company also employs experienced engineers, supervisors, designers, trained and committed work force to ensure consistent quality and reliability for the products that come out of our 3 fabrication lines.

Our fabrication facilities are located in the New Industrial Area covering a total factory area of 9,000 m² in a total land area of 10,000m². The fabrication facility is set up with the latest technology in assembly line production comprising of sophisticated state of the art CNC machinery imported from Germany and setup with a work force of around 75 full time hands on personnel in fabrication and 62 in installation. This has resulted in exceeding our daily production capacity of more than 3000m² per month, hence providing fast and timely deliveries on all orders.

OUR COMMITMENT TO QUALITY SERVICE

Qatar uPVC Windows + Doors, since inception in 1998, has completed nearly 5000 projects in Qatar and abroad which includes government sector clients such as Ministry of Interior, Internal Security Force, Qatar Armed Forces, Ministry of Foreign Affairs, Awqaf and other well reputed Private sector clients.

Following are our fabrication facilities that help us cater to the growing market needs at all times.

FABRICATION LINE 1: Fabrication and installation of uPVC Windows + Doors under the technical standards and expertise from VEKA AG - Germany, the world's largest uPVC Profile extruders and the world renowned quality profile, with fittings and accessories from SCHUERING Germany and WINKHAUS Germany.

FABRICATION LINE 2: Fabrication and installation of uPVC Security fence & gates under the technical assistance of M/s GEBRUDER KOMMERLING KUNSTOFF WERKE – Germany.

FABRICATION LINE 3: Fabrication and installation of uPVC Railing, fences and Gate systems under the technical assistance of M/s KROY BUILDING PRODUCTS INC. – United States.

“QATAR uPVC WINDOWS + DOORS HEREBY ASSURES THAT WE CAN HANDLE PROJECTS WORTH 30 - 40 MILLION QATARI RIYALS AT A TIME, WITH OUR ABOVE MENTIONED FABRICATION FACILITIES IN DOHA, QATAR”

QATAR uPVC WINDOWS + DOORS

QUALITY FOR LIFE

QUALITY POLICY STATEMENT

It is the policy of Jassem Al Thani & Partner Group (JA&P Group) and all its subsidiaries viz. Qatar uPVC Windows + Doors, Qatar Technology for Aluminium & Steel Co. W.L.L., Painting Division & Patibon to provide high quality products and services that far exceeds our customers' expectations at all times. We remain committed to Quality, because we believe that "ONLY QUALITY HAS A FUTURE". The company has developed and implemented its Quality Management System in order to:

Ensure that we set quality objectives and define, measure, analyze and act upon the results to achieve continual growth and improvement.

Ensure that we remain customer focused at all times.

The criteria for recruitment and training of personal are based on ability, experience, performance and professionalism to maintain the quality of product and its processing equipment at all times. The quality policy principles and objectives will be communicated and available to staff at all times. Training will be an integral part of the strategy to achieve the objectives.

To ensure that the policy is successfully implemented, staff will be responsible for identifying customer requirements, and ensuring that the correct procedures are followed to meet those requirements. We are committed to being the recognized leader in providing this competitively priced, high quality products & services meeting or exceeding our customer's needs through focused efforts on best services at all times.

This Quality Policy is a statement of internal discipline and the external assurance of our intention to provide the customer his total requirements on time with best services on each and every occasion.

UPVC PROCESSING UNIT – 3 NOS PRODUCTION LINES

1 PRODUCTION LINE

1. **DOUBLE HEAD Cutting Machine** – CNC Machine for uPVC Profile Cutting at 90 degree and 45 degree

2. **WATER SLOT Router Machine** – Machine for making Water Slots and ventilation

3. ROUTER & TRIPLE Spindle Machine - For Handles

4. REINFORCEMENT SCREWING MACHINE – For screwing reinforcements to Profile

5. DOUBLE HEAD Welding Machine – For welding the adjacent uPVC Profiles after screwing the reinforcements to UPVC Profile

6. CORNER CLEANING Machine – For cleaning and Making smooth finish on the welded corners

7. END MILLING Machine – For connecting transom onto frame, connecting 2 uPVC Profiles.

8. ARCH BENDING Machine – for making arch profiles / for bending

UPVC FABRICATION AREA

UPVC and REINFORCEMENTS STORAGE AREA

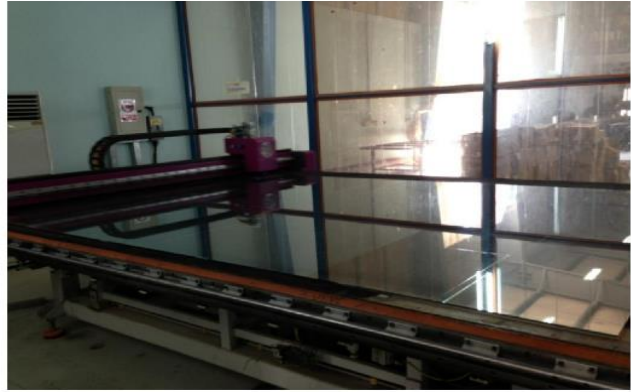

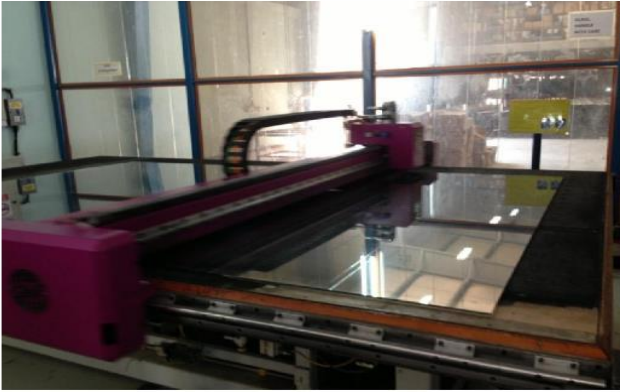

DETAILS OF PLANT TOOLS & EQUIPMENT

GLASS PROCESSING FACILITY

1. AUTOMATED Glass Loading Robot + Glass Racks – Glass stock sheets are loaded onto the stationary glass racks. The automated robots pick the glass sheets as per selection for loading onto the cutting machine

2. CNC GLASS CUTTING Machine – Glass sheets are loaded onto the Cutting table. The glass sizes are optimized on the CNC machine to minimize wastage and the glass is cut to desired sizes.

3. GLASS Washing Machine – The cut glasses are fed into the glass machine for cleaning and visual inspection.

3. DESSICANT Filler Machine – This machine fills desiccant molecules inside the spacer bars in the 12mm airspace between the two 6mm glass panes on either sides of the spacer bar. Desiccant molecules absorb any moisture.

- 1 No: Manual
- 1 No: Automatic

4. BUTYL Extruder Machine – Machine applies Butyl on either side of the spacer bar to fix it firmly onto the two glass panes on either sides in order to proceed for the double glazing process.

5. SILICON Application Machine (Manual) – The rotator table firmly holds the glass with vacuum and Silicon is applied all around the double glazed unit with the Silicon application gun.

6. VERTICAL Panel PRESSING UNIT + AUTOMATIC GLASS Sealing Robot - Automatic glass sealing robot carries out the final sealing of the insulating glass units, providing accurate sealing of the angles and assuring high operating speed.

DESIGN & COSTING

CONTRACT PROCEDURE

After a sensible negotiation with customer, the sales executive reaches a win-win situation in the project value.

Note:

- If there are any amendments in the quotation, the required revision details has to be mentioned in the copy of the previous quote, signed by the concerned sales personnel.
- Each revision must have new quote nos. for an example, if the fresh quotation no. was QA 001523 the revision nos. should be QA01523A, QA01523B and so

General Manager approves the final values and the changes in the design.

The Secretary of GM prepares the contract documents as per the final quotation.

Prepares the Shop Floor Drawing as per the final quotation for the customer approval

Sales Executive verifies the contract to make sure the quantity, design, value and the terms of payments are in line with the final quotation.

The Client signs the contract and makes the Initial Payment.

The Chief Accountant assigns a Job Number and creates a new Job File.

Copies of approved shop drawing/ Specification Sheet and Bill of quantity are passed to production Department.

Material Forecast to Store in-Charge

PRE-FABRICATION PROCESS

When the site is ready for the final measurements, the Sales Executive informs the company that the site is ready.

Production In-Charge takes the final survey in the presence of concerned Sales Executive.

The Final Survey Sheet must have:-

- ☛ Customer name, address & telephone number
- ☛ Exact measurements of the window opening
- ☛ Location of the window
- ☛ Profile Colour (if needed)
- ☛ Window/Door-shape & type (Hinged, Sliding, etc)
- ☛ Side to open (to open left or right)
- ☛ Additional Equipments (if needed)
- ☛ Date of survey

Documents required: - **1. Site Survey Sheet.**

Prepares detailed Job Cards for each workstation as per the Final Survey Sheet

Shop Floor

- ☛ Production List
- ☛ Profile Cutting List
- ☛ Overall Job Card for Rectangular, Arch, Bevelled Windows
- ☛ Overview

Store

- ☛ Material Requisition
- ☛ Fitting Requisition
- ☛ Glass Requisition

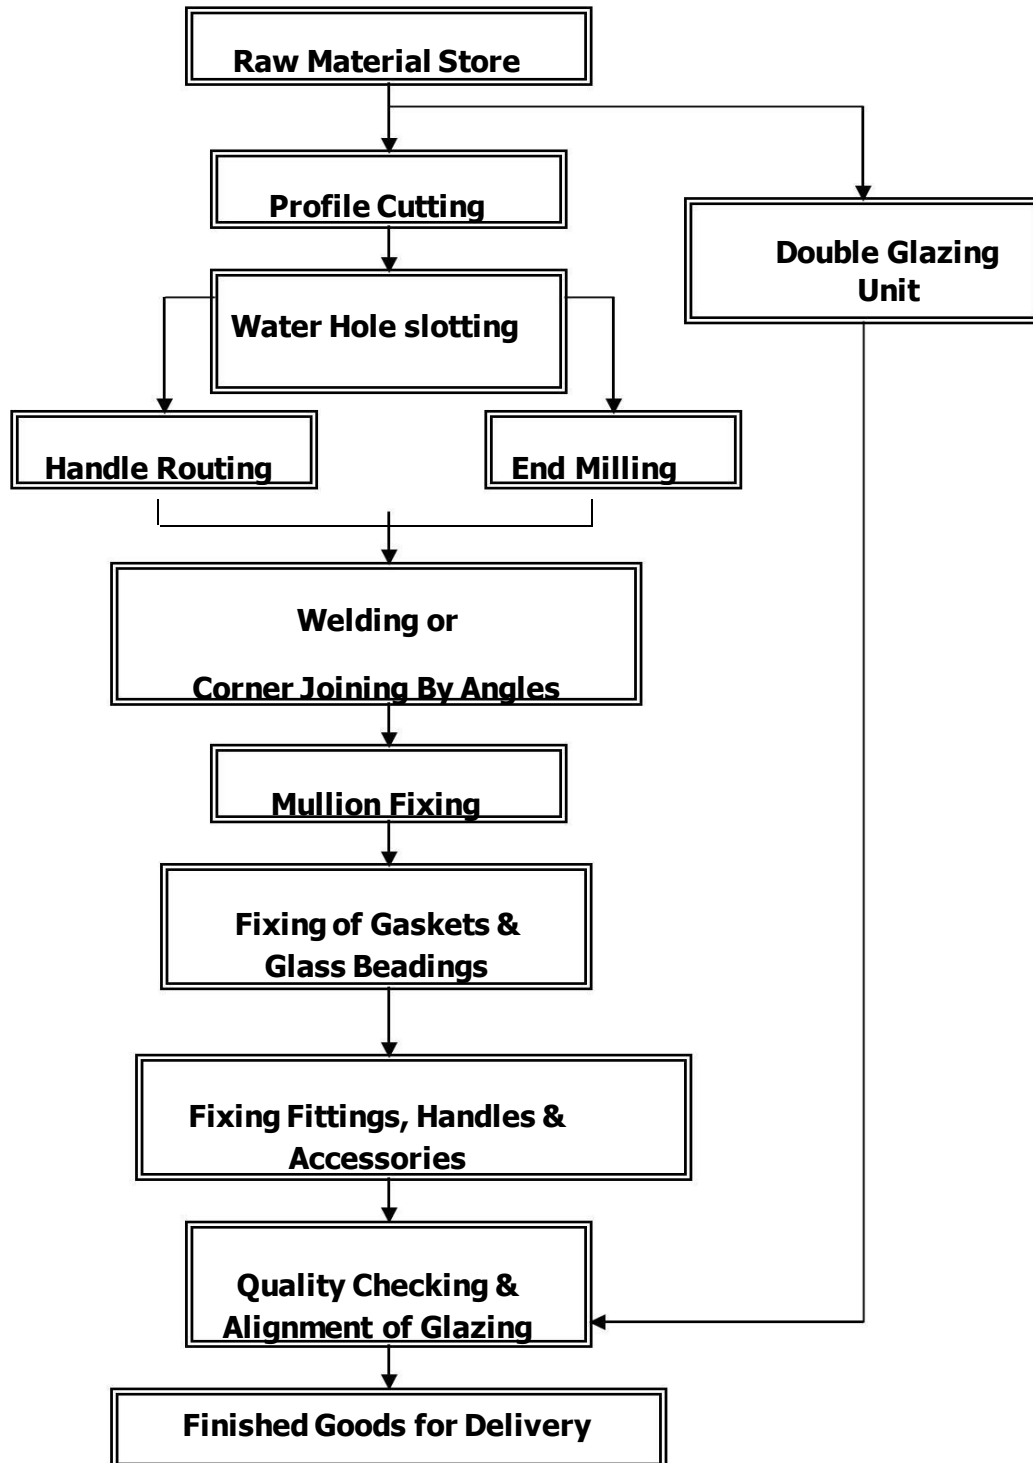

Glazing Section

- ☛ Glass Cutting list

Job File

- ☛ Production list
- ☛ Job Status with quote area-actual area comparison
- ☛ Calculation of project values as Per final measurement
