

Here is a step-by-step instruction manual for installing DIY Ezy Roll Outdoor Blinds:

Note: Before you begin installation, ensure that you have all the necessary tools and materials, including the Ezy Roll Outdoor Blind kit, a ladder, measuring tape, drill, screws, and a screwdriver.

Step 1: Measuring and Preparation

- Measure the width and height of the area where you plan to install the blinds. Ensure you have accurate measurements to ensure a proper fit.
- Clean the area where the blinds will be installed to remove any dust or debris.

Step 2: Prepare the Blind

- Unpack the Ezy Roll Outdoor Blind Kit and lay out all the components included in the package.
- Identify the top bar, bottom bar, blind material, brackets, pulley system, and any other additional accessories provided with the kit.

Step 3: Mounting the Brackets

- Hold the blind up against the chosen mounting surface to determine the appropriate position for the brackets.
- Using a pencil or a marker, make light marks to indicate the placement of each bracket.
- Attach the brackets using the provided screws and a screwdriver or a drill. Ensure they are securely fastened to the mounting surface.

Step 4: Installing the Top Bar

- Slide the top bar into the brackets and ensure it is level. Adjust as necessary.
- Secure the top bar by tightening the screws on each bracket.

Step 5: Unrolling the Blinds

- Depending on the type of blind material, follow the specific instructions to unroll the blinds smoothly. Some blinds come with a manual rolling system, while others may have a motorized option.

Step 6: Attaching the Bottom Bar

- Insert the bottom bar into the blind material.
- Slide the bottom bar up towards the top bar until it locks securely into place.

Step 7: Adjusting the Blind

- Slowly roll up the blind using the pulley system or motor, if included.
- Adjust the blind to the desired height.
- Ensure the blind is straight and level by checking with a spirit level.
- If necessary, make any additional adjustments to the blind material or the top and bottom bars.

Step 8: Securing the Blind

- Check that the blind is functioning properly and securely fastened to the brackets.
- If necessary, rotate the locking mechanism to secure the blind in place.

Step 9: Testing and Operation

- Carefully test the blind by operating it up and down a few times to ensure smooth movement and proper functioning.

Congratulations! You have successfully installed your DIY Ezy Roll Outdoor Blind.
