## Basmati Rice

The Basmati Rice we provide is extra-long, thin, superfine grains that are greater than 4.3 mm in length and width. It has a sweet flavor, a strong fragrance, a smooth feel and a delicate curve. Indian basmati rice is the least breadth-wise rice for cooking.

The rice we sell is free from some sort of impurity or foreign matter. It is available in excellent packs that are resistant to moisture and can easily hold the scent for a fair period of time. This variety of rice is cultivated in the North of India.

### Specifications

Crop year	One year old

# **HMJ AGRO PVT. LTD.**

## **Non-Basmati rice**

We sell high quality non-basmati rice, which is free of ashes, germs and stones. The flavor is rich and the scent is strong. Non-basmati rice comes in different types, with some slim and thin, some short and wide, some beads and some rounded.

The packaging for ricing bags includes Poly Bag, jute bag, cotton bags, paper bags, and non-woven plastic bags in different lengths, such as 50 kg, 45 kg, 40 kg, 30 kg, 25 kg, 20 kg, 10 kg and 5 kg.

We do have rice parboiled. There's a dark grain in parboiled rice. The cereal is less delicate. The people of West Africa eat this kind of rice often.

### **Note:**

Different broken percentage can be offer from 5% up to 100%, as per customer's requirement.

Specification would be changed accordingly as broken percentage changes

### **Delivery:**

Within 10 days from the receipt of confirmed payment instruments.

### **Packing:**

5, 10, 20, 25, 50 kg PP bag / Non woven bag.

## Desi Chick peas

The Desi type is smaller in size, has a thick, dark colored seed coat and is either de-hulled and split or de-hulled and ground into flour. It can also be roasted and puffed after splitting. Desi Chick peas has high fiber content compared to the Kabuli variety, which has small, darker seeds and a rough coat, cultivated mostly in the Australia, Indian subcontinent, Iran, Mexico & Ethiopia. The Desi (meaning 'country' or 'local' in Hindi) is also known as Bengal gram or kala chana. The Desi type is used to make Chana Dal, which is a split chickpea with the skin removed. Desi Chick peas are used mainly in dhal, sauces, puffed or ground into flour. It is widely used in Asian and African cuisines. Desi is likely the earliest form since it closely resembles seeds found both on archaeological sites and the wild plant ancestor (*Cicero reticulata*) of domesticated chick peas, which only grows in southeast Turkey, where it is believed to have originated. Desi chick peas have a markedly higher fiber content than Desi types have small angular seeds weighing about 120 mg, are wrinkled at the beak and range in color from brown, light brown, fawn, yellow, orange, black or green. They are normally dehulled and split to obtain dhal and are favored in India. It is mainly produced in Australia, Canada, Myanmar, Ethiopia, Tanzania and Malawi in Africa & exported to India, Bangladesh, Pakistan & Sri Lanka.

Specification of Desi Chick Peas	
Properties	Values / Limits

## Kidney Beans

Kidney Beans are reddish and brown in color. Like the name these are Kidney Shaped Pulses. Their flesh is soft and creamy. These are available in dried and canned form. These are used in mixed bean salads, stews and polished red kidney beans (Rajma) are used in simmered dishes and these beans have good tendency of absorbing flavors of seasoning and other foods together which these are cooked.

### Types

**Dark Red Kidney Beans** The Dark Red Kidney Beans are medium in size and elongated. The color is dark amber and smooth without marking. The Beans are famous of their deep flavor and smooth texture. These beans are used in most kitchens and standby for chili and baked beans.

### Small Red kidney Beans

Small Red Beans are known as Habichuelas, Habas Paquenos Colorados and Red Mexican. These beans are Plump, Round Beans and have the Deep Brick Red Color. The size of the bean is ½ inch long. The flavor is mild and texture is firm. This bean is much famous in southern red bean dish and Rice.
