

ROLLED SHEET SERIES

SAFETY FLOORING & WALL CLAD SYSTEMS

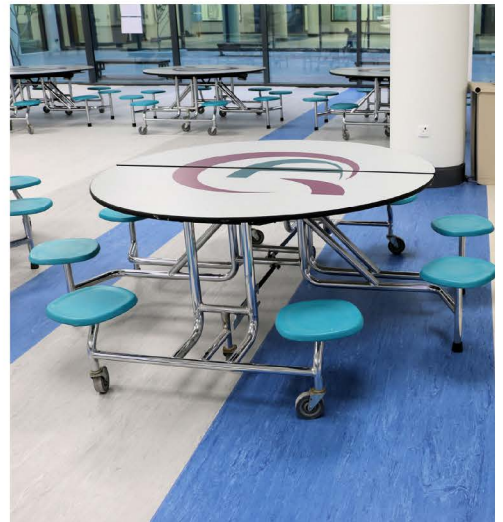

Monolithic Safety Flooring Systems | Wall Clad Systems

PolyFlor is specifically designed for environments requiring a true clean. Monolithic flooring applications and wall clad systems are designed for kitchens, surgical suites, bathrooms and other locations that require surfacing that is impervious to fluids, debris, airborne particulates and biological contaminants.

A perfect pairing for the most sensitive of environments.

ROLLED SHEET SERIES

Material

Products are made from polyvinyls and homogeneous non-laminate material that require no wax

Design

Flooring and wall clad systems are manufactured in a multitude of design styles seamlessly coordinating from floor to ceiling

Safety

Flooring products are engineered to remain slip resistant in the presence of moisture and other particles

Standard

All PolyFlor products meet health code regulations and proposition 65
