LVT | WOOD + STONE

Design-forward thinking encapsulates the realistic visuals of traditional wood and stone at a budget-friendly price without compromising quality, functionality and underfoot comfort. Our wood and stone LVT are 5mm thick planks that are available in a variety of colors to coordinate with existing design elements. Transform any space into an elevated environment.

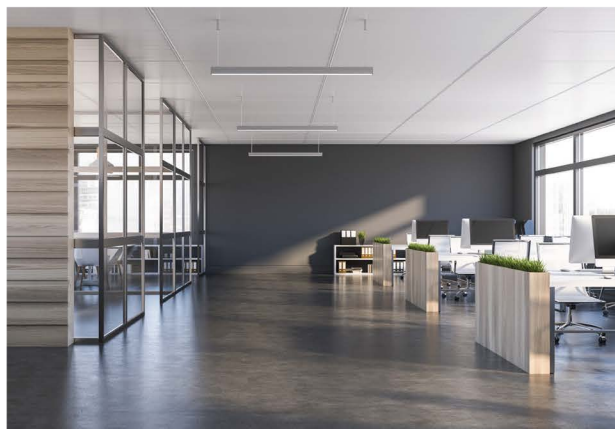

Anti-viral Wear Layer

The anti-viral surface has two different approaches to managing viruses that touch the surface of the flooring. The first line of defense is in microspike that impales the thin fat layer which contains the virus.

The second layer of defense deals with metal alloys and oxidation. The ions in the metal alloy speed

up and essentially cause the virus DNA to duplicate, weaken and decay through a oxidation process. The process is inherent to the surface of the floor covering. There is no diffusion or transfer of the antiviral components. An excellent alternative to fogging and using ionizers on a daily basis.

Benefits

- Premium fiberglass wear layer
- Reinforced UV cured Polyurethane 20 mil wear layer
- Increased comfort
- Extremely durable
- Provides noise reduction
- Installs flush with carpet and carpet tiles
- Never strip or wax
- Will not chip, crack, shrink or expand
