INFRASTRUCTURE

AI-POWERED GLOBAL METALS TRADE INFRASTRUCTURE

BUSINESS PLAN

BUILDING THE INFRASTRUCTURE FOR THE FUTURE OF GLOBAL METALS TRADE

CONFIDENTIAL & PROPRIETARY

For Intended Recipients for Investment Evaluation only

OUR MISSION: To build the world's most trusted, AI-powered, non-custodial infrastructure for the global precious metals trade.

GLOBAL SCOPE

Connecting key metals markets worldwide

AI-POWERED TECHNOLOGY

Driving efficiency, security, and smarter decisions

NON-CUSTODIAL MODEL

Ensuring trust, compliance, and data sovereignty

SCALABLE & PROFITABLE

High-margin model with recurring revenue potential

SUSTAINABLE IMPACT

Enabling responsible and transparent metals trade

INVESTING IN THE FOUNDATION OF A \$615B GLOBAL PRECIOUS METALS TRADE

SCALABLE. PROFITABLE. SUSTAINABLE.

TOGETHER, LET'S BUILD THE FUTURE OF GLOBAL METALS TRADE.

www.metalplat.com

METALPLAT

INFRASTRUCTURE FOR REAL-WORLD ASSETS

THE ALWAYS-ON INFRASTRUCTURE FOR PHYSICAL ASSET MARKETS

Non-Custodial. Bank-Controlled. Vault-Backed. 24x7.

THE PROBLEM

- Markets close. Opportunities don't.
- Time zones, weekends & holidays cause delays and price gaps.
- Traditional systems involve multiple intermediaries and high friction.
- Counterparty, custody & settlement risk remain high.

OUR SOLUTION

MetalPlat is a non-custodial infrastructure that enables 24x7 trading and instant settlement of physical assets using bank-controlled accounts and vault-backed digital representation.

Trade anytime. Settle instantly.
Anywhere in the world.

KEY BENEFITS

- 24x7 Trading Capability**
Never miss an opportunity. Trade and settle anytime.
- Bypass Time Zones**
One global infrastructure. Zero time barriers.
- Protection in Volatile Times**
React instantly to political, economic or market events.
- Lower Risk, Higher Efficiency**
Non-custodial model reduces risk and operational costs.
- Built for Institutions**
Designed for banks, corporates, traders and serious investors.

HUGE MARKET OPPORTUNITY

- \$550B+**
2025 Global Gold Market Value
- 5,000+**
Tonnes Annual Global Gold Demand / Supply
- 24x7**
Global Trade & Settlement Opportunity
- Singapore**
Emerging Precious Metals Hub

TRACTION & READINESS

- Banking Partnerships in Progress
- Regulatory Framework Aligned
- Proprietary Technology Built
- Vault Network Integration Ready

INVEST WITH METALPLAT

We are building the backbone for the future of real-world asset markets.

Be part of the infrastructure that never sleeps.

NON-CUSTODIAL BY DESIGN

BANK-CONTROLLED AT EVERY STEP

VAULT-BACKED REAL ASSETS

24x7x365 ALWAYS ON

GLOBAL WITHOUT BORDERS

METALPLAT
REAL ASSETS. REAL TIME. REAL TRUST.

SECURE. TRANSPARENT. EFFICIENT. THE INFRASTRUCTURE TRUSTED BY THE NEXT GENERATION OF GLOBAL MARKETS.

HOW WE COMPARE

MetalPlat vs. Leading Trade & Commodity Platforms

Purpose-built infrastructure for real assets. Bank-controlled. Global by design.

BANK-CONTROLLED

COMPARISON FACTOR	METALPLAT THE NEXT-GEN INFRASTRUCTURE	DMCC TRADEFLOW (DMCC, DUBAI)	SWISS TRADING SYSTEMS (SWITZERLAND)	LONDON TRADING ACTIVITIES & SYSTEMS (UK)
Infrastructure Ownership	✓ Bank-controlled, Vault-backed proprietary infrastructure	✗ Operated by exchange infrastructure (DMCC)	✗ Operated by private exchanges or consortia	✗ Operated by banks, brokers or exchanges
Asset Custody	✓ Assets held in insured, bank-controlled vaults	~ Custody through approved warehouses / providers	~ Third-party vaults / custodians (non-bank-controlled)	~ Varies by participant; often through clearing members
Settlement Model	✓ Real-time PvD (Payment-versus-Delivery) atomic settlement	✗ T+1 to T+3 settlement (non-atomic)	✗ T+1 to T+2 settlement (varies by market)	✗ T+1 to T+2 settlement (varies by system)
Market Access	✓ 24x7 global access across time zones	~ Limited to exchange operating hours	✗ Limited hours; regional market focus	~ Limited hours; aligned with financial market sessions
Operating Hours	✓ 24x7x365	✗ Business hours (Mon-Fri)	✗ Business hours (Mon-Fri)	~ Business hours (Mon-Fri)
Transparency & Auditability	✓ End-to-end, immutable audit trail (real-time)	~ Standard reporting (end-of-day)	~ Periodic reporting (end-of-day)	~ Periodic reporting (end-of-day)
Regulatory Alignment	✓ Built for global compliance; regulator-ready by design	~ Compliant within UAE framework	~ Compliant with Swiss regulations	~ Compliant with UK regulations
Counterparty Risk	✓ Eliminated (PvD + bank-controlled infrastructure)	~ Reduced, but present (clearing cycle)	✗ Present (multi-party risk)	✗ Present (multi-party risk)
Asset Classes	✓ All physical assets (commodities, minerals, etc.)	~ Primarily commodities (metals, diamonds, etc.)	~ Metals, commodities, precious metals	~ Wide range; depends on platform / asset type
Technology Architecture	✓ Modern, API-first, real-time, modular & scalable	~ Centralized systems (legacy + modern mix)	~ Legacy systems with modern upgrades	~ Legacy systems with modern upgrades
Purpose & Focus	✓ Built exclusively for physical assets & real-time settlement	✗ Exchange for trade facilitation (not real-time PvD)	✗ Financial markets with commodity focus	~ Financial markets; trading activities across asset classes

METALPLAT IS THE ONLY INFRASTRUCTURE THAT DELIVERS REAL ASSETS. REAL TIME. REAL TRUST.

Built for Scale
& the Future

Note: Information is based on publicly available data and industry knowledge as of May 2024. Comparative indicators are general in nature.

THE PROBLEM

PHYSICAL ASSET MARKETS ARE BROKEN

Despite a multi-trillion dollar market, trading physical assets like metals remains slow, fragmented, manual and dependent on legacy systems built for a business world that no longer exists.

MARKET CLOSURES & TIME ZONES

Traditional markets operate in limited hours. Weekends, holidays and time zone differences create delays and missed opportunities.

SLOW & COMPLEX SETTLEMENTS

Manual processes, multiple intermediaries and legacy banking rails lead to settlement delays of days, not minutes.

HIGH COUNTERPARTY & CUSTODY RISK

Lack of transparency and reliance on intermediaries increase the risk of default, fraud and asset misappropriation.

LACK OF TRANSPARENCY & STANDARDIZATION

Disconnected systems, inconsistent documentation and opaque processes create inefficiencies and information asymmetry.

LIMITED LIQUIDITY & CAPITAL EFFICIENCY

Assets are illiquid and hard to monetize quickly. Access to working capital is limited and processes are costly and slow.

VULNERABLE TO GLOBAL VOLATILITY & SHOCKS

Political events, sanctions, economic crises or wars can disrupt markets overnight. Traditional systems are not built to respond instantly.

THE IMPACT

MISSED OPPORTUNITIES

Inability to trade or settle when markets move.

HIGHER COSTS

Manual processes and intermediaries add unnecessary cost.

GREATER RISK

Counterparty, custody and settlement risks remain high.

POOR CAPITAL EFFICIENCY

Locked capital, slow monetization and limited access to liquidity.

GLOBAL INEFFICIENCY

Fragmented infrastructure cannot support a 24x7 global economy.

The world has moved to **real-time**. Physical asset markets **have not**.
MetalPlat was built to change that.

THE SOLUTION

REAL ASSETS. REAL TIME.

MetalPlat is a 24x7 non-custodial infrastructure that enables instant trading and settlement of physical assets through bank-controlled, vault-backed, PvD execution.

OUR SOLUTION

MetalPlat connects buyers and sellers on a secure, digital infrastructure where every transaction is:

-  **NON-CUSTODIAL**
We never hold funds or assets. Banks and vaults do.
-  **BANK-CONTROLLED**
Funds stay in regulated bank accounts at all times.
-  **VAULT-BACKED**
Every asset is stored in approved, insured vaults.
-  **ALWAYS ON**
Trade and settle 24x7, 365 days a year, across the globe.

HOW IT WORKS

KEY FEATURES

-  **GLOBAL ACCESS**
Connect across any time zone. No market closures.
-  **INSTANT SETTLEMENT**
PvD execution delivers settlement in real-time.
-  **SECURE & COMPLIANT**
Built with enterprise-grade security and regulatory best practices.
-  **FULL TRANSPARENCY**
End-to-end visibility and immutable audit trails.
-  **BUILT TO SCALE**
Modular infrastructure to support millions of transactions.

VALUE FOR EVERY STAKEHOLDER

FOR BUYERS

- ✓ Trade anytime, anywhere
- ✓ Lock prices instantly
- ✓ Reduce risk from market volatility
- ✓ Faster access to assets

FOR SELLERS

- ✓ Get paid faster
- ✓ Access global buyers
- ✓ Reduce counterparty risk
- ✓ Improve liquidity

FOR BANKS

- ✓ Higher transaction volumes
- ✓ More lending opportunities
- ✓ Stronger client relationships
- ✓ Assets and funds always in bank control

FOR THE MARKET

- ✓ 24x7 global liquidity
- ✓ More efficient price discovery
- ✓ Lower friction, lower cost
- ✓ Stronger, more resilient markets

MetalPlat is not just technology. It's the infrastructure **powering the future of real asset markets.**

REAL ASSETS. REAL TIME. REAL TRUST.

WHY NOW?

THE PERFECT CONVERGENCE OF NEED, OPPORTUNITY & TECHNOLOGY

The world is changing. Physical asset markets need a new infrastructure.

The timing for **MetalPlat** has never been more perfect.

GLOBAL MACRO TRENDS DRIVING URGENCY

GEOPOLITICAL INSTABILITY

Wars, sanctions and political tensions are disrupting traditional supply chains and market access.

RISING DEMAND FOR HARD ASSETS

Central banks and investors are accumulating gold and metals at record levels for safety and diversification.

DEMAND FOR 24x7 MARKETS

Global participants expect real-time access and instant settlement. Markets must never sleep.

TECHNOLOGY MATURITY

Cloud, APIs, secure digital infrastructure and automation now make real-time, global, non-custodial markets possible.

BANKS SEEK NEW INFRASTRUCTURE

Banks want to expand into RWA markets with lower risk, better control and higher capital efficiency.

MARKET SIZE & GROWTH

The physical asset market exceeds \$500B+ and is growing rapidly with tokenization and digitization.

THE MARKET IS READY FOR DISRUPTION

\$500B+

PHYSICAL ASSET MARKET

Gold, silver & critical metals market exceeds \$500B+ and continues to grow.

10X INCREASE

IN DIGITAL ASSET ADOPTION

Institutions are rapidly adopting digital infrastructure for real-world assets.

24x7 EXPECTATION

IS NOW THE STANDARD

Digital-native markets and investors expect instant access and settlement.

REGULATORY CLARITY IS IMPROVING

Global regulators are providing clearer frameworks for digital infrastructure and RWA.

CAPITAL IS SEEKING REAL-WORLD YIELD

Investors want real assets with real yield, backed by real infrastructure.

WHY THIS MOMENT IS UNIQUE

SUPPLY CHAIN REALIGNMENT

Companies are diversifying supply chains and need reliable, real-time access to materials.

DIGITAL TRANSFORMATION

Industries are digitizing operations, demanding faster, smarter and more transparent infrastructure.

GENERATIONAL WEALTH TRANSFER

New investors demand modern, digital-first platforms that are secure, transparent and accessible.

INFLATION & CURRENCY UNCERTAINTY

Investors and institutions are moving to hard assets to protect value in an uncertain world.

SUSTAINABILITY FOCUS

Verified, transparent and traceable asset markets are critical for the future of global trade.

WHY THE MARKET IS SO HUGE

ESSENTIAL TO THE WORLD

Physical assets power industries, infrastructure, technology, energy security and everyday life.

LIMITED SUPPLY, HIGH VALUE

Many assets are scarce, finite and critical to global economies.

GLOBAL TRADE DEPENDENCY

Trillions of dollars of physical assets are traded across borders every day.

INSTITUTIONAL CAPITAL FLOWS

Funds, banks, corporations and nations are increasing allocation to real assets.

POWERFUL LONG-TERM GROWTH DRIVERS

URBANIZATION & INFRASTRUCTURE

Rising global infrastructure spend drives demand for metals, energy & materials.

ENERGY TRANSITION & DECARBONIZATION

Surging demand for critical metals, copper, silver, nickel and clean energy commodities.

TECHNOLOGY & DIGITALIZATION

EVs, AI, data centers and advanced manufacturing drive commodity demand.

SUPPLY CHAIN REALIGNMENT

Diversification, nearshoring and strategic stockpiling increase real asset flows.

INFLATION & HEDGE DEMAND

Investors see hard assets as a hedge against inflation, currency risk and volatility.

GLOBAL OPPORTUNITY. GLOBAL REACH.

The need is universal. The impact is global.

24x7

GLOBAL

SECURE

BUSINESS MODEL

SUSTAINABLE. SCALABLE. INFRASTRUCTURE-FIRST.

MetalPlat operates a 24x7, bank-controlled infrastructure for trading and settling physical assets through non-custodial, PvD execution.

**REAL ASSETS.
REAL TIME.
REAL VALUE.**

REVENUE STREAMS

1. TRANSACTION FEES

We earn a fee on every trade executed on the platform.

- Buyer and Seller pay a small percentage per transaction.
- Volume-driven, scalable revenue.

2. SETTLEMENT FEES

A settlement fee is charged for PvD (Payment-versus-Delivery) execution.

- Covers infrastructure, automation and risk controls.
- Predictable and recurring.

3. VAULT & STORAGE FEES

We charge asset owners for secure storage in approved, insured vaults.

- Based on value, asset type and storage duration.
- Long-term, recurring revenue.

4. CURRENCY CONVERSION FEES

Fees on currency conversion within the platform for cross-border trades.

- Integrated FX at transparent rates.
- Additional spread revenue.

5. DATA & ANALYTICS FEES

Premium market data, pricing analytics and insights for participants.

- Real-time pricing, index data, market intelligence.
- Subscription-based.

6. API & TECHNOLOGY FEES

Charges for API access and technology integration for institutions and partners.

- Enables seamless integration with internal systems.
- Developer & enterprise plans.

OUR PLATFORM DRIVES NETWORK EFFECTS

- ✓ More participants attract more liquidity.
- ✓ More liquidity leads to tighter spreads and better prices.
- ✓ Better prices attract more users.
- ✓ A virtuous cycle that drives exponential growth and market leadership.

PRICING STRUCTURE

REVENUE STREAM	PRICING MODEL	TYPICAL RANGE
Transaction Fees	% of Trade Value	0.05% – 0.20%
Settlement Fees	Per Settlement	0.02% – 0.10%
Vault & Storage Fees	% of Asset Value (Annual)	0.10% – 0.50%
Currency Conversion Fees	Spread on FX	0.05% – 0.15%
Data & Analytics Fees	Subscription	\$1,000 – \$50,000 / month
API & Technology Fees	Subscription / Usage	\$5,000 – \$100,000 / month

HIGH MARGIN, SCALABLE MODEL

Non-Custodial Model

We never hold or touch funds or assets. Lower risk, lower capital requirement.

Technology-Driven

Automation and smart contracts reduce operational costs and increase efficiency.

Scalable Infrastructure

Built to handle millions of transactions with low incremental cost.

WHY OUR MODEL WINS

Multiple Revenue Streams

Diversified and resilient income sources.

Low Risk Exposure

Bank-controlled, non-custodial structure.

High Scalability

More volume drives higher revenue with minimal cost increase.

Recurring Revenue

Storage, data and subscriptions provide predictable cash flow.

Strong Network Effects

Liquidity and participation grow together.

OUR TARGET

Capture 1% of the \$500B+ physical asset market = \$5B+ annual revenue opportunity in the long term.

BUILT FOR THE FUTURE. DESIGNED TO LEAD.

A business model that creates value for participants, banks and stakeholders.

COMPETITIVE ADVANTAGE

MetalPlat is not another platform.

We are building the foundational infrastructure layer for real-world asset markets.

OUR KEY DIFFERENTIATORS

NON-CUSTODIAL BY DESIGN

MetalPlat never holds or touches funds or assets. Funds move directly between bank-controlled accounts.

BANK-CONTROLLED INFRASTRUCTURE

All funds are held in regulated bank accounts (e.g., DBS). We operate within the highest compliance standards.

VAULT-BACKED ASSETS

Every asset is stored in approved, insured vaults with full segregation and real-time reconciliation.

24x7 REAL-TIME SETTLEMENT

Our Pvd (Payment-versus-Delivery) model enables instant, atomic settlement 24x7, 365 days a year.

GLOBAL ACCESS WITHOUT CLOSURES

Trade and settle physical assets anytime, anywhere. No market closures. No timezone limitations.

SECURE, COMPLIANT & AUDITABLE

Built with enterprise-grade security, full audit trails and regulatory best practices from day one.

BUILT TO SCALE MODULAR ARCHITECTURE

Modular, API-first infrastructure designed to scale across millions of transactions and asset classes.

Enterprise-grade security and compliance framework

Proprietary Pvd technology and real-time rails

Network effects and liquidity infrastructure

Global coverage and 24x7 operations

POWERFUL NETWORK EFFECTS

More Participants (Buyers, Sellers, Institutions)

More Liquidity Deeper Markets

Better Pricing Faster Settlement

Stronger Network More Value for All

METALPLAT IS THE ONLY INFRASTRUCTURE THAT COMBINES BANK CONTROL, VAULT SECURITY, AND 24x7 Pvd SETTLEMENT.

TRUSTED BY DESIGN

ALWAYS ON 24x7

GLOBAL BY NATURE

BUILT TO BE THE STANDARD

TRACTION / READINESS

Building the infrastructure. Laying the foundation. Moving forward.

MetalPlat is advancing rapidly across all key milestones to deliver a secure, bank-controlled, real-time infrastructure for trading and settling physical assets.

CURRENT STATUS OVERVIEW

PROTOTYPE / MVP COMPLETED

Core platform prototype and MVP completed, demonstrating real-time PvD settlement, asset lifecycle, and TradeAccount architecture.

MAS CLEARANCE IN PROCESS

Engaging with the Monetary Authority of Singapore (MAS) for regulatory clearance and compliance alignment.

BANKS – TRADEACCOUNTS IN PROCESS

Active discussions with international banks to establish TradeAccounts and bank-controlled infrastructure.

VAULTS IN PROCESS

Engaging with leading interdependent vault providers globally for integrated custody solutions.

MINERS, TRADERS & LBMA REFINERIES IN PROCESS

Ongoing discussions with miners, global traders, and LBMA-accredited refineries for asset onboarding and flows.

STAFF IDENTIFICATION IN PROCESS

Building a world-class team across technology, operations, compliance, risk and business development.

KEY ACHIEVEMENTS TO DATE

STRONG FOUNDATION. CLEAR MOMENTUM.

- ✓ Prototype / MVP completed with core platform modules operational.
- ✓ Bank-controlled infrastructure model designed and validated.
- ✓ Engagement initiated with regulatory authority (MAS).
- ✓ Strategic outreach to banks, vaults, miners, traders and refineries underway.
- ✓ Strong industry interest and positive feedback on platform vision and architecture.

NEXT MILESTONES (12 MONTHS)

Obtain MAS in-principle / regulatory approval and necessary licenses.

Onboard partner banks and launch TradeAccount infrastructure.

Integrate vault network and enable asset custody.

Onboard initial miners, traders and LBMA refineries.

Pilot transactions with select partners and go live in phases.

Scale across key commodity corridors and global markets.

OUR COMMITMENT

We are building the critical infrastructure the world needs to unlock the value of real assets. Transparent. Secure. Compliant. Built for the future.

SECURE

TRANSPARENT

COMPLIANT

SCALABLE

THE TEAM FOUNDER

RAJ TORE
FOUNDER & VISIONARY

“ Building the infrastructure the world can trust to trade real assets. ”

Raj Tore brings over **30 years** of multi-sector experience, spanning technology, research, design, international trade, and business operations, with a focused exposure to critical and precious metals sourcing, logistics, secure storage, and cross-border trade execution.

An IT **inventor, innovator, researcher, and systems designer**, Raj has developed a strong track record in identifying complex operational inefficiencies and designing practical, scalable solutions. His work combines technology architecture, process design, and real-world trade understanding.

Over the past **three years**, he has conducted in-depth research across key global metals markets, including:

 AFRICA	 SWITZERLAND	 LONDON	 DUBAI	 INDIA	 ASIA
---	--	---	--	--	---

This research focused on identifying **structural gaps** across the metals trade ecosystem, including:

 Precious and critical metals sourcing	 Logistics and secure transportation	 Storage and vaulting infrastructure	 Cross-border delivery challenges	 Financial settlement and capital flow systems
--	--	--	---	--

MetalPlat is the outcome of this work — designed as a **practical, infrastructure-led platform** to address real-world inefficiencies through **structured, secure, and institution-aligned workflows**.
