MASTERING COUNTER SURVEILLANCE & DETECTION IN 3 DAYS

TAILORED FOR SECURITY SPECIALISTS AND TEAMS: IDEAL FOR IN-HOUSE SESSIONS. PERFECT FOR GROUPS SEEKING COMPREHENSIVE TRAINING IN COUNTER SURVEILLANCE & DETECTION.

Suitable for...

Seasoned Security Professionals and Investigators: Enhance your expertise in counter surveillance and detection techniques. Dive deep into the intricacies of the field. Perfect for those seeking advanced insights.

Key Skills Mastered:

- Identifying Surveillance Teams with Precision
- Expertise in Covert & Overt Anti-Surveillance Techniques
- Navigating Counter-Surveillance Routes Effectively
- Mastery in Satellite Vehicle Tracking
- Practical Application through Realistic Exercises

What students can expect:

This three-day course imparts the essential skill sets necessary to operate as a sophisticated counter-surveillance team. It not only delves into 'what to look for' but also instills a foundational understanding of how surveillance individuals or teams operate. Upon completion, students will be awarded a certificate of achievement.

WE TYPICALLY CAP ENROLLMENT AT SIX STUDENTS FOR AN OPTIMAL LEARNING EXPERIENCE.

EPRIUS GLOBAL SOLUTIONS

This **three-day course** takes place in Calgary. Costs cover all equipment provision, including covert radios and cameras. Refreshments will be provided; however, lunch is not included. Accommodation is not part of the package, but we can offer information on reasonably priced options close to the training venue.

Our course instructors boast extensive experience in instructing these techniques to both government and private sector personnel.

This course caters to individuals with backgrounds in security, law enforcement, or the armed forces, emphasizing a frequently overlooked aspect of security training—counter-surveillance.

Key elements covered include:

- Understanding the Surveillance Threat: Hostile Planning Cycle
- Effective Planning & Briefing Techniques
- Proficiency in Foot & Mobile Surveillance Methods
- Precision in Recognizing Surveillance Teams
- Mastery of Covert & Overt Anti-Surveillance Techniques
- Navigating Counter-Surveillance Routes
- Advanced Satellite Vehicle Tracking
- Hands-On Realistic Practical Exercises

Course Outline:

This course offers flexibility, designed to span either three consecutive days or staggered to suit the number of students for optimal field training.

Training Hours:

Each day will be scheduled for an intensive 8-hour session, running from 08:00 to 16:00.

Theory and Practical Application:

Day One encompasses comprehensive classroom-based theoretical instruction, focusing on diverse investigation types, data and intelligence gathering techniques, note-taking, report writing skills, essential equipment, and fundamental legal considerations.

Day Two involves hands-on field training, emphasizing foot surveillance techniques coupled with camera usage.

Day Three further extends the practical experience with field training, integrating vehicle-based static and mobile surveillance using specialized equipment.

Students should come prepared with a **notebook**, a **laptop**, and **attire suitable** for both indoor and outdoor activities, ensuring comfort during the training.

Students must present the following documents: a current security or investigation license, government credentials, and an updated criminal record check. **These credentials are essential for participation in the course.**

To book your course:

Government, corporate, or private security sector representatives, please reach out to check availability.
