

## Explanation of material list and costs

In Cuyahoga County, sewer lateral installations are governed by the [Ohio Plumbing Code](#) (OPC) alongside specific local municipality and [Cuyahoga County Public Works](#) requirements.

### Key rules for 6-inch sewer pipe cleanouts include:

- **Outside Foundation:** A cleanout is required outside the building, usually placed within 5 to 10 feet of where the pipe exits the house foundation. [1, 2]
- **Changes of Direction:** Cleanouts are mandatory at any horizontal bend or change in direction greater than 45 degrees. [1]
- **Maximum Distance:** For 6-inch building sewers, cleanouts must be installed at intervals of no more than 100 feet along the run. [1]
- **Pipe Size:** Cleanout pipes for 6-inch sewers must be extended to the ground surface with a minimum 4-inch diameter pipe (they do not need to be larger than 4 inches for rodding capacity). [1, 2]
- **Clearance:** A minimum clearance of 18 inches must be maintained perpendicular to the opening so maintenance equipment can easily enter the pipe. [1, 2]
- **Accessibility:** All cleanout plugs and caps must be kept accessible and fully exposed at finished grade; they cannot be paved over or concealed. [1, 2, 3, 4]

PVC SDR 26 gasketed spigot components refer to heavy-wall PVC pipe or fittings (typically used in gravity sewer and drainage applications) where the "spigot" (the plain, male end) is designed to slide directly into a gasketed bell end. These systems use a rubber gasket rather than solvent cement to create a watertight, flexible seal. [1, 2, 3, 4, 5]

[DeMilta Sand & Gravel Inc.](#) located at 921 Erie Rd, Eastlake, OH supplies #57 limestone. This roughly 3/4" to 1" crushed angular stone is commonly used for driveway top-dressing, parking pads, shed foundations, and French drains. Pricing in the Greater Cleveland area generally runs between \$45 and \$60 per cubic yard or ton, depending on the quantity and delivery distance

6 inches of # 57 Limestone is laid in the trench:

Pipes are covered with stone:

- It will take approximately **11 tons** of #57 limestone to fill a 1,500-gallon septic tank, depending on the rock's compaction and specific density. \$495 to \$660, plus delivery.
- A trench **100 feet long** requires approximately 12 tons of #57 limestone. \$540 to \$720, plus delivery.
- The street connection will require approximately 14 to 16 tons of #57 limestone. \$720 to \$960, plus delivery.
- To backfill a driveway cut with #57 limestone it will require approximately 10 to 20 tons depending on the depth. \$525 to \$1050, plus delivery.
