Changes To Drinking Water Regulations

SURVEY FOR PATRONS
Second Request

The Environmental Protection Agency (EPA) announced changes to the drinking water regulations that require public water suppliers to gather data on their patron's plumbing. The water supplier needs to identify all construction materials used on both the supplier and the customer's side of the water meter. **This means we need your help!** We are now required under the new drinking water regulations to send surveys to all customers asking that they complete and return this survey form. If the required information cannot be gathered from the homeowner, the EPA may require the water supplier to excavate private lines in order to identify them.

Please return to RWD #8 upon receipt

Patron Name & Date:_____

Phone Number:_____

Email address:_____

Service address:_____

Account #:_____

Was your home built between 1982 and 1989?
