SV70-SP

Vacuum Loading Solids Pump

The Solidsvac SV70-SP is designed to reliably handle any flowable sludge and slurry and is ideally suited where submersible, centrifugal and diaphragm pumps are not a viable option.

Designed to offer the operator a one man vacuum recovery pressure discharge unit capable of recovering and transferring almost any flowable material, the extra heavy duty twin 75mm (3") suction and discharge rotary ball valves deliver outstanding performance in the capture and transfer of heavy flowable sludges with high solids content.

100% air powered, the all new compact, fully automatic, robust and fully mobile SV70-SP, generates 22.5"Hg+ of vacuum and can be used in a wide range of applications including mining and industrial.
