

Deploy cloud software and partner services quickly and affordably by deferring upfront costs!

## We make paying for cloud software and services super easy.

### We remove potential budget obstacles.

There is \$0 upfront payment required in both software and services, with your payments deferred over time thus accelerating your time to value.

### We increase the speed of implementation.

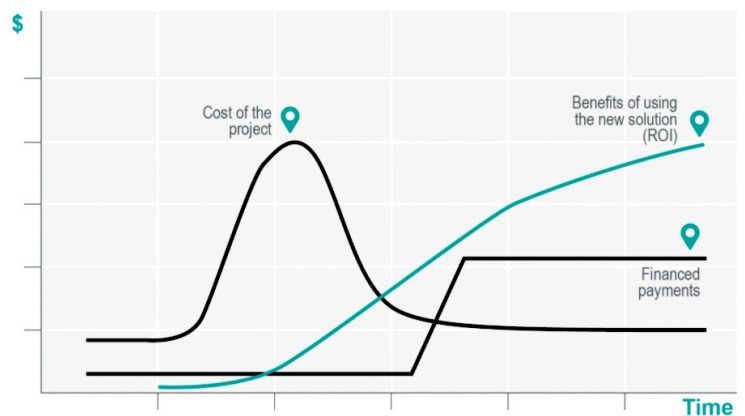

Software and services providers are paid upfront by SaaS Pay and can then allocate resources faster accelerating your digital transformation.

### We make ongoing payments simple.

SaaS Pay provides you with one tax invoice for both software and services, removing the need to manage multiple vendors.

## Defer upfront costs and pay monthly over time.

SaaS Pay helps organisations improve cash flow by deferring the upfront project costs for cloud software and services and paying in instalments over time.

## Why SaaS Pay?

### Improve Cash Flow

Spread your investment in software and services out over time to help improve your cash flow and return on investment.

### Accelerate Time to Value

Align your payments of your software deployment and services consumption to accelerate time to value.

### Get Fast Approval

Fast approval process with flexible payment terms spread equally, deferred or ramped based on your preference.
