How to Set Up Your Family

A Family starts with 8 Households. There is no limit to its size. New members can be brought in by the Mother or existing members so long as the rest of the Family is happy to work with them. The bigger the Family, the more diverse the skills, resources & experience therein.

By making the Family as self-reliant as possible, we are safe-guarding the future of our children, establishing a legacy of giving back to Mother Earth & bringing unity where previously there was discord & division.

Each Family elects a 'Mother': a core figure (man or woman) who facilitates & coordinates the resources, skill-sets & coming together of the Family for the common good of all. A Mother is wise to choose a 'Second' who can provide support & also take over the Mother's role if required.

Mother HH7

A Mother may choose to become a Grandmother to new emergent Families. The GM will be able to share resources, connections & experience with the new Mother.

Together we are stronger.

During emergencies, other Families can be called on for resources, assistance & support. The more Families are present in an area, town or city, the less they depend on external saviors & systems, the more resilient the Family network becomes & the more self—sufficient & united the community.

The Family's connection goes beyond divisive ideologies. Members need not agree on everything. They are united in love. Families work together toward positive outcomes & act accordingly to move forward together.

We cannot count on our local politicians, council or law courts to hear us, but the Family does listen & WILL provide. Roads can be blocked, events can be recorded, funds can be collected, our own police can be raised, connections can be taphysical made... So much becomes possible os. first when we are many.

The Family is the ideal network within which to create community support structures: gardening teams, metaphysical groups, educational/child-care hubs, inventors labs, first response crews, resource/provision centers, safe houses etc. The Family works to hatch solutions to problems.
