

Fusion Hair Extension MAINTENANCE

WASH YOUR HAIR

with the pads of your fingers in a downward motion, gently getting around the attachment area. Wait 48 hours after application to shampoo!

AVOID CONDITIONER

Avoid conditioner on your attachment area, focus on the ends.

NEVER GO TO SLEEP WITH WET HAIR

You can create matting and make your extensions get a mildew smell at the root. Sleep with your hair in a braid.

STYLING TOOLS

Flat irons/curling irons make sure to apply below your extension attachment.

NO SUNSCREEN

NEVER let SUNCREEN, oils, or tanning products come into contact with your extensions. Put your hair up if it's on your body because it will cause a discoloration to your extensions.

BRUSH 2 TIMES A DAY

BRUSH 2X a day from ROOTS to ends. Brushing the extension attachment at the root is the most important. It will ensure you don't get matting.

Fusion Hair Extension MAINTENANCE

SALT WATER + POOLS

Always get your hair wet first and preferably apply conditioner before entering the water. When you're done swimming be sure to shower out the chemicals right away and blow dry your extensions so your hair doesn't stay wet for too many hours. I do not recommend submerging your hair too often.

EXTENSION LOSS

Extension loss is ¹⁰⁰ normal. We shed 50 to 150 hairs per day naturally. You can expect losing a couple strands of keratin or less hair attached to your method. That's why proper maintenance is key so you never let the hair dwindle down to too little hair for the weight of the extension attachment. It will compromise your natural hair.

RECOMMENDED PRODUCT

I recommend the following products to use on your hair extensions. Kevin Murphy young again oil, Ever smooth, fresh hair dry shampoo, leave-in repair, shimmer me blonde, smooth again, young again Dry conditioner, and sessions spray. Proper products ensure longevity for your hair extensions. All Kevin Murphy products have a degree of heat protecting to them and are incredibly nourishing.
