VIRTUAL PUBLIC INPUT SESSION:

Special Event Ordinance Change

In the City of Sarasota, a special event permit must be obtained from the City's Office of Special Events, by a person or organizer conducting a Special Event. A Special Event is defined in the City Code as any special event that is occurring on city-owned property; or within city-maintained right-of-ways; or for which the organizer requests the use of city services about and beyond the ordinary use. The special event permit requirements and regulations are stated in the City Code.

Based on an increased interest in Special Events within the City and the need to

CITY OF SARASOTA SMART CITY INITIATIVE:

A Leap Towards TECHNOLOGICAL INNOVATION

Nikhil Patel, PE, CPA, PTDB, CGC, AICP City Engineer - City of Sarasota

The City of Sarasota implemented a groundbreaking Smart City initiative in 2022, the multi-faceted program through innovative technologies, data-driven insights, and citizen engagement to enhance the quality of life for its residents. The initiative comprises three main components: a traffic camera network, a public safety data platform, and a smart city data dashboard. These components are designed to provide real-time data and insights to city officials and the public, enabling data-driven decision-making and improving the overall quality of life for residents.

Traffic Camera Data Program
The Smart City Data Program is a multi-faceted initiative designed to enhance the City of Sarasota's traffic management and public safety. The program includes a network of traffic cameras, a public safety data platform, and a smart city data dashboard. The traffic camera network is designed to provide real-time data on traffic flow and congestion, enabling city officials to make data-driven decisions on traffic management and public safety. The public safety data platform is designed to provide real-time data on public safety incidents, enabling city officials to make data-driven decisions on public safety and law enforcement. The smart city data dashboard is designed to provide real-time data on various city operations, enabling city officials to make data-driven decisions on city management and public services.

The Smart City Data Program is a multi-faceted initiative designed to enhance the City of Sarasota's traffic management and public safety. The program includes a network of traffic cameras, a public safety data platform, and a smart city data dashboard. The traffic camera network is designed to provide real-time data on traffic flow and congestion, enabling city officials to make data-driven decisions on traffic management and public safety. The public safety data platform is designed to provide real-time data on public safety incidents, enabling city officials to make data-driven decisions on public safety and law enforcement. The smart city data dashboard is designed to provide real-time data on various city operations, enabling city officials to make data-driven decisions on city management and public services.

KEY BENEFITS:

- Real-time Traffic Adjustments: Immediate modifications to traffic signals based on real-time data.
- Enhanced Event Management: Streamlined coordination for large events, ensuring efficient traffic management for attendees and emergency services.
- Informed Decision Making: Data-driven insights support proactive planning and infrastructure improvements.

Sea Level Rise Monitoring:

Sea-level rise monitoring is a critical component of coastal management. It involves the use of various technologies, including satellite altimetry, tide gauges, and coastal profile surveys, to monitor changes in sea level over time. This data is used to assess the risk of coastal flooding and to develop strategies to mitigate the impacts of sea-level rise.

Vice President Kamala Harris
@VP

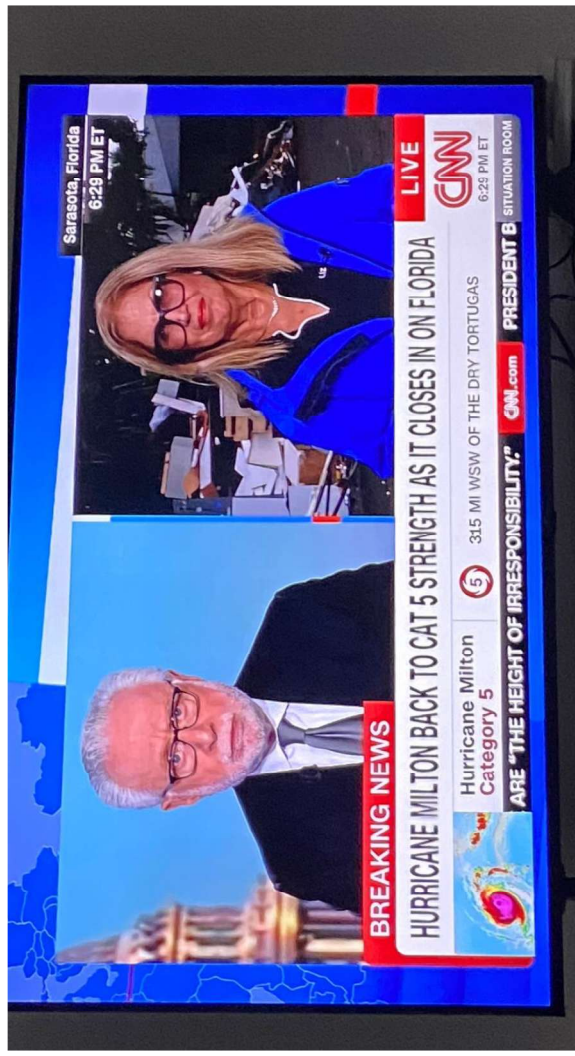

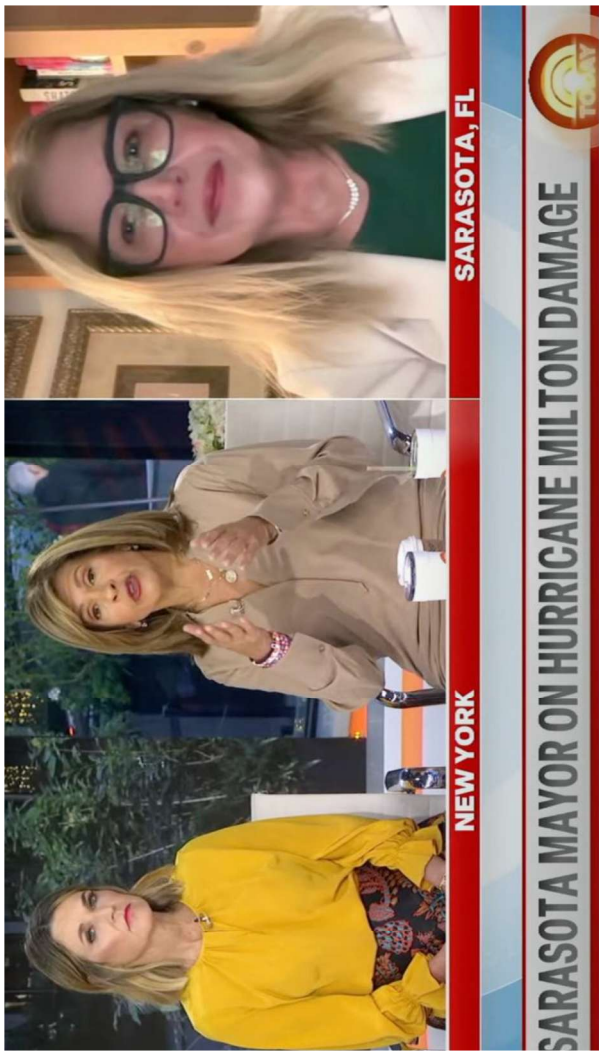

In moments of crisis, people look to their leaders.

I called Sarasota Mayor Liz Alpert to thank her for her leadership through this difficult time and to let her know our Administration is here to help as folks recover from Hurricane Milton.
