Breakfast February 21, 2026

LKRA Beach Party
Friday, April 10, 2026

Presidents Letter

Good morning to new and existing LKRA members

The new season is starting, as I have spotted car carriers around the Key and traffic is picking up!!!. It is always a pleasure giving everyone updates throughout the year on the events/issues happening on Lido Key through our newsletters.

It seems every year I always say there are a lot of things going on, on the barrier island, but this year coming will be exceptional, and the issues we will be addressing will impact us for years to come. We had our first member meeting on October 18 at the lido beach resort on the 8th floor starting at 9 am (our new starting time) and had close to 90 people attending. The presentation was about the undergrounding of utilities over the entire keys. The presenters included the city public works, city engineer, the Mayor of Longboat Key and all the representees from the neighborhoods on the key. It was well received, and it looks like it is and will be moving forward (more information to follow).

Our presentation in November will be on the upcoming beach renourishment that is scheduled for end of this year. This will be another major project that will have an impact on us directly.

We will have more information on the speakers we have planned for the coming new year meetings.

My next topic is very near and dear to my heart, which is the Lido Key Scholarship Fund that the board has been working on and is finally coming to fruition.

It was a tough last year with all the hurricanes the keys endured, and it seemed like everything was put on hold. A lot of progress has been made on recovery from them, but we have a long way to go. I feel the time is right for the scholarship fund to start accepting donations now, 100% of the donations go into the fund and are TAX DEDUTABLE!. Our initial goal is \$100,000.00, and at that point Mote Has agreed to monitor the investment with us. LKRA will have control of how the money is given out. Our goal is to have this scholarship set up in perpetuity and will be the association's legacy. I encourage everyone to donate as much as you can to get this off ground. If you have any questions, please do not hesitate to call me.

Let's all make this a season to remember. Hope to see you around the Key

Carl Shoffstall
President LKRA

Liz Alpert, Esq.

Mayor, Sarasota

Welcome back to all our seasonal residents. We're looking forward to having a quiet season this year weather wise. But, I hope, an exciting one for all our residents, weather seasonal or permanent. There is always something going on in the City of Sarasota.

At our Monday, October 20 meeting, the Sarasota City Commission voted to move forward with getting the information on what it will take and what it will cost to underground the power lines on the barrier islands, including Lido Key. So, stay tuned.

Also at our meeting, we got an update on the next phases of The Bay. There are some very exciting plans underway. If you haven't visited, make a point to do it soon. The area in front of the municipal building and the other historic buildings has been renovated to create a beautiful promenade with lots of trees and plants. In addition, the landscaping around the Garden Club has been renewed. We have been getting good reviews for both areas.

If you have any questions or concerns, please feel free to email me at liz.alpert@sarasotafl.gov.

Until next time.

Liz Alpert, Esq.

Mayor

Sarasota City Commissioner, District 2

Nikesh Patel

Director of Public Works, City of Sarasota

City Moves Forward with Undergrounding Utilities Feasibility Study

The Sarasota City Commission voted unanimously on October 20 to authorize a feasibility study on undergrounding power and telecommunications lines across St. Armands, Lido Shores, and Lido Key.

This vote does not approve construction or assessments. Instead, it authorizes City staff to begin a detailed study that will evaluate project costs, technical feasibility, funding options, and overall impacts on property owners.

The effort will be led by Alvimarie Corales, Chief Transportation Planner, who serves as the project manager for the initiative, working in close coordination with Public Works Director Nikesh Patel and City Engineer Sage Kamiya. Together, they will oversee consultant selection, boundary refinement, and coordination with the City Attorney and Finance departments to ensure a transparent and methodical process.

Strong neighborhood participation helped advance this step. The barrier-island associations and merchants have voiced clear support for burying utilities to improve safety, reliability, and aesthetics. Residents point to the experience of nearby communities, such as Longboat Key, where underground systems have significantly reduced power interruptions during major storms.

The feasibility study will determine how undergrounding can best be implemented across the three island neighborhoods and businesses and will present estimated costs and funding scenarios. Once complete, the findings will return to the City Commission for consideration before any design, assessment, or construction decisions are made.

This marks an important milestone in strengthening Sarasota's coastal resilience while preserving the charm and character that define St. Armands, Lido Shores, and Lido Key. A Public meeting is anticipated to happen in early 2026 to provide additional updates.

Thank you,

Nikesh Patel, PE, CPM, PTOE, CGC, AICP
Director of Public Works, City of Sarasota
Phone: [\(941\) 263-6132](tel:9412636132)

Lido Beach Shore Protection Project:**Contract Award Marks Major Milestone in Coastal Resilience Efforts**

To help residents and stakeholders stay informed on the Lido Beach Project, the City of Sarasota has created a dedicated webpage: <https://engage.sarasotafl.gov/lido-beach> renourishment. You can also access this page from the [Capital Projects site](#) on the City's website.

We're committed to keeping this page current with project updates and milestones — including the exciting recent news below. In close coordination with Sarasota County and the U.S. Army Corps of Engineers (USACE), the City continues to make significant progress on vital shoreline protection efforts for Lido Beach. These efforts include the next phase of beach renourishment and a future dune enhancement project, both of which are essential to reducing storm impacts and protecting our coastline.

USACE Awards Contract for New Pass Maintenance Dredging

The City of Sarasota is pleased to share that on October 22, 2025, the U.S. Army Corps of Engineers successfully awarded the New Pass Maintenance Dredging project to Coastal Dredging Company, Inc. This milestone marks an important step toward restoring and stabilizing Lido Beach. The dredging project will improve navigation and provide approximately 200,000–300,000 cubic yards of beach-quality sand to replenish Lido's shoreline. Construction is anticipated to begin in late fall 2025 with completion by spring 2026, ahead of peak sea turtle nesting season. With a contractor now on board, the City will continue to coordinate with USACE and share schedule updates on the project [website](#) as they become available.

**Project Scope and Timeline**

The coordinated project includes:

- **New Pass Dredging**: Conducted by USACE to enhance navigation safety, with the dredged sand reused to replenish Lido Beach. Project mobilization is anticipated in late 2025 or early 2026.
- **Beach Renourishment**: Placement of beneficial sand fill to stabilize the shoreline, protect adjacent infrastructure, and enhance ecological and recreational value. Beach fill operations are expected to run through Spring 2026.
- **Dune Enhancements**: A 1.57-mile-long dune system will be constructed to reinforce natural storm protection and improve habitat continuity. The dunes will start after the Beach Renourishment, scheduled for Fall 2026 through early 2027.
- **Dune Walkovers**: 3 existing access points will be reconstructed following the dune project.

Commitment to Coastal Protection

The City of Sarasota remains dedicated to the long-term protection and preservation of Lido Beach. These efforts are made possible through continued collaboration with Sarasota County, the USACE, FDEP, Mote Marine Laboratory, the Sarasota Audubon Society, and our engaged local stakeholders. We also extend our sincere appreciation to the offices of U.S. Representative Greg Steube and U.S. Senator Rick Scott for their advocacy and collaboration with our City Commissioners in advancing this critical project.

Temporary Lane Closures

SR 789 from Bird Key Drive to Sarasota Harbor West

Starting October 6, 2025

The Florida Department of Transportation (FDOT) will conduct ground penetrating radar (GPR) testing on SR 789 from Bird Key Drive to Sarasota Harbor West on Monday, October 6, from 9 a.m. to 4 p.m. to locate utilities and steel bars in the deck in support of the drilling operations beginning next week. The work requires a lane closure of the westbound outside lane. Additional overnight lane closures are scheduled from **October 6 through November 30 from 8 p.m. to 6 a.m.** Crews will be drilling and boring for core testing for the future bridge replacement. The community can expect noise from the drilling equipment. Motorists are encouraged to plan for additional travel time through the area. For information on the project, visit: <https://www.swfroads.com/project/436680-1> For real-time traffic updates, visit <https://fl511.com/>.

Mote Marine Laboratory

Mote Announces Grand Opening for Mote Science Education Aquarium (SEA)

Mote Marine Laboratory & Aquarium is proud to announce that the new Mote Science Education Aquarium (SEA) opened to the public on Wednesday, October 8, 2025. To reserve tickets for admission [visit mote.org/tickets](https://www.mote.org/tickets).

The 12-acre Mote SEA campus is located at Nathan Benderson Park, a nexus site for Sarasota, Manatee Counties and the entire region; Mote SEA will transform Mote's ability to provide informal science education and enhanced levels of ocean literacy to much larger and more diverse populations from around the world. The 146,000-square-foot facility will enable individuals of all ages and backgrounds to engage with the ocean and experience a window into Mote's globally-significant marine science research and conservation initiatives.

As its name suggests, science is the attraction at Mote SEA. The innovative facility features three state-of-the-art STEM Teaching Labs focused on Biomedical, Microbiology & Immunology; Marine & Coastal Ecology; and Ocean Engineering, AI Technology, Robotics & Sensor Development. These labs will provide hands-on experiential learning to more than 70,000 K-12 students annually from Sarasota and Manatee county schools (as well as those schools in nearby counties), including over 26,000 Title I students, completely free of charge. In addition, Mote SEA will include five STEM Workforce Training Labs offering professional experience, alongside Mote scientists, as part of an array of high school, undergraduate and graduate research experiences in: Aquaculture & Fisheries, Conservation, Coral Genetics & Restoration, Artificial Intelligence, and Veterinary Clinic & Diagnostic Research & Practice. The STEM Teaching and Workforce Training Labs include wall-to-wall glass windows, so guests can observe and enjoy scientists and students learning and conducting research in real time.

Founded in 1955 in a one-room trailer in Placida, Florida, by world-renowned ichthyologist Dr. Eugenie ("Genie") Clark, Mote has become one of the most unique and impactful independent marine research and science education institutions in the world. With over 300 staff, Mote has now expanded to 9 campuses across Florida with 22 diverse Research Programs, 2 Technical Programs, 13 Centers of Excellence and 45 doctoral-level staff. Today, Mote scientists conduct research on every continent and throughout the entire ocean as part of its International Marine Science Diplomacy Initiative.

"Mote SEA is much more than just an aquarium; it stands at the intersection of paradigm-changing research, science education, and community engagement," said Dr. Michael P. Crosby, President & CEO of Mote Marine Laboratory & Aquarium. "We envision a future in which tens of millions of visitors will experience the transformative power of learning and discovery, changing the way they think about our oceans, conservation and sustainable use."

South Hospital News and Health Care Report **BRIGHTGRAM**

Sarasota Memorial Hospital was named among the nation's leading hospitals in Newsweek's annual "Best-in-State" hospital rankings released today.

For the third year in a row, SMH-Sarasota was the only hospital in southwest Florida to make the list, ranking #6 out of 26 Florida hospitals on the 2025 list. This year's rankings recognizes 700 facilities from all 50 states and the District of Columbia.

"Managing a health crisis can be daunting—and with over 700 hospitals in the U.S. at risk of closure, knowing where to turn for the best care close to home is more important than ever, Nancy Cooper, Global Editor in Chief for Newsweek, wrote in today's report. "We hope this list proves valuable as you make informed health care choices for yourself and your loved ones."

Newsweek compiles its annual America's Best-In-State Hospitals list in collaboration with global market research and consumer data company Statista Inc. Each state's top hospitals are ranked based on clinical and quality performance data, including low mortality, complication and readmission rates from the Centers for Medicare & Medicaid Services CMS, as well as surveys from the American Hospital Association, HCAHPS patient experience, and PROMs (patient-reported outcome measures).

Sarasota Memorial's ranking comes on top of a growing list of national accolades, including multiple "Best Hospital" rankings and ratings from U.S. News & World Report, continuous 5-star ratings from the Centers for Medicare & Medicaid Services, Magnet designation for 20 consecutive years, and repeated recognition on Newsweek's list of the "World's Best Hospitals" to name a few.

"We're incredibly proud of the outstanding team at Sarasota Memorial," said Sarasota Memorial Health Care System CEO David Verinder. "Every day, our physicians and staff go above and beyond to provide exceptional care. These awards reflect their unwavering dedication to quality, safety, and the well-being of our patients and community."

Sarasota Memorial Health Care System is a regional medical center offering Southwest Florida's greatest breadth and depth of care, with 2,500 physicians and advanced practice providers and nearly 2 million patient visits a year across its network of care. Sarasota County's largest employer, the community-owned health system includes two full-service hospitals in Sarasota and Venice, freestanding ERs in North Port and Lakewood Ranch, a comprehensive cancer institute, a rehabilitation hospital, behavioral health hospital, skilled nursing facility and comprehensive network of outpatient centers, urgent care clinics and physician practices. Founded in 1925, SMH is celebrating its 100-year anniversary in 2025 and encouraging community members to visit smh.com/100 throughout the year for centennial events and updates.

Sarasota hotel, once owned by a dog, demolished

The Sandcastle Resort on Lido Beach in Sarasota was built in 1953. Later it was purchased by New York hotel magnate Leona Helmsley. When Helmsley died in 2007, though, she left her dog named Trouble the hotel and \$12 million. But, Trouble the dog died in 2011, and the money he received was added to a family charitable foundation.

And like many older, ground-level beach hotels in the area, The Sandcastle was heavily damaged by Hurricanes Helene and Milton. Crews from J.P. Services of Sarasota began demolishing the

hotel on Monday. They believe it will take several weeks to demolish the hotel and separate materials.

The backstory: Leona Helmsley was a sometimes brash, high-powered New York businesswoman who owned hotels and real estate. She was known for battling one of her arch business rivals, Donald Trump. New York writers dubbed Helmsley the "Queen of Mean." Her most famous quote is "We don't pay taxes. Only the little people do."

What's next: The property is now owned by the same hotel company which owns the local Opal Collection hotels in Clearwater, Sarasota and Naples. They plan to build a new luxury resort on

The LKRA Scholarship Fund Please Help Us Reach Our \$100,000 Endowment Goal by February 1, 2026

The **Lido Key Residents Association (LKRA) Scholarship Fund** is designed to provide financial assistance to students pursuing degrees and training in marine biology, environmental science, wildlife management, conservation, and related fields. By reducing financial barriers, this fund will empower passionate individuals to focus on their studies and develop the skills necessary to safeguard vulnerable species and habitats.

Your generous support will directly impact on the lives of future conservationists, researchers, and advocates who are committed to protecting marine ecosystems and shore bird populations. Contributions to the LKRA Scholarship Fund will help cover tuition, research opportunities, internships, and hands-on field experiences, all of which are essential for preparing students to meet the complex challenges facing our coasts.

From our members generous donations, the LKRA Scholarship Fund has awarded \$9,000 in scholarships to participants in Mote's Intern Program, \$3000 in each year, 2023, 2024 & 2025.

Phase 1 Endowment Goal - \$100,000

LKRA is a 501(c)(3) non-profit and is now in a fundraising effort to endow the LKRA Scholarship Fund. Once we reach our **Phase 1 target of \$100,000**, [Mote Marine Laboratory & Aquarium](#) (Mote) has committed to serving as our partner, as well as being the custodian and investor of the fund. LKRA will establish a Scholarship Oversight Committee, which will collaborate with Mote, establish a Selection Committee, and determine the available scholarship amount for distribution each year. **Our goal is to raise the money and turn the program over to Mote by February 1, 2026.** In the interim, LKRA has set up a separate bank account for this fund.

Thoughts from a Recent Scholarship Recipient

"I was offered the opportunity to intern at Mote after I joined the O-Tech Club, which was offered by Mote Marine at my high school. John Langen was a club advisor. We built a ROV from PVC pipe and little motors. I didn't know anyone, but having hands-on experience kept me engaged and wanting to do more. Everything was new, but I quickly caught on and was able to help more and more. The scientists from Mote were there to help with difficult parts as well as answering questions about what they do and how it assists in research.

Interning at Mote Marine with the Ocean Technology group has been a new learning experience and I'm so grateful to have the opportunity to see how scientists work every day. One of the most surprising things I've learned is how people from different departments work with each other on their projects. One of the projects I have been helping with is a diver recall system, which was requested by the boat captains. I researched different aspects of making an underwater speaker system, such as what frequencies are heard best underwater, and what kind of equipment is used in other recall systems that are already available. I was able to go on the boat one day to help deploy the glider and we even got to release baby sea turtles. While on the boat, I also helped with taking water samples for the scientists in the Ocean Acidification and Red Tide department. It was a new experience, and I had to learn how to do it in the moment with only verbal instructions and watching other people. I learned a lot about field work and the stress that scientists are under, making adjustments and documenting everything, while also dealing with the unpredictable Florida environment.

This experience has already begun shaping my college path and my career choices by influencing my future towards a marine science or engineering-based job. I've learned that engineers can have many different jobs in numerous fields, and it's not always a straightforward path. I am looking at colleges that offer programs for marine technology or paths that can connect marine biology and engineering. I'm also looking into more opportunities for exposure to technology and engineering while also keeping a connection to the ocean. I originally wanted to become a conservationist or a marine advocate, but working with the Ocean Technology team really shifted my interest towards the engineering and technology aspect of marine science. Since working alongside the Ocean Technology team, I am more inspired than ever to work towards a future that will aid research and impact the world."

[Mote Marine Laboratory on City Island](#)

[Mote Marine Intern Program](#)

[Need Based Stipend Opportunities](#)

LKRA Bylaws require that elections for the board be held annually. Board members whose terms are expiring this year are Jim Ludwig, Tim Malaney, Jessie Hayre, and Scott Ashby. We currently have one open seat on the board. Open nominations will be held at the November membership meeting with all nominations ending on November 30. Anyone wishing to run for the board must notify a current board member prior to the November 30, 2025 deadline. If more than one person is nominated, an election will be held in January. Board members for 2026 will be announced at the February breakfast meeting.

Meet and Greet Dates for this year are as follows:

November 11
 December 9
 January 13
 February 10
 March 10
 April 14
 May 12
 June 9

The November and December events will be held at the Cirque St Armands. In January we will move to the Lido Beach Resort.

Please Join or Renew Your Membership Now

LKRA Membership is open to everyone. Whether Lido Key is your homestead, a favorite spot to spend the season, a great place to vacation or just a place you care passionately about, we welcome you! If you live or own property on Lido, membership allows you to vote in association matters. All others are considered associate members and enjoy all membership benefits.

2026 LKRA Membership Dues (remain):

- Individual Household (Residence, Condo or Apartment) - \$30
- Condo Association, Hotel or Business - \$50

New and Renewal Memberships made after October 1st are good through the following calendar year. Your annual membership dues cover the cost of hosting our Monthly Meetings and Meet & Greets. They also cover our Email, Newsletter and Website expenses, offsetting expenses for Special Events and funding charitable contributions and other association expenses. Our new **Scholarship Fund** is funded strictly through donations.
