

All About Whales!

Ingredients:

- 1 Apple
- 2 Blueberries
- Spoonful of cream cheese or peanut butter
- Cereal (Cheerios cereal or Reeses Puffs recommended)
- Sharp knife (adult supervision required)
- Dish or plate

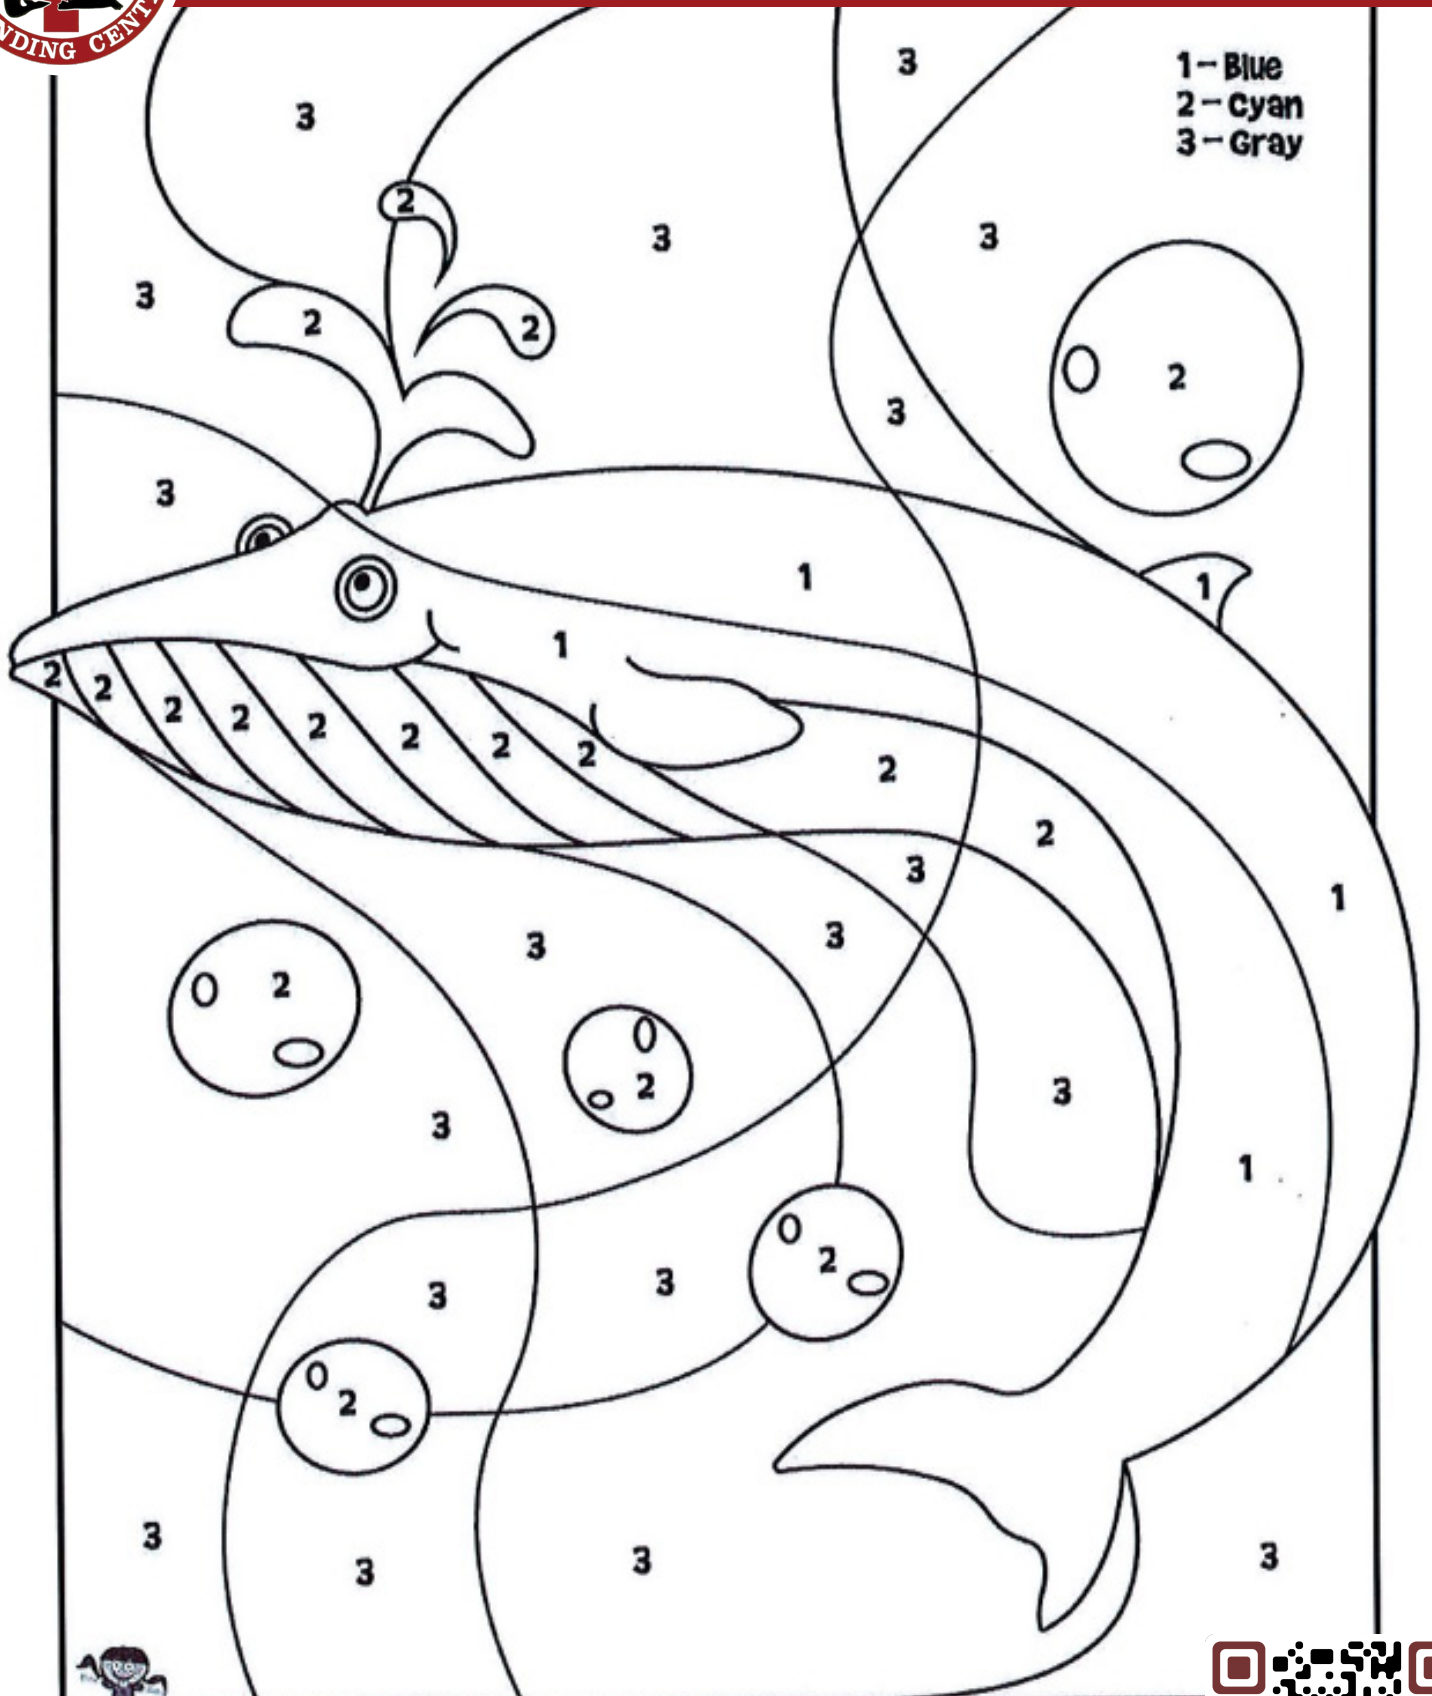

Use a sharp knife to slice off one half of the apple. Cut this half in half. Place one of these halves on the plate for the whale's body. Cut your remaining half in half one more time. Place these two smaller slices on your plate as pictured above for the whale's tail. Grab a handful of your desired cereal and place them around the bottom of your whale for the water. Place some cereal above your whale to create spray coming from the whale's blowhole. Using your cream cheese or peanut butter, fix the blueberrhy eyes and a sliver of apple for the mouth.
