

CERTIFICATE OF INDUSTRY COMPLIANCE

Quincy Lab, Inc. hereby certifies that our products and instruments are manufactured and tested to conform to generally accepted and recognized standards of good engineering and manufacturing practices.

All systems receive both a visual inspection to insure proper assembly, and are operationally tested for functionality and safety. All products are designed to meet both domestic and foreign electrical standard usage.

Quincy Lab, Inc. further certifies that all testing and test results were executed in accordance with, and conforming to, below referenced tests and standards or general testing standards and best practices where applicable, for the safe and intended use of this instrument.

Test & Applicable Standard

Electrical Safety:

| | |
|-------------------|------------|
| Voltage Withstand | UL 61010-1 |
| Ground Continuity | UL 61010-1 |

Calibration:

All units are calibrated at the factory prior to shipment.

Performance Testing:

Temperature Accuracy against NIST traceable device*

*As per published model specification
