

PROJECT : TRAVEL AND TRANSPORT

1

WHAT?

Travel survey of patients and/or staff to understand their mode of travel. Ultimately to help enable travel without burning petrol or diesel.

WHY?

The practice bring in staff from a large area and understanding their travel helps plan alternatives. Air pollution and carbon dioxide from car travel harms us all. To find out how many of our patients get to the practice via what mode of transport.

2

3

HOW?

Created a google doc survey for staff to complete. Asking patients in the waiting room when checking in for their appointment.

WHO?

Care navigation team for patient survey.
All staff for staff travel survey.

4

5

WHAT WENT WELL?

Results are awaited!

EVEN BETTER IF?

Need to take into account how long things can take! Some patients didn't understand why this was related to healthcare despite us explaining. Some found it too personal.
