

TOXGURUKUL FOUNDATION PRESENTS

'ToxGurukul Webinar Series'

**Title: Opportunities & Challenges for
In vitro toxicology resulting from US-
EPA announcement to be animal free
by 2035**

Date: Saturday 10th July

Time: 8.00 pm. Indian Standard Time

Duration: 1.5 hours (1 hr + 30 min. Q&A)

Registration (free) link: [Click here](#)

Course Moderator:

Dr. Varun Ahuja MVSc, PhD, DABT, ERT

For queries: toxgurukul.india@gmail.com

**Sponsors willing to contribute financially may please
contact:**

Dr. Mukul Pore MVSc, DABT, ERT (President): 9822024836

Dr. K.S. Rao MVSc, PhD, DABT (Patron): 7337830074

Speaker:
Dr. Clive Roper,
Director, Roper Toxicology Consulting,
Scotland, UK

Dr. Clive Roper is presently working as Director, Roper Toxicology Consulting, UK, developing NAMs and supporting regulatory acceptance of NAMS. Earlier he was associated with Charles River for 25 years.

Clive graduated with a PhD in *in vitro* dermal metabolism and toxicology from Newcastle University. Later he pursued post-doctoral research from the same university.

He has presented at many meetings and organized small meetings (Skin Metabolism) and large conferences (WC9). Dr. Roper has authored and co-authored many posters and abstracts as well as peer review papers. He is a peer reviewer for journals including TIV, Regulatory Pharmacology & Toxicology, Annals of Work Exposures, and Health and Skin Pharmacology and Physiology. He has been actively involved in advising regulatory agencies including NIH, SCCS and EPA as well as industry bodies and has presented a webinar on *in vitro* toxicology with the FDA. He is a founding member of the North American 3Rs Collaborative and active in the MPS subgroup.

He is most proud of having 4 peer review papers quoted in 2 OECD Test Guidelines (OECD 492 and 428) and working with US EPA, Health Canada, and other regulatory agencies towards ending the dermal triple pack.
