

Death can eclipse and shatter everything, but when a death is good the room is filled with peace and all the pain that went before it is forgotten; where there was mystery there is knowledge and where there was fear there is love – this is the work of the Soul Midwife.

The intention of this course is not only to teach and share powerful knowledge, but also to inspire and equip those who are called in the most holy way, for the essential work of caring for the dying with our angelic and celestial hosts.

This workshop has been designed for Angelic Reiki healers who want to work with people at the end of life, support those to cross the sacred threshold, care for the spirit and support the journey before and after death.

Helping dying people experience a good death is the work of the Master Healer in the 21st Century.
