

History Catchers LLC

Capture and preserve your family's precious memories

Elders and historians carry within them
something irreplaceable to the families who love them:

their memories.

At History Catchers LLC, we work with elders and their families to assemble and create their own multimedia historical legacies. Our goal is to capture and digitally preserve the insight, substance and perspective of those who have the greatest timeline of life experiences to share.

Through in-person interviews and family dialogues, we gather recounted memories on video, in the client's preferred setting. In editing, we pair the video content with multimedia – treasured photo images, printed mementos and detailed captions – to bring narrated stories to life.

Multiple private storage options allow families to archive their legacy for generations to come. Packages start at just \$249.99 for filmed sessions. Consulting and editing services are offered at hourly rates, if you'd prefer to compile your own existing recordings and images into an artful digital format. All services are fully confidential - free estimates - references available. Visit www.historycatchers.com or call (701) 799-4230 to learn more.
