# WORKING SCOPE

# ITHA ABIDIN

With over a decade of experience in sales and marketing across various industries—including pharmaceuticals, medical equipment, automotive, and food & beverage imports—I have come to value relationship-building as the core of successful business. My journey eventually led me to the construction industry, where I saw the need for a trusted, high-quality service provider.

At Asenta, we are committed to delivering excellence, ensuring professionalism, and fostering strong client relationships. I believe in proving that dedicated and experienced professionals can still achieve outstanding results, setting a new standard for quality in construction.

# MIFTAH LUTHFI

With over 12 years in the construction industry, I have led large-scale projects with a focus on quality, efficiency, and strategic execution. My 8 years at a state-owned enterprise (BUMN) involved managing high-rise and infrastructure developments, refining my expertise in quality control and advanced project management.

Leveraging this experience, I founded Asenta Project to deliver innovative, high-quality, and timely construction solutions. Over the past two years, we have built a strong reputation by successfully managing diverse projects, ensuring excellence in design, execution, and sustainability. For me, construction is more than just building structures—it's about building trust, quality, and long-term value for clients and communities.

# ROOFI ANDRE HADIANTO

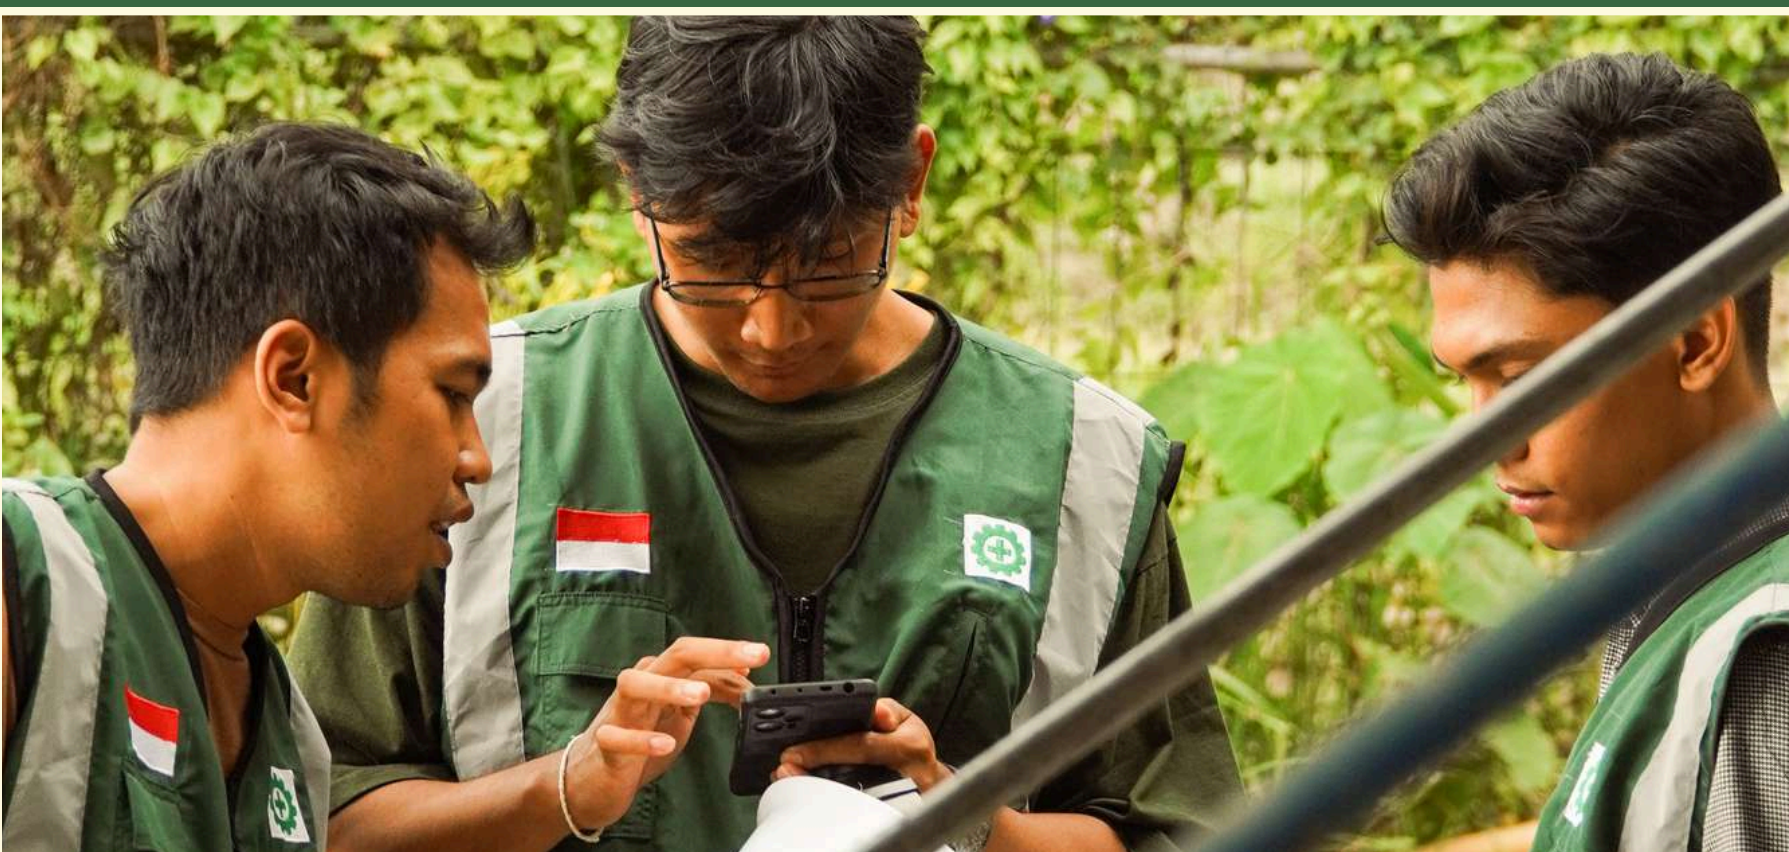

I have been in the construction industry for 11 years, starting as a PIC and advancing to Project Manager. My experience includes handling high-risk projects such as airports, hotels, highways, and villas across Indonesia, with major projects in Kalimantan and Medan. In 2022, I began working in Bali, and by 2023, I established my own company, driven by a passion for quality and excellence.

I founded this company to address a critical issue in the industry—lack of expertise leading to subpar results and even fraud. Many clients struggle with trust in construction services, and my goal is to change that by prioritizing quality, commitment, and integrity in every project.

# PROJECT PORTFOLIO

This portfolio showcases a selection of projects we have completed, along with the corresponding project values, highlighting our experience and commitment to delivering high-quality results.
