

## The Nature of Life in the Modern Age

If one peruses the prevalence of poisons imposed upon the human population, it is astoundingly easy to realize that **THERE ARE NO SUCH THING AS “DISEASES”** – most of the assault is global in its dispersion/application -

- a) chlorinated & fluoridated water plus other chlorine related products in the food chain (globally),
- b) chemtrail (globally),
- c) lifetime mercury implants (multiple),
- d) food additives including pesticides/herbicides,
- e) chemicals in body products (makeup, shampoos, soaps, etc. etc.),
- f) pharma - ingested/injected toxins & procedural/testing damages (globally) - incredibly expansive topic,
- g) electromagnetic frequency radiation (globally)

In western civilizations, unless one is particularly astute, active and aware, to avoid what is listed above, to the best of their ability, they will unwittingly become one of the statistics...

And, of course, it is by the acceptance of sub 100-year-old lifespans, from the greater population, that eliminates the need to look into what is claimed in this document. The proof is with Dan Buettner's research/book - The Blue Zones.

The bottom line: **THERE ARE NO SUCH THING AS “DISEASES”.**
