

The Poisoned Needle – Suppressed Facts about Vaccination
Eleanor McBean (1905-1989)

There are at least 3 pertinent details of Eleanor McBean's presentation of the vaccination story. They are:

1. In reading the book it is necessary to view it in the context that it is written prior to 1959. The level of comprehension, of the greater story, in this regard is astounding.
2. The foundation of critical thought, presented by McBean, is accomplished with her understanding of the foundational research that was documented, in the mid 1800's, by Professor Antoine Bechamp. That being that microbes in free, normal air, **do not exist**.
3. Eleanor covers many other topics in her presentation of the importance of good nutrition and at the same time avoiding environmental poisons, such as sodium fluoride.

Preface:

For the past 2000 years physicians have been looking in the wrong direction for the cure of disease. Their worse than useless practice of killing germs with poison drugs has never – and can never – solve the problem of disease.”

“Our worst epidemics **now** are **epidemics of vaccination** in which more people are killed every year by “vaccinal diseases” [aka vaccinia] than by the diseases that the vaccinations were supposed to combat.”

“Vaccination, instead of being the promised blessing to the world, has proved to be a curse of such sweeping devastation that it has caused more death and disease than war, pestilence and plague combined. There is no scourge (with the possible exception of atomic radiation) that is more destructive to our nation's health than this monument of human deception – this slayer of the innocent – this crippler of body and brain – THE POISONED NEEDLE.”

[It is noted that “slayer of the innocent” does not take into account of the distinct ramping up of the great karmic wheel of reckoning that is amply displayed by the fact of who is effected by injected poisons and who is, indeed, not.]

1 “Truth wears no mask, seeks neither place nor applause, bows to no human shrine; she only asks a hearing.”

“The 1955 survey showed that over 90% of our population is below par mentally or physically...”

4 “The false “germ theory” of disease, upon which vaccination is based, has been the “blind leader of the blind” that has dragged the medical system and the impressionable public deeper into the morass of confusion and disease. However, our present concern, in this chapter, is merely to point out the instability of the nebulous theory of “anti-bodies” which is the main prop that holds up the dead corpse of vaccination... These illusive little nothings have fooled the people and served the uses of the doctors but have vanished into theory when subjected to the clear light of scientific investigation.”

“Dr. Shelton writes: “The whole of the modern medical practice of vaccine, serum and antitoxin therapy is based upon the supposition that the body manufactures substances called anti-toxins, anti-bodies, antigens, etc., which are capable of meeting and destroying toxins that get into the body. The idea seems to be sound, although it is possible that the work of destroying such toxins is that

of the detoxification carried on by the liver, and lymph glands, etc.. Anti-toxins, antibodies, antigens, etc., have never been isolated. They have only been assumed, while the practice based upon their assumed existence has been both a failure and disaster...”

5 “The renowned **Dr. Antoine Bechamp...**” [It is by this recognition of accomplishment that empowers the research of Eleanor McBean.]

Shelton – “Principles of Natural Healing” p. 478 - “The best, indeed the only, method of promoting individual and public health is to teach people the laws of nature and thus teach them how to preserve their health. Immunization programs are futile and are based on the delusions that the law of cause and effect can be annulled. Vaccines and serums are employed as substitutes for right living; they are intended to supplant obedience to the laws of life. Such programs are slaps in the face of law and order. Belief in immunization is a form of delusional insanity.”

“Dr. J.W. Hodge had considerable experience with vaccination before he denounced it and wrote a book on his collected data. In his book THE VACCINATION SUPERSTITION (p. 41) he states: “After a thorough investigation of the most authentic records and facts in harmony with the physician’s daily observations and experiences, the conclusion is drawn that instead of protecting its subjects from contagion of smallpox, vaccination actually renders them more susceptible to it....” [It is pertinent to note that this kind of insider revelation documentation is common among the ‘health professionals’ that actually have a reasoning faculty. Notable are others, such as J.J. Garth Wilkinson, and many of them are listed, with their experiences, in Eleanor’s book.]

6,7 Dr. Hodge lists – points regarding vaccination from his research and observation (22 points).

8 Title – “Smallpox Declined Before Vaccination Was Enforced”

[This phenomenon is a repeatable fact when research of other so-called ‘epidemics’ and vaccinations is conducted.]

“To mistake inferences or axioms for facts has been a curse of science.” Sir Clifford Albutt, in “Nature”

Chart showing decrease in smallpox deaths after decline of vaccination -

[Again, this is backed up by other research such as the Leicestershire Graph ~1840 to 1926]

15

16 Chart showing decline of disease without vaccination -

[These are the figures which directly correlate to Garth Wilkinson’s Catechism.]

17 “Inoculate the doctors” – poem by med student, Winnepeg

Inoculate for small-pox

Inoculate for mumps;

Inoculate for typhoid

For colds and nervous slumps;

Inoculate with cow pus

And germs of every brand

Inoculate with monkey glands

To make us young again.

But one fine day the laity

Will move in self-defence

To inoculate the doctors

With a little common sense.

22 J.W. Hodge, MD public confession – “To affirm that there never has been any scientific warranty for a belief in the alleged protective virtues of vaccination and that its practice is backed by

ignorance and indifference, is a sorry charge to make against the medical profession... but the charge, I regret to say is only too true...”

24 “He who knows only his own side of the case knows little of that.”

Another 18 points from Dr. Hodge -

25 “A mere assumption of belief unsupported by demonstrable facts is always open to criticism. It is easy to be carried away by the beauty of an ideal of entranced by the overwhelming appeal of a pet delusion... We have had much to learn but even more to unlearn. Many think they are thinking constructively when they are merely rearranging their prejudices.” George S. Weger, MD

26 Last word on “smallpox” – “Smallpox attained its maximum mortality after vaccination was introduced.. The mean annual (smallpox) mortality to 10,000 population from 1850 to 1869 was at the rate of (only) 2.04, whereas (after compulsory vaccination) in 1871 the death rate was 10.24 and in 1872 the death rate was 8.33, and this after the most laudable efforts to extend vaccination by legislative enactments.”

27 Dr. Oliver Wendell Holmes: “The disgrace of medicine has been the colossal system of self-deception, in obedience to which mines have been emptied of their cankering minerals, the entrails of animals taxed for their impurities, the poison bags of reptiles drained of their venom, and all the inconceivable abominations thus obtained, thrust down the throats of human beings suffering (merely) from some want of organization, nourishment or vital stimulation.”

29 “Vaccination is of very ancient origin -” [Goes over the historical details extending back to 1500 BC – this is very important obviously because the vast majority of this superstition was without the means to see what is going on – therefore was a *guess* – a *guess* that stuck and was capitalized upon.]

30 1896 – Carlo Ruta, Professor of Materia Medica at the university of Perugia, Italy:
“Vaccination is a monstrosity, a misbegotten offspring of error and ignorance; and, being such, it should have no place in either hygiene or medicine... Believe not in vaccination, it is a world-wide delusion, an unscientific practice, a total superstition with consequences measured today by tears and sorrow without end.”

32 “The Vaccination Problem” – by Joseph Swan [published 1936 – details not available on internet. But this complete book by this title by Trung Nguyen & Joseph Swan is available (preview & purchase ebook – https://books.google.ca/books?id=sMBHDwAAQBAJ&printsec=frontcover&source=gbs_atb&redir_esc=y#v=onepage&q&f=false]

34 “... But Jenner was one of the most resourceful men in excuse making that ever lived; let anyone read his and there will be no difficulty in coming to that conclusion.” [Of course, this is more that backed up by William White’s 696-page account of the 19th century – “The Story of a Great Delusion” published in 1895.]

38 Jenner’s training.

“As for the vaccination discovery it appears to have been founded upon what Dr. Hadwin calls a superstition among the dairymaids” [Consistent with Wm. White.]

39 “The frequent and variegated vaccinations given to our service men give us a full-scale picture of what “repeated vaccination until it no longer takes” will do to the body and brain. Thousands of our healthiest men at the prime of life were rendered insane and millions of others were infected with disease of every description including the very ones they were “protected” against...”

40 Vaccine reaction/disease = Vaccinia

Proof of corruption in the Encyclopedia Britannica from the 8th to the 11th editions.

41 Falsified death certificates well before the publication of this book. [The practice obviously has never been given up.]

44 Chapter 5 – “Cancer Caused by Vaccination”

“The chief, if not the sole cause of the monstrous increase in cancer has been vaccination.” - Dr. Robert Bell, the famous cancer specialist of the British Cancer Hospital.

49 Herbert Shelton on cancer: initial statement he gets wrong, then corrects -

a) "There is no specific cause of cancer."

b) "What then, is the cause of cancer? It is an evolution out of toxemia (poisoning)..."

50 Dr. George Weber – "No germ for cancer has yet been found, and, in the author's opinion none ever will be found. Cancer is on disease that is distinctive of toxemia (poisoning) plus trauma, plus irritation..."

Dr. Robert Bell concurs – "Cancer is rooted in every drop of blood in the body, and we may as well expect to stop the growing of apples by picking them off the trees... as to expect to destroy malignancy in the human body by attacking the outward growth..."

51 "... However the multiplying of medical hospitals has never solved the cancer problems because their methods defy the laws of nature, ignore the cause and purposely interfere with the orderly healing efforts of the body..."

"Some of the most observant doctors have recognized the hazards of cutting or tampering with a growth on the body... that "merely drawing a silken thread through a benign, slowly-developing tumor would transform it into a malignant, rapidly developing one", and that cutting with a knife had the same effect."

52 Lumps on breasts – overworked lymph glands. [Same as the tonsils.]

Dr. Willard Parker - "... Cancer is to a great degree one of the final results of a long continued course of error in diet, and a strict dietetic regimen is, therefore, a chief factor in the treatment – preventative and curative."

"... a diet poor in mineral salts among the cancer plagued and a diet rich in mineral salts among the cancer-free people..."

54 "This deviation into the subject of fasting and diet may seem a little off the subject in a chapter on cancer yet it is of great importance in that it offers the best solution to the cancer problem. In fact it is the basis of healing of all diseases..."

55 "The tonsils are the most vulnerable targets of these "mixed up" doctors. Tonsils are very necessary lymphatic glands of filtration that enlarge when the body is overloaded with incompatible foods and drugs..."

57 Nichols – "Blunder in Poisons" – "At the present time little children are subject to the assault (with a deadly weapon – the poisoned needle), and a healthy, unvaccinated child, in the eye of the law, is considered a nuisance and as dangerous at time of an epidemic as a mad dog." [The common emotional charge, based, of course, entirely on pure fiction – which actually makes it evil.]

58 Dr. J.W. Hodge – The Vaccination Superstition – "Think of the unparalleled absurdity of deliberately infecting the organism of a healthy child with the poisonous matter obtained from the sores of a sick animal, under the pretense of protecting the victim of the ingrafted disease, against the contagion of another disease."

59 Montague R. Levenson, MD, PhD – presented to the American Association of Physicians and Surgeons at Indianapolis – January 1896 – table – comparison of smallpox, cowpox and syphilis:

"Here we have some of the highest authorities who have produced the clearest evidence showing that vaccinia (vaccination disease) is modified syphilis..."

63 "... we still hear some people (not so enlightened), claim or repeat what they have been taught to say, that "vaccination has reduced smallpox and certain other diseases, and has been a blessing to mankind". Those who make this claim have not bothered to consult authentic records or become acquainted with the most elementary facts on the subject. When traced down, these statements are found to originate from the fabricated propaganda of those who profit from the sale of serums and drugs. Unfortunately many of these people are in places of authority where they influence the thinking of students, writers, public officials, teachers and others who mold the thinking of the masses. These errors in theory and practice have steadily reduced our nations health to a state of crisis in which 90 per cent of the people are either critically ill or below par, physically or mentally." as per,

Heading: "GOVERNMENT REPORTS REVEAL MORE DEATHS FROM VACCINATION THAN FROM SMALLPOX."

Vaccinia in the army – from the Surgeon General of the Army – 1918-1919.

64 Charles M. Higgins – "The Horrors of Vaccination Exposed" - NY City - "... there had been more deaths from vaccination than from smallpox in New York, every year for the past 15 years." [Only remotely even possible by way of propaganda – the very same propaganda that upholds the story to this very day.]

65 "In the Encyclopedia Britannica (9th edition), under the title of VACCINATION, by Dr. Charles Creighton, we find some carefully authenticated statistics showing that vaccination has caused a great many cases of syphilis, cancer, tumors, scrofula, eczema, tuberculosis, etc.."

68 George Bernard Shaw – "During the last considerable epidemic at the turn of the century, I was a member of the Health Committee of London Borough Council, and I learned how the credit of vaccination is kept up statistically by diagnosing all the re-vaccinated cases (of smallpox) as pustular eczema, varioloid or what not – except smallpox."

[This glaring, **repeated** tactic is shown throughout the ages – one of the most prominent being the relabelling of "polio", in India, as "flaccid muscle disease".]

"Post-war Germany reveals truth about vaccination" – "When it was seen that the profits were to be made by the foreign invaders (America), they admitted the uselessness of the practice..."

69 Dr. Cameron – "The character of the virus cannot be changed by passing it through the cow, anymore that by stunting an oak it can be converted into a gooseberry bush."

HEART TROUBLE FROM VACCINATION - "Earl Richardson (Colorado Springs), was vaccinated by the local doctor when 6 years of age. Up to that time he was strong and healthy, but 9 days after the vaccination he developed an illness accompanied by extreme nervousness that the doctor diagnosed as St. Vitus Dance. He was given an examination and found the heart and other organs to be sound and unaffected. [Allopath's think that it is caused by "group A streptococcus", but this is a secondary issue here.] A few days later complications set in and the doctor was called again. On examination he found that the boy had developed a valvular heart condition. The mother took him to Kentucky to three heart specialists who all declared that it was due to infection (standard narrative that apparently holds to this day). **One doctor said the ailment was probably due to vaccination, as he had seen some other cases of valvular heart trouble develop after vaccination.** Four years later, when Mr. Rowton had his last interview with this family, the child was still too ill to attend school. His mother said he often had to sleep sitting up in bed on account of the heart condition."

70 "The heart is the strongest muscle in the body and it takes an extreme amount of poison or abuse to impair its functioning. Tobacco, liquor, drugs, cola drinks, poison preservatives in foods, and poison spray on farm produce, in addition to the incompatible, devitalized foods are some of the other poisons that can corrode the tissues of the heart as well as every cell in the body..."

73 "One of the effects of the poisons injected into the blood to "prevent" (?) disease is that it weakens the nervous system and gradually breaks down the nerve centers in the brain. The end result of this is insanity..."

74 Emerson – "Knowledge is the antidote of fear, Knowledge, Use and Reason, with its aids."

"Ignorance spiked with greed has put a death machine (vaccination) into the hands of doctors, and ignorance and fear have driven people into its lethal power. Emerson was right when he said that the right use of reason and knowledge could free mankind from fear. It is certainly true that a little knowledge applied in the right places would wake people out of their hypnotic stupor of believing that the popularized poison could unpoison them and make them well again."

[Of course, perspectives, here in 2024, tell us distinctly that the relentless pounding of propaganda, through the use of repetitive content, throughout much of history, makes the "hypnotic stupor" pretty much impossible to overcome – the "mooneys" come to mind here. And add to that

“The Origins of Totalitarianism” and “The Rape of the Mind – The Psychology of Thought Control, Menticide & Brainwashing. This IS the difference between 1957 and 2024.]

75 “We do not have to be medical experts to appreciate the gravity of this startling report, which for once in a lifetime has completely broken through the conspiracy of silence with which the medical men usually surround their operations.”

Heading: “Encyclopedia (Britannica) reports diseases caused by vaccination.” [Again, we have the dominance that propaganda has over sporadic bits of information and reporting.]

76 “Vaccination Delusions” by Thomas Morgan.

78 Dr. Herbert Snow – 25 years staff surgeon – London Cancer Hospital: “Of recent years, many men and women in the prime of their life, have dropped dead suddenly. I am convinced that some 80 percent of these deaths are caused by the inoculations or vaccinations they have earlier undergone. **These are well known to cause grave and permanent disease of the heart.**”

80 “The fathers (in England) who refused to have their children serve prison terms under compulsory vaccination but many of them accepted this punishment in order to save their children from the deadly effects of vaccination.”

83 “Many of the new strange diseases of modern times can be traced to vaccination or medication of the child or the mother.”

84 “About November 13, 1922, my wife (18 years of age) submitted to vaccination in order **to hold her position with the telephone company.** Up to the time of the vaccination she was in good health. On December 8th, she became quite ill with enlarged lymphatic glands under her arms. On the 10th she died... The doctor pronounced it heart failure...” [The unfortunate part, of course being, is that we don’t learn from mistakes (propaganda).]

85 “Another school teacher of Colorado Springs submitted to vaccination in March **in order to hold her position.** She was never well after that and died on November 17, 1922.”

86 List of tests and jabs that are “popular but damaging” -

87 “Medical science is a form of delusional madness from which few medical men ever recover. Backed by commercialism this madness runs roughshod over the life and health of the people.”

Herbert M. Shelton, PhD, DC, ND

89 “Medical Trust Unmasked” – 1935

92 “This doctor consulted his attorney and found that such a law had been engineered through the state legislature by same underhanded methods they (the medical trust) had pushed other death-dealing measures into operation, such as (1) vaccination, which is known to kill more people every year than smallpox does, (2) tuberculin testing of cows which required the killing of 1,500,000 healthy cows because of false testing in just 10 years time, with a loss of \$1,500,000,000 to the dairymen, (3) rabies shots for dogs, which increase diseases in the animals but do not prevent rabies, [‘rabies’ does not exist] (4) fluorine (rat poison) in public water supplies because there is a cheap surplus of the product on hand and the owners want to make profit on it, also other practices that are damaging to the public but profitable to the promoters.”

93 “... Dr. Herbert Shelton, and head of the Hygienic Movement, was imprisoned several times in New York because he helped people overcome their diseases by observing the laws of health. Saving lives and restoring health is considered a crime in New York and several other states that are ruled by the medical trust, if these works are done by any outside the medical ring...”

94 Dr. Simon Katzoff: “Doctors live by disease, so the public can expect the supply of disease to meet the demands of the medical profession.” [Hence the endless “nosological list”.]

95 Heading: “Health books attacked by medical trust.”

99 “Where crime pays – We like to believe that crime doesn’t pay. But we see the constant multiplication of deaths from unnecessary operations and medically poisoned patients where the doctor “buries his mistakes” and then collects a small fortune from the survivors...”

100 Polio chapter – 100-138 – blows “polio” and Salk out of the water.

103 “In Australia when a few children died as a result of smallpox vaccinations the government abolished compulsory vaccination in that country and smallpox suddenly declined to the vanishing point. Australia had only three cases of smallpox in 15 years as compared with Japan’s record of 165,774 cases and 28,979 deaths from this cause in only 7 years (1886-1892) under compulsory vaccination and re-vaccination.”

104 “... and it was irrefutably proved in court that the vaccine serum killed them.”

105 Dr. William Koch: “The injection of any serum, vaccine, or even penicillin, has shown a very marked increase in the incidence of polio, at least 400%. Statistics on this are so conclusive, no one can deny it.”

106 “If they would care to observe the “polio season” they would see that it is only at the times when it is *created* by the doctors with their *poisoned needles* and the people with their excessive eating of sugar products and other devitalizing and semi-poisoned foods.”

Dr. L. C. Appel: “The fact that vaccination is either the (a) adding of a disease to a body already weighted down with disease, or else, (b) the giving of a disease to a perfectly healthy body, is the medical reason why some of us (medical doctors) oppose vaccination and urge its abolition...”

Dr. Harry Baybee: “My honest opinion is that vaccination is the cause of more disease and suffering than anything I could name.”

“... the point that struck them was that the paralysis started in the limb in which the injection had been made.” [This particular phenomenon is listed several times within this book.]

107 The truth of polio was well established in 1950. [Which is an important issue, given that the “disease” referred to as “polio” is perfectly alive and well on the propaganda airwaves here in 2024.]

108 “The serum makers probably had a surplus of vaccine to sell, as is the case in this country (United States) when the scare campaigns are engineered and the gullible people are stampeded into the vaccination centers to be “shot”.”

109 “In an article in *The Journal of the American Medical Association*, (July 3, 1926, p. 45) on “NERVOUS DISTURBANCES AND SMALLPOX VACCINATION”, is stated, “In regions in which there is no organized vaccination of the population, general paralysis is rare. *In patients with general paralysis*, he (Dr. Daraskiewicz) has never seen smallpox scars, but *smallpox vaccination scars were always present.*” Various physicians agreed that, **“It is impossible to deny a connection between vaccination and the encephalitis which follows it.”**

“... Isolated germs have never been known to *attack* and cause decay and disease of any part of the body. It is the corrosive *poison products of decay* that form the body of the vaccine that does the damage and causes the disease. Germs, bacteria and other such organisms are a part of decayed substance; they evolve from it and...”

110 “Without an “air-borne” virus to play with, the whole vaccine racket would collapse. Therefore, the people are constantly reminded [repetitive content] that polio is “catching” and they must have anti-polio “shots” that are *intended* to build up “anti-bodies” (which are also mythical suppositions). Although the promoters of the virus theory of polio insist that viruses are *living* organisms that fly around in the air and cause polio, this has never been proved...” [This is the fundamental contention with Professor Bechamp – “Normal air contains no pathogens.”]

Virus definition ambiguities (1940-1944). - “What is a virus?”

111 “... When poisons from such things as vaccines, drugs, narcotics, contaminated and devitalized foods etc. cause degeneration of the cells and disease, the condition is usually labeled according to the location of the most decay. For instance, when there is *inflammation* of the kidney it is called Bright’s Disease; if it is in the joints, it is arthritis...” [Amazing insights from 1955!]

Dr. Scobey - “After exhausting medical literature in the form of case-histories of the subject in all lands and at all know times of its appearance, he concluded: (1) It has never been proved that the ‘virus’ of polio can cause that disease in human beings; (2) *It has* been proved that polio can be caused by cyanide poisoning.” (*Prevention Magazine*, June 1950)

112 1949 – New York State Health Department - “... In short, they learned that the disease was not contagious.”

“The supposition that viruses entered through the mouth and nose led the experimenters to make exhaustive tests on both animals and human beings, mostly prisoners and orphans in institutions. They were exposed (by close association) to polio patients and their throats and nasal passages were frequently swabbed with matter (from the patients) that was supposed to contain viruses. No polio was produced in this way and about the only noticeable after effect was that the subjects of the experiments lost their sense of taste and smell due to the damaging effects of the poisons in the serum that was used on the swabs.” [This 1949 experiment replicates the procedure and findings of thorough experiments of Milton Rosenow, MD – 1913.]

Dr. Jonas Salk - “... A confused little man with a batch of putrid serum thinks *he can improve on nature.*”

113 “An account of one of the deadly polio vaccine experiments on living human beings may be found in the *Journal of the American Medical Association* (Dec. 28, 1935, Vol 105 p. 2152). The report was made by the medical director of the United States Public Health.

He says: “During the past year in the United States, several thousand individuals, mostly children, have received subcutaneous and intracutaneous injections of treated poliomyelitis virus with high fatality.” He describes 12 cases of which 6 died within 20 days of receiving the first dose of vaccine. Of the remaining 6, hope of recovery was doubtful. This was from (supposedly) *live virus.*”

“Poison always does serious damage no matter how it is taken, so why nurture the hope that any special brand of “*virus*” *poison* vaccine can ever be expected to do any good? **If the physicians cannot comprehend this simple fact then the people will need to do their own protection by avoiding all vaccines and the rest of the harmful practices of modern medicine.**”

114 “Even if vaccines *were* useful, an artificial *laboratory disease* induced in a healthy monkey by methods not experienced by man is not a dependable means of judging the effectiveness of a vaccine in a self induced cleansing disease of man.”

115 Dr. John Toomey: “Dr. Toomey gives evidence to prove that “no animal gets the disease from another no matter how intimately exposed”. For this reason QUARANTINE FOR POLIOMYELITIS IS USELESS.”

“...These 2 doctors are still floundering around in the delusion of “virus causation” but they are discovering the fallacies and in time will probably emerge into the light. When they inject some of the putrefied protein which they call *virus vaccine*, into people it takes less of it to produce toxic poisoning and paralysis than it does in animals This is not because...”

116 “... This means that out of every 100 who are vaccinated with the Salk vaccine, 10 can be expected to get polio...”

117 “Salk Story by Bayly – ““No case was considered as immunized unless it had received two shots of the vaccine. This means that a child developing poliomyelitis after the first inoculation and before the second one would automatically be placed in the uninoculated class”, and would not be counted as a Salk vaccine casualty even though he died of the “shot”...” [Here we can confirm that the same tactics are still in play up to this day.]

“OTHER CAUSES OF POLIO – Although vaccination is one of the quickest and surest ways of getting polio because poisons are injected directly into the unprotected blood stream, there are a number of other causes that should not be overlooked. Some of the most common of these are listed below and discussed briefly in this section:...” [Of the 7 causes listed, number 3 *Poison sprays* is illustrated by Jim West’s article in the *Townsend Letter to Doctors*, June 2006 where Morton S. Biskind, MD relates the evidence to show how the dispersion of DDT produced an exact replica (charted) of *polio* a short time later.]

119 “The Salk Story” – Bayly – p. 24 - “Persons with bulbar type of polio (an especially fatal type) give a history of removal of tonsils and adenoids more frequently than do persons with other forms of

poliomyelitis. If a person who has had tonsillectomy develops polio the likelihood of bulbar involvement is 4 times as great as one where the tonsils are intact.”

120 “Dr. Benjamin Sandler, of North Carolina called attention to the relationship between polio and the excessive use of sugar and refined starches such as white flour products and processed corn meal...”

“... Caffeine is not only a habit forming drug but it is destructive to the tissues of the stomach, eyes, nerves and kidneys. In fact there is not a part of the body that is not injured by this drug...”

122 “The very foods that cause *acidosis* (the forerunner of polio) are served in the hospitals to the polio patients.” [2 points here: 1. *the forerunner to polio* and all other “diseases” – cancer, etc., 2. as per Dr. Robert Morse ND, Dr. Robert Young, Dr. Otto Heinrich Warburg & many others – Warburg (1931 Nobel Prize) – “Root cause of cancer – acidosis and hypoxia”.]

123 “According to a survey made in 1946 regarding the percentage of polio recoveries under the various methods of healing we have this interesting report:...”

124 Duon Miller - “Any doctor who will suggest to a pregnant woman that she drink “cola” or suggest that a child of any age drink “colas” should be disbarred by the Medical Association and given the rest of his life to realize that the letters M.D. after his name actually mean “Mentally Deficient”.”

“**Delay** in development of fragmentation of bone growing centers, porous or soft bone, are commonly seen in X-ray of recent POLIO patients. These X-ray evidences, having appeared long before the attack of polio, strongly indicate that in the polio patient there was a pre-existing state of malnutrition.”

“... **No** drugs, medicines or medical treatments have ever been able to cure any of these diseases and no germs have been isolated as the cause. But they all respond to fasting, cleansing, proper diet and improved circulation...”

125 “... Viruses, germs or bacteria did not cause these epidemics. The men were stricken with acidosis from malnutrition. They suffocated in their own internal poisons. They had the fever, the swelling, the sore throat, the lack of coordination of muscles and finally paralysis the same as our present polio patients.”

“When will our blundering physicians ever learn to profit by the experiences of the past instead of torturing animals and experimenting on and killing people in an effort to learn something that is already known?”

INSECTICIDES such as *lead arsenate*, hydrocyanic gas and other *cyanide* compounds, *DDT*, *parathion* and other deadly poisons are a constant cause of death and disease...”

126 “FORMALDEHYDE IN MILK has been reported as a cause of polio...”

“The Salk vaccine also has *formaldehyde* added to the poison decomposed protein from which the vaccine was made, which adds to its toxicity...”

127 “The fear of polio or any other disease can help develop it. On the other hand a clean body and a happy state of mind can help immunize against it.”

[Note: The entire state (pretty much) of the illusory free world is a massive collection of the *placebo* & the *nocebo* effects.]

128 “... (4) When the *natural* vitamin B is removed from the flour and the *synthetic* vitamin B is added the advertiser’s claim that it is “*enriched*” with vitamin B; but it is actually poisoned by this coal tar product that is not a true vitamin...” [‘They’ knew this back then which alludes to the quote “My people are destroyed for lack of knowledge” – sometimes it is impossible to actually find the “knowledge” among the propaganda campaign!]

“... **Polio is a man-made disease...**”

“Although the real cause and cure of polio is obvious, the promoters of polio find it more profitable to “look” for a cure than to “find” it...”

130 “THE PRECAUTIONS that the polio foundation give to the public have no effect at all in controlling polio...”

“THE SALK VACCINE is just another failure mechanism because it, too, is wandering blindly in the wrong direction and is spreading disease rather than curtailing it and is killing rather than curing.” [Eleanor McBean, in order to make this statement, is backed up by not just a mountain of research, but also the testimonies of countless “insiders” of the medical “profession”. This is something that is missing today on a comparative scale, due to the refinement of the Rockefeller drug empire and its stranglehold on not just the public, but more importantly on its own members. This is obvious, for anyone wishing to actually look.]

132 “The Salk experiment is based on false premises and refuses to deal with original causes of polio. From the basis of a fictitious ‘virus’ the vaccinators are using other poisons over which they have little control. In their mad scramble to launch a new money-making empire, it appears they are willing to ‘guinea pig’ America to death.”

“The Drug Story” by Morris A. Beale - “... disease is more rampant because of commercial greed. When the Rockefeller-Standard Oil crowd muscled into the drug and pharmaceutical business in such a big way, ‘scientific medicine’ (if there is such a thing) was turned into a racket which shortened many American lives from ten to twenty years.” [Of course certain proof of this very claim from Beale is there from both John Robbins (“Healthy at 100”) and Dan Buettner (“The Blue Zones”).]

134 “The years went by and many doctors in various parts of the world, England, Australia, France, United States, etc. Learned that viruses did not cause polio and that the disease occurred in patients soon after vaccination, and in the limb in which the injection had been given. Many lives would have been saved if my book could have reached the people. But selfish medical interests destroyed it because of information that has since then been proven to be true. It’s hard to say what they will try to do to this book. But whatever they attempt is likely to boomerang and explode right under their plot.” [This sentiment regarding the crumbling of falsehood by exposing the truth has been presented by both Montague Levenson on Bechamp’s research (~1908) and Christopher Bird on Gaston Naessen’s research (1990).]

“... If you believe that the real answer to polio is *honestly being sought* and would be available to the world when found, then you would also believe that General Motors would back research to make the use of automobiles prohibited.”

“Since 1938 (to 1955) the MARCH OF DIMES has reaped over \$300,000,000. What have they done with it?...”

135 “Philanthropy has now become one of the 10 big industries in the U.S.” [????? - they knew this in 1955!!]

136 “If we remove the *obstructions* and supply the body with the necessary building material, nature will heal practically any disease so long as too much of the vital organs or glands have not already been destroyed by disease or operations.” [Robert Morse, ND]

“WHAT CAUSES EPIDEMICS? - Most people are over loaded with these *infusions of blockade materials* that cannot be utilized by the body. When some extra strain is put upon the vital forces such as sudden change in the weather, fatigue, fear, worry, wrong food, etc., the body is unable to hold back the “bursting tide of accumulated waste” any longer and lets go – forces it out in a cleansing program, that usually lasts from 5 days to two weeks. Colds, eruptions, fevers, diarrhea and even paralysis are symptoms of this cleansing effort to rid the body of waste that has not been eliminated through the usual channels. People do not *catch* diseases from others who have it. All those who are ill *built their own causes* and the same *stresses* triggered off the “cleansing act” in all who had reached the saturation point of poisons.” [It took me approximately 63 years to learn what is written in this paragraph – if only I had have read this book earlier as it came out just prior to my birth (1959).]

“R.B. Pearson made an exhaustive study of the data and experiments that have been made with polio vaccines and summed up his finding as follows: ...” [Pearson, being one of the kingpins for truth in the past 158 years, since the declaration of truth was formally submitted to the French Academy of

Sciences, Comptes Rendus, 1866; Ethel Hume's book was based somewhat on Montague Levenson's notes from his interview with Professor Bechamp.]

137 "Many methods have been tried by drugless doctors in an attempt to rid the body of the blockage materials that stood in the way of recovery... the method that has brought the best and surest removal of poisons and recovery from disease is FASTING..."

[Dr. John Christopher's 3-day, cleansing juice fast actively pulls toxins from the organs.]

"Food Combining Made Easy" by Dr. Herbert Shelton

"Hot baths have been beneficial in many cases of polio. The late Bernarr MacFadden said, "A warm bath 98 to 99 degrees [F] for an hour or more, two or three times daily, with drinking of nothing but water, if adopted immediately after the onset of polio [symptoms] – should cleanse the system and divert the 'attack'." (No soap or anything else should be used in the water.)"

"A friend of mine who was paralysed after his shots at camp during the First World War said he lay helpless in the Army hospital for weeks, then one night when the nurses went to a dance in the recreation hall downstairs he dragged himself out of bed and pulled himself across the floor by his elbows until he reached the bathroom. Then he filled the tub full of hot water and managed to get in and stayed there quite a while. When he got out he could walk..."

138 "Some of the richest sources of calcium are: ..."

"TO REMOVE POISON SPRAY FROM FRUITS AND VEGETABLES"

Eleanor McBean's Bibliography – astounding list.

140 One of the cholera drinking guys – "Numerous experiments with germs conducted in the past have conclusively proven that bacteria does not and cannot produce disease in a healthy organism. Years ago, Dr. Pettenkofer, professor at the University of Vienna, came to the conclusion that germs alone do not produce pathology and for years defended his position from the lecture platform and his writings. On more than one occasion he and his assistants swallowed the contents of glasses containing millions of living cholera germs. Dr. Thomas Powell of California, who is believed to have taken more germs than any other man, challenged his medical colleagues to produce a single disease by germ inoculation..."

[Add to this list Dr. Robert E. Willner ("Deadly Deception: the Proof That Sex And HIV Absolutely Do Not Cause AIDS") who, several times in front of an audience, injected himself with supposed "AIDS infected" blood.]

"Medical history credits Edward Jenner, an English pharmacist and surgeon (1798), with the discovery of vaccination [actually *variolation*, a different procedure, initially]. Inoculation, in some crude form has been practiced by savage and primitive people from an unknown period, ... All that Jenner did, was that he helped to resurrect an old custom popular then among dairymen and milk maids and supplied it with modern theories."

"**If** any protein enters the body illegitimately, through any channel other than the digestive tract, it becomes a strong poison. Proteins in themselves cannot be used by the body – they first require to be broken up by the various process of digestion into Amino Acids... Injections of therapeutic serums in beings and animals result in impairment and great injury to some of the most vital organs – heart, lungs, liver, kidneys, nerves, etc..."

142 **"Among the greatest crimes today is that of Vaccination By Compulsion. The forcible introduction of pus into the body of man, woman and child, with or without his consent is a threat to personal liberty, is unconstitutional and a crime against humanity..."**

143 List of prominent people refusing the vaccines.

"Statistics used by the Medical Profession prove to the uninformed public the health-promoting qualities of serums, toxins, anti-toxins, etc., that these have reduced or eliminated infectious diseases and have conquered epidemics – smallpox, typhus, cholera, etc.. **This is false and misleading advertising and propaganda.** These figures and statistics have been skillfully juggled by deliberately distorting the facts to frighten people into being vaccinated."

144 “Dr. Russell T. Trall, the eminent Natural Hygienist, considered smallpox “as essentially... not a dangerous disease”. He cared for large numbers of patients afflicted with smallpox and never lost a case. Under conventional medical treatment, patients were drugged heroically, bled profusely, were smothered in blankets, wallowed in dirty linen, were allowed no water, fresh air and stuffed with milk, brandy or wine. Antimony and mercury were medicated in large doses...”

“So-called infections or zymotic diseases are brought on by Toxic Poisoning (Sepsis), resulting from protein putrefaction of animal origin. Toxins vary from slight irritants to most virulent poisons. The most septic poisons are of flesh or animal origin and produce infectious diseases e.g. bubonic plague, smallpox, yellow fever, diphtheria, etc. Toxins arising from carbohydrate decomposition are of a much less virulent nature and result in catarrhal conditions, e.g. laryngitis, influenza, etc..”

145 Plagues and epidemics in the past were not conquered by the use of vaccines but were cleared up through sanitary and hygienic measures – street sanitation, sewers, garbage disposal, adequate water supply, toilet facilities, better living quarters with spacious windows and ventilation, fresh air, light, sunshine, unspoiled, natural food, refrigeration and better food storage, public recreational facilities, parks, better working conditions, social and family relations.”

146 “REPORT ON SALK VACCINE – Those who hopefully believed the sales talk of Salk vaccine vendors and the National Foundation for Infantile Paralysis are disillusioned and disappointed. Far from wiping out polio, it apparently has increased it in many states and cities...”

149 “January 14, 1956 – CHILDSLAUGHTER, INC. - The U.S. Public Health Service should be thoroughly “renovated” by Congress this winter, or abolished in its entirety. Its record in the Salk vaccine hoax, which is just coming out, is one of the most ghastly things in the history of Big Government and Big Medicine.”

151 “In May some state public health officers met in Atlanta, expecting to be told what had gone wrong with the vaccine program. Instead the USPHS scientist said he was not permitted to disclose what happened because it would jeopardize the investment of the pharmaceutical firms in the vaccine program.”

153 “The worst polio epidemic in history occurred in Massachusetts after 130,000 children were inoculated with this Salk concoction. Infantile paralysis increased tenfold over the 1954 figures until the Bay State authorities banned its use in their borders. Yet the racketeers who are begging for NFIP cash in Florida have come up with the false statement that the reason for Massachusetts’ polio rate is that “no children were inoculated there.””

154 “Dr. Mills has discovered that the cause generally is faulty nutrition, just as Dr. Sandler did. He also adds as contributing causes fatigue, falls, tonsil surgery and DDT sprays. Tonsillectomies are unnecessary and would never be committed if the medical profession knew the reason for tonsils and that melba toast or other coarse food will scrape off the tonsils the toxins which cause the inflammation.”

“Few cases of polio have been known where the bowels were not impacted with decaying feces.”

“February 4, 1956 – THE ROMANCE OF FLUORIDES (No. 1) – Salk vaccine and Sodium Fluoride have one thing in common. The Salk concoction kills and cripples children quickly. Sodium fluoride in municipal water systems slowly poisons everyone who drinks the water... investigation, nation-wide uncovering 8 fluoride facts...”

157 “This week we are going to prove, by competent medical and mental authorities, that the toxic chemical known as sodium fluoride is a slow acting but positive cumulative degenerating poison, destroying the cells of the heart, kidneys, liver, and other soft-tissue organs.” [To think of the water supplies in North America that have been using fluoride in their systems since this declaration in 1955!]

“Fluoride, even in minute doses, accumulates in the body. After sufficient time, it causes cumulative poisoning. Fluoride is excreted largely through the kidneys. Consequently, earlier and more severe damage occurs in people with impaired kidney functions...”

159 “Benjamin C. Nesin, director of NY City’s utility laboratories says: ‘Never in the history of water supply has a substance so toxic in nature, with such a high degree of physiological potency, and associated with so much adverse evidence affecting public health, been considered for introduction into public water supplies.’”

“The Rev. Lyle F. Sheen of Geneseo, Illinois, after an investigation of the effect and non-effect of fluorides, has offered \$1,000 reward to anyone who can prove (1) that sodium fluoride will prevent tooth decay, (2) that SF is not poisonous even in small amounts, and (3) that the moon is made of green cheese.”

“HOW THE BIG LIE WORKS – Adolph-the-Worst used to say that if you tell the people a big enough lie, often enough and vigorously enough, they will believe it. That’s what the newspapers are doing about the Salk vaccine which has been thoroughly discredited by facts printed in Capsule News.”

161 “Twelve years and a quarter billion dollars have failed to produce even hope of a polio preventative...”

“Now, \$47 million is a whale of an incentive to stay in business... the expenditure of even one million brings a lot of power, lots of power. That is why Salk shots were adjudged “safe” many months before this deadly concoction was even tested... and why the tests were ignored and production continued...”

“Actually no polio vaccine can be effective as a preventative because vaccine is based on the wrong principle. Polio bugs or viruses or bacteria are not the cause of polio – but the result. Its cause and prevention were clearly and irrefutably demonstrated in 1949 by Ben Sandler, MD, a nutritionist at the Veterans Hospital in Oteen, N.C..”

163 “Following Dr. J.E. Wyatt’s frank statement that Salk vaccine has given polio to more people in the nation than it has protected from the disease,...”

165 “Commonsense was thrown overboard and the protests of the few thinking medical men were discarded. And as we predicted, this highly-touted panacea turned out to be a sham – a despicable hoax – and a breeder of disease (gamma globulin)...”

“Just remember, no vaccine ever prevented any disease. Sanitation and hygiene, together, have beaten smallpox and malaria. More persons die of smallpox today in countries having compulsory vaccination against smallpox than pass out from that disease in places where no law compels a population to so poison its blood streams.”

168 “Thousands of vaccines have been brought forward and not one of them ever accomplished what was hoped for it. No need to go into the whole bevy of these rotten disgusting, filth concoctions – let us briefly inspect the authentic history of the most common of all vaccines – the putrid cow-pus that is supposed to prevent smallpox. Edward Jenner, who died in 1823, invented this anti-smallpox vaccine. But up to the time of his death he was not certain whether the pus from a diseased cow or the grease from the hocks of a diseased horse was the better preventative for smallpox. He admitted, just before he died, that his vaccine was worthless.” [Ample confirmation of this claim is demonstrated in William White’s 696-page account of the late 1700s and 1800s, “The Story of a Great Delusion”.]

169 Compulsory Vaccination – England - 1854

1799 – Smallpox vaccine invented.

“It is also interesting to note that despite widespread vaccination against smallpox, the death rate from that disease, proportioned to the population, is the same today – about 18% - as in the days when there was no vaccination whatsoever.”

171 “Nobody will be able to stay this holocaust because the public has been so propagandized – covering the infallibility of medical prowess – that the average MD, in public esteem, is now placed somewhere between the saints and the Almighty. When such a condition exists in the world – the finding of plausible and acceptable excuses for the failures of the Salk concoction rests with the mere matter of the proper selection of words that have public appeal. When the United States Government votes millions of dollars for free Salk vaccine inoculations – and the medical men see their incomes

mounting during 1956 by thousands upon thousands of dollars through this “skin punching technique” – what happens to the helpless little children involved means very little to the dollar-grabbers.”

“I take no pleasure in bringing this sort of truth to the American people. I would much rather forget that such things could happen. But I am dedicated to the service of humanity and as long as I have life, I shall say what is closest to my heart.” [“The researchers of truth should not concern themselves with those who they may hurt by way of that research.”]

172 “**Making the lay population into guinea-pigs for rash experimentation will have its repercussions in a manner the orthodox doctor will not enjoy. And those repercussions will come swiftly because the American public can be fooled only just so long.**” [****Important here – I reiterate – M. Levenson displayed these sentiments in the first decades of the 20th century; C. Bird also did the same in 1990 – propaganda overrules and overrides all common sense and all notions of what ‘justice’ is and how it may come to fruition – THIS MUCH IS OBVIOUS, HERE IN 2024!**] Note: this is not doom or gloom, it is old world reality – see Conclusion.

“Dr. Shelton’s Hygienic Review August 1951... It has long been known that inoculations of all kinds cause nervous diseases including paralysis. Smallpox vaccination often results in paralysis of one side of the body. That it also causes encephalitis lethargica (sleeping sickness) is now well established. All vaccines and serums tend to produce nervous diseases...”

174 “The Australian physician, McCloskey, reported cases occurring more than a year after inoculation...”

175 “**... If there were a real Ministry of Health, instead of the farce that they are, they would know that there are helpful ways of assuring health for children, that there is no such thing as immunity, and that harming the organisms of children is not the way to prevent disease in them.**”

[If one is to consider the possibility of the average brainwashed individual’s acceptance that there are no “bugs in the air”, imagine how far away they may be in understanding that the whole “immune” story is also a complete hoax!]

“The contentions of Hygienists, made many times during the past twenty years, that vaccines and serums are among the chief causes of poliomyelitis, is thus verified, but the “scientists” (by which is simply meant, medical men who give the serums and vaccines) do not admit this to be the fact. They say instead, as quoted in the *Times* article, “It must be made clear that we know immunization is not the cause or even a cause of poliomyelitis...”” [Here we have the link showing how the propaganda train is fulfilling its mandate – via MSM – pre:1955.]

177 “It does not really matter whether the vaccines and serums are the cause of poliomyelitis, or merely complicating factors, the damage is there, and it is folly to think that the body can be rendered more resistant to any so-called disease by seriously impairing it...”

“... Are medical treatments responsible for the paralysis? I would answer the question in the affirmative and challenge the profession to produce cases of paralysis that have developed under non-medical care.”

178 “... But there is not a shred of unequivocal evidence that any vaccine or serum ever prevents disease. There is no justification for parents subjecting their children to the risks inherent in inoculations and vaccinations and there is certainly no justification for resort to compulsion in the use of these vaccines and serums. Compulsory inoculation and vaccination is a form of tyranny that sooner or later, mankind must destroy.”

179 “Before parents can be induced to submit their children to the dangers of inoculation in this manner, and especially before they can be induced to permit their children to be used for purely experimental purposes, **they must first be frightened out of their wits.** There is nothing like an epidemic to frighten ignorant people...”

[When one does the research, it becomes clear that the majority of human cognition is largely based upon illusion. Intentional propaganda services & ensures this. The majority never stood a chance.]

180 “The manner in which Houston parents crowded into the inoculation centers with their children and the readiness with which they submitted their children to the experiment indicates, not alone in the abject ignorance of parents, but also the fear that was in them, as the physicians and board of health of that city had built up a synthetic epidemic for that very purpose.”

182 “**Indeed there is no such thing as a ‘healing agent’**. Drugs, serums, vaccines heal nothing...”
“... Indeed, the medical classifiers have already determined that there are “three types of polio”...” [Alluding to the fact that *fiction* has no limits and that the *story-telling* is endless.]

184 “BEWARE OF THE POLIO VACCINE – DR. SHELTON’S HYGIENIC REVIEW – SEPTEMBER, 1955 - ...” 9 points of advice for parents.

188 “... The symptoms that precede the onset of paralysis are fever, sore throat, headache, vomiting, fatigue, stiffness of the neck, constipation, diarrhea and in some cases, pain in the extremities, (to the Hygienist, as vague an assortment of diagnostic factors as one could ever hope to meet up with).” [Of course this identical situation is prevalent today – all accepted by the masses.]

190 “... At any rate both (Drs. Francis & Salk) helped forge another link in the chain of medical advance that is fast reducing the human race to a state of medical mesmerism. It doesn’t take too much imagination, with things going as they are, to calamitously view the supposed success over the summer scourge as the beginning of our fall...”

191 “... The fact is nobody, Salk included, can follow the phantasmagoria of symptomatology and come to a true understanding of any disease for the simple reason that **symptoms are only symptoms, not causes**. Or is that too elementary for men of Dr. Salk’s caliber?” [This simple point IS at the foundation of the issue, at large. It therefore must be buried for the large inertia that is falsehood to continue.]

192 Salk adjudication and...

“In the end pellagra, scurvy and beriberi turned out to be diseases of dietary deficiency that could be controlled by the simple process of putting back into the nutriment of nature some of the vital elements that commerce saw profit in removing. These and many more correlatives could he have seen had his immunological perspective...”

“... It may stun you to learn that in the year 1939 the per capita consumption of white sugar in China, where only sporadic cases of polio were seen, was 3.2 lbs., whereas in the United States 103.2 lbs. per person were consumed. I understand from good authority that this pattern ran true in the epidemics of 1949 and 1952, which were the most severe in our history.”

193 “... The pattern of epidemiologic statistics clearly indicate a correlation between sugar consumption and epidemic outbreaks of polio in various countries of the world...”

“I do not pretend to have made a special study of polio, to have any data or knowledge difficult to access, or to have any special qualifications that permit me to speak with authority. But I refuse to close my eyes to what surely appears as worthwhile evidence just because it does not fit into the running crossword puzzle of rigged science that right now has even its instigators and promoters in a state of hopeless confusion.” [We have the perspective, here in 2024, to somewhat assess this state of “hopeless confusion”, as there is no evidence of it, and as the propaganda train has been exquisitely refined to a well-oiled machine.]

“... Picture an idealistic young research genius (who by some special moral stamina is reluctant to relinquish his standards) up against the dilemma of compromise or starvation. It isn’t long before integrity gives way to passive acceptance of the philosophy – “Well, a guy’s got to live.” And the downfall of a [previously] honest soul is well on its way.” [It is this kind of insight, back in 1955 and preceding, that makes Eleanor McBean’s research authentic and valid.]

194 “The newspapers and the airways play up with sickening sentimentality the noble sacrifices of the dedicated doctors who daily sacrifice their own personal interests by working in the wards, the clinics, the hospitals and the laboratories. They feed us on glowing word pictures of little children, victims of leukemia roaming around cancer wards awaiting the noble ministrations of the doctor... But

do they tell you those kiddies are there because of medicine's failure to serve the public need? Do they tell you that those little spastics are bearing the cross for the mistakes of medicine?..." [Poignant words for 1955 – and look how much ignored time has passed since this understanding!? Also, contrast this period with the current ubiquitous control over MSM that occurs today – is it any wonder we are in the state we are in?]

"What we need us to get rid of the whole nonsensical apothecary of medicine and to adopt a **sane approach** that will start at the bottom of things and not somewhere in the middle of nowhere, as Salk did."

195 "As for "immunity" to polio and all the other disease designations, we *Hygienists* choose to keep faith with our principle of vital fitness. We consider the integrity of our physical economy the only real safeguard against any of the incursions of ill health, whatever the symptom complex may be. We view the phenomenon of artificially-induced immunization as the mere prelude to a pathological change of venue, a delaying action and therefore an obstruction of the laws of physiology."
[The truth always has a certain 'ring' to it.]

"We say you just cannot beat disease by preventing its symptoms. True prevention must start with the elimination of a cause. We contend the elimination of polio must follow the same course lest it leave worse evils in its tracks. No, we do not think it's Polio's last summer at all. As for the vaccine, its mistakes are already apparent. Its consequences only time can evaluate..."

196 "A MAN'S OPINION IS NO BETTER THAN HIS INFORMATION" – 12 pertinent points of fact.

#12 – "The world's greatest brains and scientists all agree THERE IS NO SUCH THING AS A VIRUS... merely a mythical word to confuse the public. Read Dr. A.J. Shadman's (MD) new book, "Who Is Your Doctor And Why". [amazon.ca - \$114.20Cdn (paperback); amazon.com - \$54.00US (paperback), \$89.99US (hardcover)]

197 "Any polio vaccine is fraudulent and dangerous. Inoculation for immunity is strictly a vicious "myth"... making the body "unclean" and subject to sickness which may be polio."

Robert Burns – "Man's Inhumanity to Man Makes Countless Thousands Mourn."

198 "Polio is a CONDITION... as is a sprained ankle. It is not a disease caused by any mysterious live virus, as no such virus exists. Polio vaccine has NEVER prevented, or mitigated Polio in even ONE child or adult... yet look at the DEATHS on the doorsteps of vaccine."

199 Article – Millicent Morden (Physician & Surgeon) – "Rabies Past Present in Scientific Review"

200 – "Dr. Woods recently wrote a discourse of mimetic diseases, in which he discussed rabies. His evidence supports the view that so-called human rabies is the result of a disordered imagination (fear). In animals, so-called rabies is fundamentally due to maltreatment or malnutrition or both."

201 - "Dr. Stillman, in 1922 voiced the opinion that rabies was "pure humbug" and that in over forty years as a practicing physician with a very busy practice and wide travels throughout Europe, he stated that he had "never seen a case of hydrophobia or rabies.""

202 - "In a book entitled, "Bechamp or Pasteur" by E.D. Hume, there may be found much proof pertinent to our discussion. A notable failure of the Pasteur treatment was that of a young postman, named Pierre Roscol, who, with another man, was attacked by a dog supposed to be mad,..."

203 "Speaking of Professor Bechamp's works, Dr. Levenson of England says, "I also found in those truths absolute proof of the absurdity of the germ theory of disease; and, by the study of the writings of Pasteur, to which Bechamp's works unavoidably led me, I found full proof that the great god of the (supposedly) men of science of the latter half of the last century and of many of the present, was in fact, the most astonishing of plagiarists and distorter of other men's discoveries; chiefly those of Professor Antoine Bechamp, and of his collaborators and pupils; and that this plagiarist was the most monumental charlatan, whose existence is disclosed to us, in the entire recorded history of medicine."
["Bechamp or Pasteur? - A Lost Chapter in the History of Biology" – Ethel D. Hume]

“Dr. Buisson of France had been bitten badly by a dog and was given up to die of hydrophobia. He recited that his fear was, of course, intense as was his suffering. He decided to try to relieve his sufferings by a warm bath. After soaking for one and a quarter hours, his convulsions disappeared and he became well. He cured all other cases which came to him in a similar way. The Buisson baths were employed with great success in France in rabies cases.”

204 June, 1956 - “WE, NATUROPATHS, HAVE BEEN holding our breaths, worried about the revelations that are sure to make themselves manifest as a result of this Salk vaccine craze. And it is a “craze” – which later will be frankly dubbed ‘crazy’ by the scientists who, in the future, look back on our present way of life. You cannot poison the human blood stream with the decaying products of a diseased monkey’s kidney and not eventually pay the price to the Almighty.” [Prophecy for 2024 – 68 years later!]

205 “No question about that! All medical books show that polio does not exist in those countries where the consumption of sugar – refined sugar – is less than 90 pounds per person.”

207 Dr. Milton Fried – “That stainless-steel curtain is strong, but it is far from being invulnerable. Truth is, in the long run, the *hardest substance in existence* – capable of boring through any tissue of lies, no matter what its composition.”

208 SALK VACCINE: THE BUSINESS GAMBLE by Spencer Klaw, p. 125-126, Sept, 1956 issue of FORTUNE MAGAZINE.

“Is there a connection between the Salk vaccine and the transmission of monkey encephalitis to a number of mental patients in Germany? Those who are interested – should read page xxxi of “Doctors of Infamy” by Alexander Mitscherlich (who testified at Nuremberg).

June 28, 1955 – Letter submitted of Margaret Bynaker’s 8-year-old son Charles killed by the polio shot.

210 Summary from June 13, 1959 – “Doctoring has become one of the most profitable professions, simply because people have been brain-washed by clever advertising to think that most of the foods we buy in the stores is good for us, when in fact the reverse is quite true. Our soil is being ruined by chemicals and the foods we get in the store are all doctored with some form of additives to prolong shelf life.” [Follow up here: “Secrets of the Soil” by Peter Tompkins & Christopher Bird.]

Fred Klenner, MD – “In 1955 we were told by the National Foundation, the United States Public Health Service and ‘lesser’ Health Departments, Medical Societies through their political officers and appointees that ONE injection of the currently used polio vaccine would give prolonged, possibly life-time protection. In 1956 we were told, after those receiving the initial shot developed polio, that a ‘booster’ or second shot was necessary to raise the protective antibody level to a height whereby 90 per cent protection against paralytic infection would be assured. In 1957 we were told, after those receiving the second injection also developed polio, that a third ‘shot’ was imperative to effect absolute protection. For some this was their fourth and even fifth boosters. Now in 1958 we are told that a fourth shot is “Expedient”. [This narrative, here in 2024, is alive and well!]

211 “... The fact that the total number of paralytic cases increased in 1958 even though 52,000,000 had been triply vaccinated is important and significant. Paralytic disease in 1958 was up 43 percent over 1957 in spite of the fact that approximately 25,000,000 more persons had received their injections.”

[This phenomenon is common, throughout history, if one dares to consider the information...]

“It isn’t the things we don’t know that bothers us – but the things which we know and which are not true.” [This sums up the Totalitarian motive which affects just about everyone on the planet today.]

212 “... The communications media are concentrated in the hands of a few men who are thereby enabled to manipulate the emotions of the American public at will.”

[This important statement needs an update from 1955 – the concentration of control within the mainstream media outlets has narrowed, by ownership, over the past few decades to where everything is owned by only a handful of participants (allowing even greater control, obviously).]

214 “... The Salk vaccine does not effect the spread of the disease, it only and allegedly protects the individual inoculated from the paralytic effects of the infection.” [More than obvious is the same tactics & excuses utilized today during this latest episode.]

216 “Why is it that polio is on the increase in spite of the increased number taking the Salk shots? Why is it if Salk shots are 80% effective that there are repeated warnings and scare headlines suggesting the possibility of a polio epidemic?”

218 the American Cancer Society – “When a cancer drive for contributions is put on, a scare and accomplishment campaign in the public press is put into effect. Scare slogans are used such as, ‘One in six will die of cancer’, ‘Seven Danger Signals’... The scare publicity whips the public to a state of mass hysteria.” [There is more than one book published that suggests that the whole of the medical establishment is based on the *placebo* effect... observation will show that the majority of mass behaviour is either due to the *placebo* effect or the *nocebo* effect, depending upon the state of the individual at any given time i.e. *they* are either getting better from injecting/ingesting poisons *or* they are succumbing to a fictitious disease/virus/microbe source of suggestion.]

221 Letter to a judge – June, 1959 – from Duon H. Miller – Polio Prevention Inc..

223 Great Britain – compulsory vaccination act – 1853
- “harsh” vaccination act – 1867

224 “London Life in the Eighteenth Century” by Dorothy George. [Dorothy’s book and this book (Eleanor’s) are flanking William White’s thorough account which covers the 19th century in detail – 696 pgs. to complete the picture for the 18th, 19th & 20th centuries.]

“There are men living in America today whose parents left England on account of the harsh vaccination acts. The public saw honorable, upright men appearing again and again before the magistrates and many began to ask what it could mean when such men were willing to go to such lengths to save their children from the operation.”

“Four very important things happened between the passing of the vaccination act of 1867 and the passing of the act in 1898...”

1) 97 1/2% vaxed – 44,000 died of smallpox,

2) public health act – 1875 sanitation proved that the ‘sanitarians’ were correct (from the 1870-72 epidemic)

3) Dr. Charles Creighton and Prof. Edgar Crookshank – 2 high ups in the medical complex – both anti-vaxers

4) appointment of a royal commission – some ground gained.

226 Great Britain – the act of 1907 – “That act under which an objector had to make a statutory declaration of his objection to vaccination before the baby is four months old, has resulted in the exemption of nearly five million children in England and Wales...”

“Among scientists our most notable supporters were Alfred Russel Wallace and Herbert Spencer.” [“Vaccination – Proved Useless & Dangerous – From forty-five years of registration statistics” by Alfred R. Wallace, LL.D. - 43 pages – published 1889]

227 “... in spite of these official attempts to make out a case for vaccination, the fatality rate of the unvaccinated cases in England is less than half of the vaccinated cases.”

228 “Much vaccination, little sanitation, much smallpox; little vaccination, improved sanitation, little smallpox.”

“OPEN LETTER TO GOVERNOR KNIGHT” – December, 1956 – from Eleanor McBean.

229 “Health Director Peterson of Idaho didn’t mince words when he stated, to the press, that polio **struck only vaccinated children in areas where there had been no cases of polio** since the preceding autumn. “In 9 out of 10 cases the paralysis occurred in the arms in which the vaccine had been injected.””

231 Eisenhower sold out the masses – 3 doses of the polio shots recommended.

232 “Salk vaccine made a barrel of money in 1956 for the killers.”

234 “Polio is a condition. It is not a dis-ease caused by any mysterious live virus, as no such virus exists. Polio vaccine has never prevented, nor mitigated polio in even one child or adult... yet look at the deaths from vaccine.” Duon H. Miller, blood chemist; Polio Prevention Inc.

“It has just been documented in the book, “Who Is Your Doctor and Why?” by Dr. Shadman, of Boston, that germs do not cause disease nor does virus because there is no such thing.”

235 “The national polio program has been truly disgraceful, ungodly and inhuman. Polio is a condition, not a disease. Since there is no such thing as a virus, polio isn’t caused by a virus... Therefore, any polio vaccine is fraudulent, and is rapidly proving itself just that in spite of faked figures and statistics. We have doctors who are successfully treating polio in this country...”

240 “... If these news reports are true, it must follow that the polio vaccination program actually increases the incidence of polio and does not protect against the paralytic type of polio.”

Conclusion:

There have been many people throughout history, particularly over the past 158 years, who have had the intention, sentiment & drive that Eleanor McBean has in the writing of this book. This is due to the urgency and compassion for their fellow beings, when one finds out about the truth.

There have also been and more currently there are many individuals, young and old, leaving the planet. This is in keeping with their exercising of karmic repercussions and/or sacrifice. In the case of sacrifice, no matter how many days, months, or years spent on the planet, *prior* to the sacrificial act, this life is **profound**. And sacrifice is a (mostly) a prearranged case of *soul group* agreements.

In the end, everything comes down to karma and, as David Hawkins states, “Everything is as it should be.” Even so, it is by knowledge that we can both live a more purposeful life and also possibly provide such, for others, by passing on this knowledge. This, of course, is in keeping with this quote from the King James Bible - “... and ye shall know the truth and the truth shall make you free.”
