

Paper: GPMS.WORLD – Eternal Peace, Freedom & Abundance for All.

Date: 18 Jun 2024

By: D. R. Shearer

Topic: The Global People's Monetary System is a Divinely inspired, new earth structure to bring humanity to a condition where poverty & starvation no longer exists. The simplicity of GPMS is equalled by its power and implementation – and it simply relies on the consent of the individual to achieve majority rule, to make it happen.

Introduction

All “money” is fiat, whether it is entirely digital (crypto, CBDC, etc.) or it is physical (paper, “precious” metals, etc.). They are all *fiat* because its total value is based upon the agreement of the individual. Gold is fiat because technically it is worth less than, for example, iron, copper or aluminum as a functional metal. These other metals are far more valuable than gold, based upon their myriad of uses, whereas gold is good for electronic circuitry (based on its conductivity) and jewellery. The gold fiat value is somewhat based upon its propagandized *scarcity* and the *supply & demand* hoax.

The problem that *modern day* society currently has, is that the existing fiat currency system is created and operated by a particular, limited group of individuals. This group of individuals have designed society, under their fiat currency system, to bring certain benefits to certain individuals/bankers, while ignoring other segments and values, of our global society. The Global People's Monetary System, once firmly installed, generates its own fiat currency system, and distributes it on a much different basis than the globalists' system – baseline equality for all members of society. **Installing a beneficial fiat currency system is *transitional* in its duration (see below).**

Ubuntu Philosophy

Ubuntu Philosophy comes from the south African Zulu tribe and sprouts from a rich cultural heritage dating back to the 13th century. It can be summed up by this statement: “I can only be happy if everyone is happy!” It may be challenged that this is an impossible task to accomplish. Indeed, “money” does not necessarily bring happiness. Everywhere you look you can find examples of *poor*, happy people and *rich*, not so happy folks. Therefore, it is admitted that providing a baseline money supply to the masses will not induce necessary or immediate “happiness”. However, the gpms world monetary system merely *initiates* relief, that previously was not there, to many on the planet, as a decisive and powerful *stepping stone* to a greater future.

Gpms.world encompasses all the strengths & benefits of the Ubuntu traditions by bringing immediate relief to the global population. This spawns a natural rise in collective global consciousness. *Deflation* is an immediate attribute, once gpms rolls out.

Propaganda Removal

Global society has been under the influence of a dark agenda for many centuries. This agenda has been ever-concentrating during this history to where we are now at an absurd level of control & manipulation. This manipulation is carried out by ingenious and subversive means, otherwise there would be a massive revolt. In other words the “will of the masses” is somewhat respected and consent is gained tacitly. These and other truths will come to the forefront as the rest of 2024 plays itself out.

Globalist entities’ strategies can only be accomplished by the control of information flow and this is carried out by the distribution of propaganda and the ubiquitous control of mainstream media. It is this iron grip that allows for the manipulation of society, by other means, to be carried out in a covert manner. It is not the topic of this paper to go further on this topic other than to provide an example of how propaganda is carried out to manipulate the masses and alternatively, how the removal of this propaganda furnishes the opening of the door, to a beneficial system of recovery – **gpms.world**.

An example of propaganda-driven falsehood is how the general global population actually continues to allow for the earth’s natural resources to be controlled by a very limited number of self-serving individuals. Once the global population realizes that the earth’s resources are equally owned by every individual who has happened to incarnate on beautiful Mother Earth (Gaia), a large step has been taken to bring peace & freedom to all. Gpms accomplishes this, at ground level...

Fundamental Rights Through the Global People's Monetary System

On the day that GPMS secures its place on our planet, based upon the Sovereign ownership of natural resources by the ones who dwell here, the basic necessities are supplied to the global population. As needed, they are, free supply of the basics:

- a. home,
- b. car,
- c. food,
- d. clothing,
- e. utilities,
- f. basic income*.

*Basic income is an intermediary step, lasting 1, possibly 2 years. It will take this time and the natural process of *deflation* to bring global societies to a condition where there is no need for “money”.

Competition & Profit (Seeking)

There may be some who value the activities of competition and profit-seeking. Indeed, the drive to achieve higher levels, whether it be in athletic activities or in the business model, provides for higher standards of living, in many cases. But, they are not contingent on being essential elements of a society that provides eternal peace, freedom & abundance for all. Actually, they hinder the establishment of such a system, and stand as a definitive roadblock to unity.

The New Earth will encompass/honour the individual's drive to achieve higher levels of progress – this is inherent to a Sovereign Son of the universe. But the individual's drive and accomplishments will be celebrated and compensated for, rather than stepped on by others who are wishing to outdo them, through the competitive drive mechanism.

Conclusion

The instalment of the Global People's Monetary System completes itself by requiring an individual to donate 10 hours per week (estimated) in service to their respective societies. This allows for a majority of free time to pursue and develop whatever passions that everyone uniquely carries within them. The natural removal of thievery, competition and profit-seeking behaviours is part of this *completion*. True wealth exists in the Sovereign Son, not in external circumstances. Therefore, robbing from someone who is unlimited in wealth, is a *non-sequitur*.

It can be demonstrated that the competitive nature of profit-seeking behaviour is at the root of the decimation of society.

The elderly, the infirmed and the children are in need for nothing with the gpms system as no requisites are placed upon them.

As of this writing, the forecast for the direct implementation of GPMS, and the corresponding installation of eternal peace, freedom & abundance for all, is November 2024.
