

## Claiming Your Sovereign Power

### Explaining the diagram - God's "Spot Light"

#### The diagram layout; Dr. David Hawkins; 17 Levels of Consciousness (overview) -

The key to this diagram is the research of the esteemed Dr. David Hawkins. Dr. Hawkins has proven to us, by way of more than 250,000 clinically backed trials, that our level of consciousness can be defined on a chart that calibrates an overall field from 20 (Shame) to full Enlightenment at 1,000. This research is displayed on a chart (17 levels of Consciousness) which are benchmarks of particular emotional positions which Hawkins refers to as "positionalities".

The critical thing to realize, during these times, is that the main *control features* of a society are induced into human consciousness, as a whole, and individually, to the calibrations of Guilt & Fear. This should be obvious to just about everyone, especially when you observe the mainstream narrative campaigns that are geared to this practice. Psychologically, this phenomenon is known as "mass formation", and has specific procedural attributes.

I have taken Dr. Hawkins chart and 'fitted' it to a concept that I call "God's Spot Light". From my theological research (over 14 years) I have come to know the character of God, which is how I came up with this concept.

The outer ring on the page is the outer boundary of the "Spot Light", which designates the *assistance* that we can retrieve from the Universe (God).

**Choosing** to stand inside this spot light, is a **matter of choice** to calibrate within the consciousness range of 09 to 17. (See the chart itself where you found this document.)

Conversely, if you are tempted or coerced into believing that the lower levels ( $\leq 08$ ) are anything other than FALSEHOOD, you will find yourself being unavailable to the POWER that is, and has been, there for YOU all along!

#### The details:

Power vs. Force - Power resides inside the whole spotlight, and is increased as you move to the centre. Force belongs with the lower levels of calibration, and is exponentially weaker than Power. Mohandas K. Gandhi proved this for us as his Power overcame the force of the British empire. (i.e. One person calibrating with Love counterbalances 750,000 people calibrating <200)

Thought - Linear vs. Non-linear - Linear thought takes a person to 499, but no further. Those who are wilfully bound to empirical data (possibly most scientists), WILL NOT, be able to calibrate higher than this. There is significant Power to be had, when calibrating up to 499, and on an exponential basis, Power is enhanced significantly, as levels increase. Example: Love cannot be defined nor measured

- this IS non-linear thought, if you allow it to be your Reality; non-linear thought is confirmable, but not 'provable' - 'proof' is a concept *limited* to Reason (400-499).

### The All-Important **HIV**

“Whereas mankind’s *innocence* was previously it’s Achilles’ Heel, that innocence now returns as the royal road to the **victory of Truth over falsehood!**”

Dr. David Hawkins, ‘I - Reality & Subjectivity’

True Universe Power resides in the upper levels of consciousness, as indicated by such beings as Mohandas K. Gandhi, who calibrated at 715. The New Earth will be inhabited by such beings who hold such high calibrations and by those who aspire to do so.

It can be loosely characterized by the attributes from the new definition of HIV, as follows:

**H - Humility,**

**I - Innocence,**

**V - Vulnerability.**

### Linear thought vs. Non-linear thought

“... But instinct (*non-linear thought*) is something which transcends knowledge. We have, undoubtedly, certain finer fibres that enable us to perceive **truths** when logical deduction, or any other wilful effort of the brain (*linear thought*), is futile.”

Nikola Tesla - My Inventions - 1919
