

Paper: Karmic Resolve as relates to Human Free Will – Our Future Defined

Date: 22 April 2020 (rev. 16 Jun 2024)

By: D. R. Shearer

Topic: Karmic resolve has been a commonplace occurrence on our planet for millennia. As absurdities intensify (signifying accentuated karmic resolve), the potential for massive human casualty looms on the horizon. While this is a reflection of *free will* following *falsehood*... there *is* another way.

Preamble

North Americans and other “1st world” nations have had things pretty good up until the spring of 2020. Whatever subversive degradation that has occurred up until then was interwoven into our propagandized societies... and had largely gone unnoticed, has been hidden, or has been rationalized away. The elevated level of karmic absurdities is now coming into mass consciousness, of which a serious example is the scenario of *childhood anomalies* – that being life terminating or chronic ‘diseases’. This, of course, is the part that is rationalized away (by the masses), by *expert programming* and *false authority*. **A childhood chronic ‘disease’ rate of 54.1% does not have to be part of the evolutionary process!** But **it is** part of the karmic process. The alternative course of action within the global community lay in the up stepping of human consciousness where karmic principle *becomes an antiquated concept*. The ‘potential for massive human casualty’ will correspondingly fade into the background!

I assure you that this is not only entirely possible, but also imminent.

It has been, through my research, that this is so.

Global Thought

All of the world’s major religions hold some form of karma within their teachings. For example – Christianity = “you reap what you sow”. The collective inertia of the karma concept, along with the lack of understanding toward universe Reality has landed most of us in the somewhat distasteful position, that many are experiencing currently.

The Urantia Book loosely relates to the resolution of karma as such:

"Only when man has become sufficiently disillusioned by the sorrowful disappointments attendant upon the foolish and deceptive pursuits of selfishness ... will he be disposed to turn wholeheartedly to the gospel of the kingdom, the religion of Jesus of Nazareth." 195:9.7 (2083.3)

The Mechanics of Truth

Karmic principle definitely has a firm grip on the happenings of planetary life at present. It is a real and functioning device in society... clearly and demonstrably in full function (as in the noted childhood chronic disease rate of 54.1%). This is simply because there is not enough thought/ motion toward the higher Realities of Truth, to make things any different. Gautama Siddhartha (Buddha) was well on his way to solving the worlds' problems, but sadly died before reaching a level which would have transcended what became the limited adherence to karma as the *highest* reality... which of course is now practised by a few billion. And when it comes to other major religions, the altering of their guiding textbooks over the past several centuries, leaves their followers also short in the understanding of universe Reality. For example, the degradation of the essence of Christian thought began centuries ago, when the Vatican utilized the notion of pandemic & other falsehoods, to create control. This was accomplished by publicizing that 'pandemics' were a result of the "disease demon" and were a "punishment from God".

While we have come along way since those days, current predicaments still indicate a certain lack of Truth being available. Thankfully, a great number of Christians have been able to embrace the essence of what was Jesus' teaching really means, by way of their own intuition and possibly with the help of some other sources. This point is summarized by the following:

Filmmaker Tom Shadyac and His Movie, "I Am"

Tom Shadyac became famous by directing Jim Carrey in some of the biggest revenue-generating blockbusters that occurred in Hollywood. Along with the fame came the trappings - mansions with walls lined with art, etc.. One day, with the urging of a devastating bodily condition Tom had what may be called an 'awakening'. Whatever the term, he sold the art & mansion and moved to a trailer park and began riding a bike. Aside from the pleasure of a simpler life, it urged him to do a movie called "I Am". The movie set out to ask many *notable world figures* two questions:

- 1) What's wrong with the world?, and

2) What do we do to fix it?

The interesting thing about the movie is that the highest Reality answer to the questions noted above, came from probably the least well-known figure in the movie - *his dad!*

The senior Mr. Shadyac made the claim that a lot of the followers of the Christian faith seemed to be intent to follow the highest Christian principle on the weekend (when they went to church), but that sentiment was rarely carried through into their daily lives, during the week.

Higher Truth & What is Available

While established Christian dogma kept me away from the whole program for 40 years, my intensive search for truth eventually led me back to the teachings of the man known as Jesus. The reason for this is because the source was always correct (Christianity), but prevailing & historic altering of documentation made it unrecognizable to me.

The revealing of the higher truth that I was after would not have been possible without the research into:

- 1) The Urantia Book, and
- 2) Power vs. Force, and
- 3) A Course in Miracles.

Additionally, what is imperative in this quest, is for a person to access their innate sense of reasoning. That is what is referred to as the “gut reaction” or intuition. Also, it is known as “ringing true” or “heart messages”. Accessing intuition is a necessary & reliable test method when assessing reference materials such as those referenced above, and indeed with all works. People, in general, are coming around to this valuable resource, which is inborn in all of us. It is also a crucial move for humanity at this time.

Conclusion - “Not a sparrow falls...”

These claimed “higher levels of truths”, have the distinct advantage of being able to answer questions that previously could not be answered. They also have another inherent condition which validates their authenticity - they create a *calm & assuredness* within a person that transcends previous experiences. Part of this comes from the Buddhist concept of ‘detachment’ (preferably “non-attachment” - David Hawkins), which follows as a natural and progressive step.

Perhaps the most powerful experiential gauge to this condition of higher truth is revealed in the difference between what is ‘thinking with the heart’ or ‘thinking with the head’. This phenomenon was a recent inadvertent

addition to my being. The difference between the two is *most certainly distinct*.

Thinking with the heart, could be considered a close relation to the gut reaction. When you are thinking with the heart, the answer comes **immediately** (heart messages) i.e. there is no rationalizing or arduous/lengthy speculation from the mind. With the rapidity of the response, there is no time to process these motives anyway - the answer **is** always immediate. I have found that sometimes the answer comes within the first few words of the question being asked!

The answers that come from the mind contain rationalizations from the database of *the past*. This can be a fallible source, in many cases. The interesting thing here is that this supports one of the most important precepts as described from "A Course in Miracles" - **The past does not exist!** While this may be a foreign concept to what many of us have been led to believe (augmented possibly by the use of vengeance or retribution), our release *depends* on this very precept. But this is not the topic of this paper and possibly will be covered in a future Paper - "True Forgiveness - The Past Does Not Exist".

It is the higher alignment to Truth & God's Reality, that has the potential to extinguish lifetimes of successive pain that the karmic concept brings. This is why Jesus rarely taught the concept of karma to the people of His time -

1) they had enough on their plate without being troubled by lifetimes of upcoming pain, *and*

2) there was a higher Reality to be had (allegiance to the Universe/God).

This higher Reality is captured within the Bible when it states,

"Not a sparrow falls outside of the Father's Will."

Further quotes from the Urantia Book may be relevant here:

"The universes are engaged in an orderly, well-understood, and perfectly controlled procession, swinging in majestic grandeur around the First Great Source and Center and His residential universe."

15:1.1 (164.4)

"[The Apostles] had made the important discovery that many human perplexities are in reality nonexistent, that many pressing troubles are the creations of exaggerated **fear** and the offspring of augmented apprehension."

143:3.6 (1611.4)

"Your anxieties and sorrows, your trials and disappointments, are just as much a part of the divine plan on your sphere as are the exquisite perfection

and infinite adaptation of all things to their supreme purpose on the worlds of the central and perfect universe." 23:2.12 (258.11)

"No social system or political regime which denies the reality of God can contribute in any constructive and lasting manner to the advancement of human civilization." 195:10.7 (2084.7)

The principles discussed in this paper, while may be foreign to a lot of people, do not lessen either their veracity or validity.

Great conflict signifies equal great change.

This *change* will tentatively conclude, from a greater perspective, November 2024.
