

The “Absolute-ness” of Unconditional Love @ 540

15 Aug. 2024

To say that David R. Hawkins research is comprehensive would be an understatement.

Based upon his research we find that the calibration of 540 is,
perfect,
whole,
complete.

Unconditional Love is a positionality (not an emotion) that is the practical pinnacle of the attributes of 3D living. The reason for this statement is because when an individual transcends the 540 level, the feeling of bliss that accompanies that area, in most cases, also tends to create a *withdrawal* from society, in a very practical way. There is a distinct reason for this detachment from society – along with the feeling of bliss is the very real acknowledgement that “everything is as it should be”. The negative characteristics (dark and harsh realities) of regular daily life, indeed, become *distasteful* to the individual who attains such a degree of God’s Reality (see *exceptions* in conclusion).

It may be necessary to refer to the chart of the 17 Levels of Consciousness (attached) to fully comprehend just what achieving the level of 540 possesses.

Generally, Unconditional Love automatically contains all the positive attributes of the positionalities that precede it. Put another way, as one progresses up the chart of consciousness there is no *abandonment* of attributes that have been gained from the prior experiential progressions.

Specifically, these particulars of accomplishment should be considered when one comprehends the capacity for the rarity of achieving the calibration of 540 (historically, 0.4% of the population have achieved this):

- the “sub-200” calibrations – these lower positions, carry with them varying degrees of *worth*, in an elevating fashion, as an individual finally is able to contribute to the wellness of society, by leaving them all behind, once and for all,
- 200 to 350 – the experience attained by moving through these 4 stages serve as badges of accomplishment that provide a valuable pool of reference once they are transcended,
- the ever important Reason – 400 to 499 is a massive body of accomplishment, in itself. There is a large level of discernment and intellectual prowess that comes from this wide body position,
- 500/Love – an individual achieving this level is displaying the first signs that qualify for Universe progression. The lack of an “unconditional” component simply means that one doesn’t understand the big picture of God’s Reality (we are all one).

Conclusion

While it can be shown that the precision and depth of the infiltration of evil in modern-day (academic) society has actually removed morality and integrity from the esteemed accomplishment of Reason (in many cases), it is also noted that this occurrence also prohibits progression to levels beyond.

When one establishes the positionality of Unconditional Love, the discernment they possess embodies the ability to appraise a situation to *include* care for the innocent, and *exclude* immediate concerns for those wishing to cause harm. They are not withholding Love, in this case, but rather maximizing their own potential to make change.

There are two notable exceptions to the claim of *withdrawal* of this paper. They are rare-ties of history for sure. They are Mohandas K. Gandhi (715) and Mother Teresa (710). The fact that these two individuals were able to operate fully in the public sector is an astounding accomplishment, given their respective positionalities.

The Power achieved by the positionality of 540 is proportional to it's level of accomplishment. [It is noted that the 17 Levels of Consciousness scale is *logarithmic*.]
