

WHY WORRY?

“I'm not worried about our future, regardless of the amount of darkness that we are seeing, because I know that this evolution we are moving through is a natural process.

I have found that by moving through my own chaos and darkness there is nothing but brilliance, freedom and beauty on the other side.

As within, so without.

I'm not afraid of being poisoned by invisible waves, criss crosses in the sky, fluoride or the medical system, because I honour and protect my body daily, with rituals of love, nourishment, deep gratitude and movement.

I thank my body for its beautiful resilience.

I understand that what I think not only creates my reality, but emits a frequency into the collective.

I always choose to support the higher timeline.

I'm not afraid of illness because I have learned that illness is an indication of suffering and imbalance in my body.

I know that I can heal myself from anything.

I'm not afraid of the financial system collapsing because I have prepared myself to the best of my ability.

I also know that money is simply energy; that scarcity, lack, poverty are deep programs that are currently being brought to their knees.

I'm not afraid of smart cities or travel restrictions because I know I am a sovereign being and NO ONE can tell me what to do, where to go or how to live my life.

I also understand freedom is a state of mind and no one can ever take that away from me.

I'm not worried about our future generations because I know our children came here for this time. They are here to hold higher levels of consciousness and they are WAY more evolved than we are.

Now imagine for a moment if even 30% of the population lived like this? We'd shift earth's frequency in an instant and this old system would fall to its knees.

That's the Power of the Light.

Your assignment right now is to step into your power and shine your light on this magnificent shitshow that we are living through, BUT stop getting trapped there.

You are here to embody the Divine Being of Light that you are.

Honor the gift of being a living, breathing human during the greatest evolutionary shift this planet has ever seen and live your life to the fullest.”
