

Paper: The Brutal Truth – Institutional Poisoning

Date: 21 April 2026

By: D. R. Shearer

Topic: After 73 months of researching and displaying publicly our findings on the true nature of Western civilization, its (often trusted) institutions, its truthfulness and its falsehoods, this paper is a summarization put forth for anyone who may be questioning these things, at this time. Just because we have lived with, and often times trusted the structural components of our societies, evidence rapidly coming forth now, suggests that much of this *trust* is misplaced. This is important for the immediate survival and well-being of the individual.

Introduction

This paper is put forth, like all of our other publications, to assist our brothers & sisters through this planetary shift, with the least amount of friction possible. Our research is based upon a lifetime of experience (~ 67 years) which includes our intuition, logical deduction and physiological feedback, at every turn. If this information may at first seem foreign or unreal, I would encourage the reader to either continue reading or otherwise tap into the large volume of information that is contained on our website (document library and 8-platform watch list). And the benefit of persevering with information such as this is directly realized by this common quote:

“... and ye shall know the truth and the truth shall make you free.” John 8:32

This paper is intentionally brief and may also be interpreted as being *brutal* because learning of the truth, where falsehood predominately resides may **seem** to be brutal and ruthless. The trick here is exactly this: Truth will definitely bring forth freedom, upon a falsely governed society. In many cases it will take courage, resilience and an openness to learn of a better way... this is a letting-go of what has become standard accepted traditions.

Part One – “Disease” States or Toxicity Implications?

Evidence now points to the condition that *diseases* don't exist and that over the past several decades humanity has been the victim of *poisoning*. Approximately 50 years ago I received my last dose of prescription medication (antibiotics). After repeated intervals with this item, my physiology, logical interpretation and intuition all combined and told me that I was being *poisoned*. This exact process became the guiding light in many, many instances where I learned of other ingredients or processes whereby my body was being affected in a negative way. The bottom line here is: Some poisonings are detectable by direct physiological symptomatic response, as in several of our cases. Others quietly erode health and manifest ultimately later in life as either a “disease” state or a shortened life span... often both!

Of course it is everyone's prerogative to continue *believing* the popular narrative, as put forth by *trusted* institutions. What is occurring around everyone now is the direct evidence that this is **not** a pathway that will lead to peace, freedom and abundance, for all. If this is unsettling to anyone then a deeper look into our website is recommended to see a useful & peaceful conclusion to what is occurring.

Part Two – Scapegoats.

There are two primary scapegoats that are utilized by the same *trusted* institutions in the management of their protocols. They are:

1. Genetic heritage, and
2. Disease conditions.

Both of these items move the **blame** of a discomfoting state of being from the actual cause of such a condition to fictitious entities. This fictional reality creates an open door for another lucrative fictional reality – the taking of various poisons to suppress or remediate any symptoms that may be present. Again, there is plenty of evidence around everyone now to back up the statements contained within this paper. Some references will be supplied at the end and a full reference list is available on our website.

Conclusion

The great thing about the truth is that it does bring us all freedom in spite of any immediate circumstances that may be present suggesting a breakdown of the life paradigm.

A conclusive summary of documented proof of the claims in this paper can be found by analyzing the research of author Dan Buettner. His book illustrating the *blue zones* present on our planet goes back centuries. Book - "The Blue Zones: 9 Lessons for Living Longer From the People Who've Lived the Longest"
