

Paper: Vaccination: Protection for Parents & Others

Date: 06 Mar. 2026

By: D. R. Shearer

Topic: Vaccination is neither *safe* nor is it *effective*. (Links at the end.)

Some parents may have heard bits of *information* or received *messages* that lead them to question whether to vaccinate their children. These are profound guidance indicators. This paper is in place to assist these parents, in the event that they are unsure about the topic of vaccinating (or medicating) their children. It is an overview of how we protected our children, initially and following 1987-1998, the years of their 3 births.

### Introduction

It may be curious to someone reading this paper - the difference between parents who need to question and those who are happy to go along with recommended guidelines no matter what comes before them. This phenomenon is before us all and is not the topic of this paper. It is covered in videos on the 8 platforms which can be accessed through our website.

This paper is directly for the parents who both question what is going on and may require assistance in navigating the waters on their own terms.

### Our Story – Our Success in Protecting Our 3 Children

What follows are the key steps and procedures that both guided us to protect our children and the path we took to do so.

1. ~1978 – I took my *last* prescription medication because my body, my logic and my intuition told me that I was being poisoned. Other folks have a different take on the pharmaceutical industry. My story is backed by 50 years of living proof. To each their own.
2. ~1979 – A young teenage girl, working in a health food store on the West Coast, British Columbia took a card from a nurse that listed the ingredients and associated dangers of vaccinations. This young lady became my wife in 1984.
3. 1987 – Although at this time I wasn't **dead** against vaccination, just prior to the birth of our first child, my wife mentioned that it may be pertinent to at least look into the process as the nurse had prompted her 8 years previously. We did. No internet at this time. We were led to these 4 research items:
  - a) DPT – A Shot in the Dark – A Concerned Parents' Guide to the Risks of the Diphtheria, Pertussis (Whooping Cough), and Tetanus Vaccination – by Harris L. Coulter and Barbara Loe Fisher
  - b) How to Raise a Healthy Child... in Spite of Your Doctor – by Robert S. Mendelsohn, MD
  - c) Vaccination and Immunization – Dangers, Delusions and Alternatives – (What Every Parent Should Know) – by Leon Chaitow
  - d) Thesis – University of British Columbia – Vaccination – by Deborah Buri

It is important to note that at this time I also recalled my own life experience – when I was no more than a few months old I almost died (turned blue until my Mom found out how to clear my airway). This was from “whooping cough”. I was “immunized” for “whooping cough”. “Doctor” said it was a different strain. [Important: From what I know now and the mountains of research that I have gathered over the past 67 years I have this to offer: Falsehood has an infinite list of stories to support any original false proclamation. Truth on the other hand, is very simple. It would be better for many on this planet if this were not true, but it is anyway.]

The summary of our research: A) Vaccines are indeed unsafe. There are many direct negative effects of vaccination to be learned from anyone wishing to do so. But the clincher for me and protecting my precious upcoming daughter was the **direct effect** of *encephalitis*, which is swelling of the brain. When the introduction of a large acceleration of the vaccine schedule occurred in 1984, so did the incidence of SIDS – Sudden Infant Death Syndrome, or *sudden injected death sentence*. The advance of encephalitis obviously potentially produces SIDS due to the restricted volume capacity of the skull. Again, it may be better for many on the planet to avoid this rationale, but it is truth nonetheless.

4) 1988 – The birth of our first child (Jan. 29).

Our daughter and two sons (22 Feb. 1991, 24 May 1998) were not vaccinated. I knew in my heart that I was not going to subject my children to this kind of obvious potential harm, no matter what the odds. My perceived “selfishness” on this matter (“Typhoid Mary” and other items of propaganda over the past 160 years) was not fully absolved until 2020, as noted later in this string. Either way, I am here to protect my children. That is my responsibility as a parent. Also, Homeopathy (vs. allopathy) and other alternative forms of treatment are available for those wanting them.

Our 3 children now stand as a solid control ‘group’ as evidence of our decisions in the 1990s. They have collectively 101 years of health data serving this research-based decision process.

5) 2020 - Any residual “selfishness” absolution from dedicated research.

On March 13, 2020 I took my wife out for her birthday dinner. This was the first publication of the peculiar assertion that is “lock downs”. The waitresses at the restaurant did not know if they were going to have a job; the convention centre was closing down venues. I did not know what this global declaration was about but again my logic and intuition came to the forefront – **THIS WAS A SCAM!** **Again**, it is better for many on this planet that my intuition/logic is wrong – but that’s simply the effect of truth when it collides with falsehood – people’s feelings/lives/professions/stability suffer.

Listening to my intuition & logic:

- a) wrote a “paper” (like this one), that revealed a strong truth – didn’t know what to do with it,
- b) typing, papers, writing continued that was a result of the research conducted to prove my intuition,
- c) eventually (April 2020) built document holders and put my work up on the wall in our public art gallery, taking up a bit of space,
- d) the process did not stop (research producing documents & videos) up to this day,
- e) the documents, books, articles & postings eventually took up all of 2 walls – floor to ceiling - in our gallery (19’ x 9’6” – 10’ ceiling) 285 sq. ft. – this was our Truth Centre until April 2024

Why a public display of research?

Because the nurse from 1979 and several others since have guided us on our path for our own well-being and the well-being of our children. We are merely *paying it forward*. Again, much to the disapproval of a large percentage of the population. This information is only for those who need and want it.

Why was the Truth Centre reduced significantly in 2024?

Because not only is it necessary for folks to continue with their karmic destinations, but by their own conduct, they actively wish for and produce this destination, in spite of the condition known as *pain*.

How did the Truth Centre research absolve selfish considerations?

The Truth Centre research concludes, with evidence, that ‘viruses/microbes’ in free air Do NOT Exist... rendering the practices/notions of “vaccination” and “contagion” both as falsehoods.

B) Vaccines are indeed ineffective.

### Conclusion

Protection for parents bottom line: If it’s not evident from this paper so far – the path to protect your children or yourselves is simply to follow the **truth**. In other words let the *truth* guide and protect you as it has done for my wife and myself. One of the biggest hindrances on the planet currently is the failure to recognize one’s Sovereign Authority. How this plays out is this: NO ONE has the right to cause harm to another. Period!

The 4 research items that were available to us in 1987 are enough for anyone to protect their children.

Our Truth Centre research data allows for this process without guilt or being labeled as selfish.

This is the power of truth.

And for those whereby 4 pieces of research data are not enough, here is a list of **56 full length documentaries and 110 books** on the dangers of vaccination (note the book list does not contain Dr. Vernon Coleman’s book – Anyone Who Tells You Vaccines Are Safe and Effective is Lying (2014)):

<https://www.jchristoff.com/blog/documentaries-that-include-100-s-of-health-professionals-warning-the-public-about-the-dangers-of-vaccination>

Lastly, for anyone wishing the whole meal deal, and recognize that truth is power, the Truth Centre research website exists here:

<https://rebuildthenation.ca/>

The 8 platforms that carry our message is a tab on this website here:

<https://rebuildthenation.ca/watch> 8 platforms + “Remove Fear” + “Protection for Parents” (videos)

And almost a hundred documents here:

<https://rebuildthenation.ca/documents>

May peace, freedom & abundance be with all who commit to the path of Truth.
