§ 7.01 STATE TRAFFIC LAWS ADOPTED.

Except as otherwise specifically provided in this chapter, the statutory provisions in Chapters 23, §§ 340 to 348 and § 941.01, Wis. Stats., describing and defining regulations with respect to vehicles and traffic, exclusive of any provisions therein relating to penalties to be imposed and exclusive of any regulations for which the statutory penalty is a fine or term of imprisonment are hereby adopted and, by reference, made a part of this chapter as if fully set forth herein. Any act required to be performed or prohibited by any statute incorporated herein by reference is required or prohibited by this chapter. Any future amendments, revisions or modification of the statutes incorporated herein are intended to be made part of this chapter to secure uniform state-wide regulation of traffic on the highways, street, and alleys of the State of Wisconsin.

§ 7.02 ADOPTION OF WISCONSIN ADMINISTRATIVE CODE.

- 1) **Sections Adopted.** Chapter TRANS 305 and NR 64 of the Wisconsin Administrative Code is hereby adopted by reference as though set forth fully herein, with the exception of Chapter TRANS 305.04, Wis. Ad. Code.
- 2) **Penalties.** Penalties for violation of any of the above adopted Wis. Ad. Code Provisions shall result in a forfeiture of not less than \$10.00 nor more than \$200.00, pursuant to Sec. 110.075(7), Wis. Stats., except for ATV and UTV citations issued under Wis. Stat. Chapters 23 and 346 or Admin Code NR 64 which penalties shall be set pursuant to Wis. Stat. 23.33(13).

§ 7.03 ONE-WAY STREETS.

- 1) **Designations.** All enactments by the Village Board, pursuant to § 349.10, Wis. Stats., designating one-way streets, are incorporated into this Code by reference, which include:

Lake Shore Drive from Orchid Road to Thistle Road.
- 2) **Erections of Signs.** Proper signs indicating the direction of lawful traffic movement shall be placed at every intersection where movement of traffic in the opposite direction is prohibited.
- 3) On all one-way streets, vehicular traffic shall move only in the indicated direction when signs indicating the direction of traffic have been erected.

§ 7.04 MAILBOXES.

- 1) **Purpose.** The purpose of this policy is to establish requirements for the installation of mailboxes along street rights-of-way that provide for efficient snow clearance and right-of-way maintenance, enhance traffic safety, and to establish standards for reimbursing property owners for damage done to mailboxes by Village equipment.
- 2) **Requirements for the Installation of Mailboxes.** All roadside mailboxes installed shall comply with the following installation requirements:
 - a) Contact Diggers Hotline even if you are replacing a mailbox and placing the post in the same area the post was originally placed. Utility lines tend to shift over time, or a new line could have been installed since you installed the current mailbox.

- b) Mailbox containers shall be of a size, shape and material approved by the United States Postal Service. This includes replacement mailboxes.
 - c) A swinging arm is strongly recommended. The mailbox post shall be at least three (3) feet from the shoulder of the road.
 - d) The fire number should be on the box in a contrasting color from the box. The name may be on the box but is not required.
 - e) It is best to keep the entire mailbox post installation as light weight as possible. This permits a vehicle crashing into it to break off the mailbox post with less damage to the vehicle. The heavier the installation, the less likely it will move instantaneously, causing more damage to the vehicle and injury to its occupants.
 - f) Use support posts which will easily break off or move out of the way. If a wooden post is used, it should not exceed 4" x 4".
 - g) Mount no more than two mailboxes on one support post.
 - h) Consider roadside conditions in selecting a site.
 - i) Supports. The postal service requires that the bottom of the box be 42 to 45 inches above ground level. The Wisconsin Department of Transportation has these standards for supports which will ensure that they will break away on impact:
 - 1. Pipes shall be two inches inside diameter or less.
 - 2. Square wood supports shall not be larger than four inches by four inches. Round wood posts shall not be larger than four and one-half inches in diameter.
 - 3. Metal channel posts shall not weigh more than two pounds per foot.
 - 4. Supports imbedded in the ground shall not be more than 24 inches and shall not be imbed into concrete.
 - 5. Do not use anchor plates with metal posts. Anti-twist flanges are acceptable if they do not project more than 10 inches into the ground. These should be attached to the metal post or pipe with two and three-eighths inch (nominal) muffler clamps.
- 3) **Penalties.** Should any mailbox be deemed unsafe by Village Highway Department Personnel, the owner of said mailbox shall be notified in writing that said mailbox is not safe and does not comply with Village of Bloomfield standards and must be replaced. The owner shall then have 10 days in which to comply with the stated requirements for placement of mailboxes as laid out and explained in this ordinance.
- 4) **Location.** Mailboxes shall be located on the right side of the road, except those mailboxes may be located on the left side of the road on one-way roads. Mailboxes shall be located on the far side of driveways.

- 5) **Mailbox Damage Reimbursement.** Rural mailboxes have been and are allowed on the highway right-of-way as a matter of convenience to the landowners or occupants and not as a matter of right. It is understood that most mailboxes are located within the public right-of-way and therefore damage to a mailbox is very often unavoidable. It is assumed there is a shared responsibility between the Village and the homeowner when mailboxes are damaged during maintenance operations. There is a minimum speed, that needs to be maintained to adequately move the snow, and boxes can be damaged even at walking speeds. Various conditions dictate these speeds.

It is the intention of this policy that if a mailbox is accidentally damaged in the process of removing snow, mowing the right of way, graveling the shoulder, or any other act of maintaining the right of way, the Village will not consider reimbursement. Keeping snow and ice away from the front of the box will help the plows safely remove snow.

The Village will consider reimbursement for damaged mailboxes along Village rights-of-way only when it has been determined that:

- a) The damage was caused by actual physical contact with Village equipment
- b) The mailbox is of standard design and placed in conformance with this policy; and
- c) The mailbox and post were in good condition

The Village will not reimburse for mailboxes damaged along Village rights-of-way when the Village has determined that:

- a) The mailbox was not of a standard design or not placed in conformance with this policy even though it might have been damaged by Village equipment
- b) The mailbox and post were not in good condition; or
- c) The weight of plowed snow resulted in the damage to the mailbox and/or support structure.

- 6) **Replacement.** If your mailbox was damaged by Village equipment and you are seeking reimbursement, here are some things you should know.

- a) The Village will reimburse for qualified damaged mailboxes up to \$50 to cover the cost of materials for the repair and replacement of the mailbox.
- b) Claims must be received within seven (7) days of event and must be accompanied by pictures of the damage and receipts for replacement materials. Claims will be reviewed and forwarded to the Village Board for approval.

§ 7.05 PARKING RESTRICTIONS.

- 4) **Road Maintenance.** Whenever it is necessary to clear or repair a municipal roadway or any part thereof, the Public Works Department shall post such highways, or parts thereof with signs bearing the words “No Parking.” Such signs shall be erected at least (2) hours prior to the time that street maintenance work is to be commenced.
